**Implementation Measures of 2006 TRQ Allocations for  
Imported Sugar**

**2005**

**Approved by:**

Casey Bean  
U.S. Embassy Beijing, Office of Agricultural Affairs

**Prepared by:**

Wu Bugang

---

**Report Highlights:**

This is an UNOFFICIAL translation of the Implementation Measures of 2006 TRQ Allocations for imported Sugar issued by the Ministry of Commerce on September 30, 2005. The TRQ volumes are identical to CY2004-the final year of WTO agreed-upon phase-in for sugar. Exporters should carefully discuss regulations and their application with importers to ensure their interpretation of the regulation is accurate.

## Summary

The following is an UNOFFICIAL translation of the Implementation Measures of 2006 Tariff Rate Quota (TRQ) Allocation for Imported Sugar as issued by the Ministry of Commerce on September 30, 2005. According to its WTO Accession Agreement obligation, China had phased in import TRQ's for sugar during CY2004. The allocation measures and requirements in 2006 remain basically unchanged from those in 2005. The document also contains two appendixes: Application Form of Agricultural Product Import TRQ Certificate and HS Codes and Tariffs for Sugar Imports in 2006. Import TRQ's for palm oil, soybean oil, and rapeseed oil will be eliminated in 2006.

BEGIN TRANSLATION

### **Implementation Measures of 2006 TRQ Allocation for Sugar**

In accordance with the "Interim Rules and Regulations for Agricultural Imports Tariff Rate Quota" (Decree No. 4 (2003) of the Ministry of Commerce and the National Development and Reform Commission), the 2006 TRQ amount, application requirements and allocation principles for imported sugar are announced as follows:

#### Section One

The 2006 TRQ amount for imported sugar shall be 1,945,000 metric tons with 70% designated for state trading firms.

#### Section Two

Fundamental requirements for applicants of sugar import TRQs include: applicants shall be registered with the State Industry and Commerce Management Authorities before October 1, 2005 and have passed the latest annual inspection by the industry and commerce authorities; applicants shall have no violation record with the Customs, Foreign Exchange, Industry and Commerce, Tax Bureau or Quarantine Authorities and sugar imports in 2003-2005; applicants shall have no record of violating the "Interim Rules and Regulations for Agricultural Imports Tariff Rate Quota".

Under the aforementioned conditions, applicants for import TRQs shall conform to one of the following categories:

1. State-owned trading enterprises;
2. Central enterprises with state reserve functions;
3. Enterprises having a record of actual sugar imports in 2005;
4. Sugar producers with a daily raw sugar processing capacity of more than 600 metric tons (inclusive), a register capital of more than 10 million yuan (inclusive), and an annual sales value of more than 200 million yuan (inclusive);
5. Enterprises engaged in processing trade using sugar as raw material.

#### Section Three

TRQ applicants should provide the following documents:

1. Application report for agricultural import TRQs;
2. Application form for agricultural import TRQs;
3. Corporate business license (copy) that has passed the latest annual inspection by industry and commerce authorities;
4. Enterprise's 2004 annual audit report (copy) produced by a qualified accounting office or a "Registration Form of 2004 Annual Inspection for VAT General Tax Payer" (copy) submitted when receiving 2004 annual examination of taxes.

Applicants with an actual import history only need to submit materials prescribed in Items 1-3; new applicants need to provide all aforementioned materials. If a new applying enterprise is established after 2003, it also needs to provide a reply letter of the competent authorities to the feasibility study report of construction project (or reply letter to construction project proposal) and an inspection and acceptance report on the project.

#### Section Four

The basic principles for allocation of sugar import TRQs are: actual import history, production capacity, sales value, and other relevant industry criteria.

1. When import TRQ amount can satisfy eligible applicants' total requested quantities, TRQs will be allocated according to applicants' requested quantities.

2. When import TRQ amount cannot satisfy eligible applicants' total requested quantities, priority shall be given to those who have an actual history of imports with TRQs being allocated proportionally on the basis of the previous year's allocation amount. Applicants without an actual history of imports will be allocated proportionally based primarily on their processing capacity and sales value. In case requested quantities are lower than the proportionally allocated quantities, the requested quantities will apply.

**Section Five**

The application period for 2006 sugar import TRQs shall be from October 15 to 30, 2005. Applicants shall submit their applications to Ministry of Commerce authorized agencies under the jurisdiction of where the industry and commerce registration took place. TRQ applicants may obtain an Application Form of Agricultural Product Import TRQ (see appendix A) from the Ministry of Commerce authorized agencies or download a copy from the Ministry's web site (<http://www.mofcom.gov.cn>).

**Section Six**

The Ministry of Commerce authorized agencies are responsible for handling enterprise applications within their jurisdiction and submitting the eligible applications to the Ministry of Commerce, and copy to the National Development and Reform Commission, before 30 November 2005.

**Section Seven**

The Ministry of Commerce will issue an Agricultural Product Import TRQ Certificate, through authorized agencies, to the end-user before January 1, 2006.
