This report was prepared by the Foreign Agricultural Service in Hong Kong for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of certificate requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. **FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS.**

SECTION I List Major Export Certificates Required by Government

Note: APHIS – Animal and Plant Health Inspection Service
 FSIS – Food Safety and Inspection Service
 FEHD – Food and Environmental Hygiene Department
 CITES – Convention on International Trade in Endangered Species of Wild Fauna and Flora
 AFCD – Agriculture, Fisheries and Conservation Department
 Samples see Appendix (A)

Poultry Eggs -Feathers -Products of Cattle Origin -Hides and Skins				

SECTION II. Purpose of Specific Export Certificate (s)

Please refer to the Matrix under Section I.

SECTION III. SPECIFIC ATTESTATION REQUIRED ON THE EXPORT CERTIFICATE

Please refer to the Matrix under Section I.

SECTION IV. GOVERNMENT CERTIFICATE LEGAL ENTRY REQUIREMENTS

For meats, milk, frozen confections, and plant imports to Hong Kong, the relevant Hong Kong laws require that each shipment has to be accompanied by valid health/phytosanitary certificates issued by government authorities. Suppliers or Manufacturers Export Declaration are not regarded as valid certificates.

Poultry, Red Meats and Game Meats

A health certificate from FSIS is compulsory. If the specie is not covered by FSIS inspection, a health certificate issued by APHIS or the state government is acceptable.

If the shipment is of a game meat product, the certificate has to show the scientific name and the origin.

If the game meat comes from a CITES listed specie, the shipment requires to be accompanied by a CITES export permit.

Marine Products

While no specific Hong Kong laws state health certificates for marine products are compulsory, FEHD strongly encourages importers to obtain health certificates issued by U.S. health authorities to accompany their imports certifying that the marine products concerned are fit for human consumption. Health certificates will expedite customs clearance.

Milk and Frozen Confections

Hong Kong laws require the importation of milk and frozen confections to be accompanied by a valid health certificate. For products from the U.S., Hong Kong government accepts health certificates issued by the State government

Plants

Hong Kong government requires plant shipments from the U.S. to be accompanied by Phytosanitary certificates issued by APHIS. If the specie is listed on CITES, a CITES export permit is required as well.

Pet food, Fertilized Poultry Eggs, Feathers, Products of Cattle Origin, Hides and Skins

No Hong Kong law requires the importation of these products to be accompanied by certificates, but AFCD requests the U.S. government to provide APHIS letterhead certificates for these products because of BSE and Avian Influenza cases in the U.S.

SECTION V. Other Certification/Accreditation Requirements

The importation of meats, milk, frozen confections and plants are subject to licensing control. Importers are required to apply for an import license for every shipment except for milk and frozen confections. Import licenses for milk and frozen confections are valid for a period of time and there is no limit of import volume within the specified time provided in the license. Import license for milk and frozen confections are renewed usually on an yearly basis but is valid only for six months for the first four renewals.

The importation of milk and frozen confections to Hong Kong must have prior approval from FEHD. Importers have to provide the full name and address of their frozen confection processing plant, the law of the country of origin governing the production of frozen confections/milk; mock packaging with labels; information of heat treatment method, etc.

Letterhead Certificate for Raw Poultry Meat Exported to Hong Kong

Date Issued JULY 23 2004 Certificate Number 130405

1. The meat was derived from birds found clinically free from generalized contagious, infectious and parasitic diseases.
2. The meat was derived from birds that were free from clinical signs of avian influenza (AI) and Newcastle disease (ND). The birds have been kept on farms free from AI and ND and not situated in an AI or ND infected zone, as defined by OIE. The birds were slaughtered in an establishment not situated in an AI or ND infected zone and were found to be healthy upon ante- and postmortem inspection.
3. The birds, from which the meat was derived, were subject to ante- and postmortem veterinary inspection by an official veterinarian and the meat was found to be sound, wholesome and fit for human consumption.
4. The birds were slaughtered, processed, cut and stored in establishments approved by USDA/FSIS and are eligible to produce and store poultry meat for domestic and international commerce.
5. The birds have been slaughtered and processed hygienically and the meat complies with all current USDA laws and regulations.
6. The poultry meat was packed and transported under hygienic conditions.
7. The poultry meat has been produced subject to the U.S. National Residue Program. The results of the tests have not provided any evidence of the presence of chemical/drug residues or toxic substances which could be harmful to human health.
8. The consignment of poultry meat was derived from live poultry which had been subjected to ante- and postmortem inspection and were found free of highly pathogenic avian influenza.

Certificate No. 88-05-1

Products: Frozen Confections

The California Department of Food and Agriculture, Milk and Dairy Food Safety Branch, is responsible for the licensing and inspection of all milk and dairy processing facilities in the State of California and hereby certifies that that does operate a licensed frozen milk products processing plant which is inspected and officially supervised at regular intervals by full-time inspectors employed by the State of California and are in full compliance with California's milk microbiological, chemical and drug residue surveillance programs. We certify that the facilities, equipment, raw material, processing, packaging, and product handling procedures meet with all sanitary requirements of the State of California and that the operation is in good standing.

All products processed by are subjected to heat treatment equivalent to, or greater than, 181°F (72°C) for at least 15 seconds in approved pasteurization equipment under supervision and seal by the California Department of Food and Agriculture. The final product has been packed in new single service containers.

The frozen confections contain not more than 50,000 bacteria per gram or not more than 100 coliform organisms per gram. Individual test results as follow:

Product	Code Mark	Label	Size ML	Cases	Weight-lbs.	Bacteria Per Gram	Coliform Per Gram

We hereby certify that their products are freely and without qualifications sold, used and fit for human consumption in the State of California and in the United States of America. All dairy products manufactured at this facility are from pasteurized milk and the milk is derived from dairy farms that are in California. California is classified as accredited free by USDA for bovine brucellosis and modified accredited advanced for bovine tuberculosis. The United States and California are recognized as free of Foot and Mouth Disease and Rift Valley Fever. The animals from which the product is obtained are not fed ruminant origin meat and bone meal. In the country of origin, there are animal health regulations that forbid the feeding of ruminant origin meat and bone meal to ruminant animals.

Sincerely,

Milk and Dairy Food Safety Branch
Animal Health and Food Safety Services

Re: " Brand Product from U.S.A.

We certify that:

- (A) Illinois, is designed, equipped and operated in such a way as to produce ice cream, frozen yogurt and other frozen confections of wholesome and salable quality.
(B) The ice cream, frozen yogurt and other frozen confections are handled, processed, and packed under hygienic conditions and have been pasteurized in accordance with frozen confections pasteurization regulations of the State of Illinois, Department of Public Health, Division of Food, Drugs, and Dairies, USA.
(C) The ice cream and other frozen confection products are inspected to fulfill the Illinois state regulations which are: maximum 50,000 bacteria per gram and maximum 20 coliform organisms per gram.
(D) The ice cream products will contain not less than 5% fat, 10% sugar, 7.5% milk-solids-not-fat. (This condition applies only to frozen confections named ice cream.)
(E) The frozen yogurt has been subjected to heat treatment properly and afterwards fermented by Streptococcus thermophilus, Lactobacillus delbrueckii subsp. bulgaricus, lactobacillus acidophilus, and Bifidobacterium longum.
(F) The titratable acidity of the frozen yogurt and the bacterial quality of it conform to the relevant U.S.A. Code of Federal Regulations, incorporated by reference in State of Illinois Manufactured Dairy Products Rules.
(G) The product is fit for human consumption.

Appendix 15 (Hides and Skins of Cattle Origin)**IMPORT OF HIDES AND SKINS OF CATTLE ORIGIN
TO HONG KONG FROM THE USA**

Sanitary certificates certifying the following are to accompany hides and skins of cattle origin imported from the USA. These certification requirements have been acceded by the U.S. Department of Agriculture (USDA) Animal and Plant Health Inspection Service (APHIS) Veterinary Services.

“The hides or skins originated from animals that: were slaughtered at licensed slaughterhouses underwent an ante and post-mortem inspection were found to be free of clinical signs of infectious diseases (transmissible through hides or skins) to humans or animals, and were not killed in order to eradicate an epizootic disease.”

Appendix 16 (Products of Cattle Origin)**IMPORT OF PRODUCTS OF CATTLE ORIGIN TO HONG KONG FROM THE USA**

Due to the recent Bovine Spongiform Encephalopathy (BSE) outbreaks in the USA, this Department is requesting sanitary certificates issued by the United States Department of Agriculture (USDA) for products of cattle origin from the USA to Hong Kong with immediate effect until further notice.

Sanitary certificates certifying the following are to accompany all products of cattle origin imported from the USA.

- 1. The bovine animals from which the certified materials were derived were subjected to ante-mortem examination (inspected prior to slaughter), and were not found to show any evidence or clinical signs of any disease transmissible by the certified materials. These animals did not show any clinical signs of generalized central nervous system disease.**
- 2. The feeding of ruminants with meat-and-bone meal and greaves derived from ruminants is banned in the United States, and this ban is effectively enforced.**
- 3. The bovine animals from which the certified materials were derived were not subjected to a stunning process, prior to slaughter, with a device injecting compressed air or gas into the cranial cavity or to a pithing process.**
- 4. The products of bovine origin were derived from animals slaughtered at licensed premises.**
- 5. The certified materials of bovine origin were not derived from downer cattle.**
- 6. The certified materials of bovine origin were not derived from the following Specified Risk Materials from any cattle in any BSE affected country: the brain, skull, eyes, trigeminal ganglia, spinal cord, vertebral column (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae, and the wings of the sacrum), and dorsal root ganglia (DRG) of cattle 30 months of age and older, and the tonsils and distal ileum of the small intestine of any cattle regardless of age.**
- 7. The certified materials of bovine origin do not include any components of any carcass that was rejected during post-mortem examination as unfit for human consumption.**

Appendix 17 (Feathers)**IMPORT OF FEATHERS TO HONG KONG FROM THE USA**

Sanitary certificates certifying the following are to accompany feathers imported from the USA. These certification requirements have been acceded by the U.S. Department of Agriculture (USDA) Animal and Plant Health Inspection Service (APHIS) Veterinary Services.

“The feathers have been treated by one of the following method:

- (a) washed thoroughly in detergent followed by boiling or steam sterilization at a core temperature of at least 100 °C for a minimum of 30 minutes; or***
- (b) washed thoroughly in detergent followed by formaldehyde fumigation (10% formalin) for 4 hours.”***

Appendix 18 (Fertilized Eggs)**IMPORT OF FERTILIZED POULTRY EGGS TO HONG KONG FROM THE USA**

Sanitary certificates certifying the following are to accompany fertilized poultry eggs imported from the USA.

- 1. The country of origin/export has been free from Highly Pathogenic Avian Influenza for the past 180 days prior to export.*
- 2. Within 21 days of shipment, a statistically significant number of samples collected from the parent flock have been tested negative for H5 and H7 avian influenza virus.*
- 3. Following fumigation/disinfection, the eggs are not exposed to any live bird.*
- 4. Eggs were packed in sealed containers that identify the farm of origin.*

Appendix 19 (Pet Food)

**IMPORT OF
PROCESSED/MANUFACTURED PET FOOD FROM THE USA**

Sanitary certificates certifying the following are to accompany all products of processed/manufactured pet food imported from the USA.

1. The ruminant animals from which the certified materials were derived were subjected to anti-mortem examination (inspected prior to slaughter), and were not found to show any evidence or clinical signs of any disease transmissible by the certified materials. These animals did not show any clinical signs of generalized central nervous system disease.
2. The feeding of ruminants with meat-and-bone meal and greaves derived from ruminants is banned in the United States, and this ban is effectively enforced.
3. The products of ruminant origin were derived from animals slaughtered at licensed premises.
4. The certified materials of ruminant origin were not derived from downer animals.
5. Any component of the certified material of bovine origin were not derived from the following Specified Risk Materials from any cattle in any BSE affected country; the brain skull, eyes, trigeminal ganglia, spinal cord, vertebral column (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae, and the wings of the sacrum), and dorsal root ganglia (DRG) of cattle 30 months of age and older, and the tonsils and distal ileum of the small intestine of any cattle regardless of age.
6. The certified materials of ruminant origin do not include any components of any carcass that was rejected during post-mortem examination as unfit for human consumption.
7. If the product includes materials derived from poultry origin, the product has been treated to ensure the destruction of Avian Influenza virus by one of the following methods.
 - 70C for at least 30 minutes
 - 75C for at least 5 minutes
 - 80C for at least 1 minute
8. The packages have been clearly labeled as “for pet food only” or “not for human consumption”.
