GAIN Report #CH1016

China, Peoples Republic of

Grain and Feed

Corn and Wheat Update

2001

U.S. Embassy

Approved by:
Larry Senger

Prepared by:
John Wade/Zhang Jiangping/Xiang Qing

**Report Highlights: Prices for Corn drop slightly after several months of steep rises.
Corn stock situation appears to be improving. Wheat imports remain very sluggish.**

Includes PSD changes: Yes
Includes Trade Matrix: No
Unscheduled Report
Beijing [CH1], CH

Situation and Outlook

Corn

Prices have fallen over the past 2-3 weeks but only by \$2-3/ton. Sources indicate that several factors have contributed to this drop. One is simply cyclical. Prices at this time of year often fall as feed demand drops a bit after Chinese New Year and farmers sell corn to obtain planting supplies. Meat demand in general also appears to be softening due to some slowing in overall economic growth. Most interesting however, some sources indicate that the run up in prices over the last several months, raised the price for corn on the domestic market to such a point that it surpassed the price that subsidized exports receive. So the grain bureaus were able to sale to the domestic market and not have to wait for the export subsidy. These extra sales brought the price down. This appeared to happen at around \$135/ton in the key Northeast production region.

There are indications that Government stocks may be coming down quickly. Officials in the Northeast province of Heilongjiang report they have been able to significantly reduce their corn stocks this year. Heilongjiang is at the end of the supply line, so if stocks are moving well there, it would seem likely that considerable headway has been made throughout the country in reducing stocks. Also, the Government is once again doing an audit of stocks, (they did one last autumn as well), This could indicate that they're worried that stocks are running low, but it could also be that they're just doing another sweep to try and catch fraud.

It appears 700,000 MT has been contracted for March to May export. This would be off the pace of exports 6 months ago and it appears that exporters are having to scramble a bit to fill this commitment. The Government is holding off on any subsidies beyond May. It still appears that stocks are large enough to last the rest of the marketing year, but the possibility remains that the Government has overshot its target and will need to allow imports later in the year to control prices.

As for corn planting, the Government is still saying they expect it to go down again this year. Post feels that area will increase modestly too, due to much higher prices this year as compared to last.

Wheat

With some recent rains the weather appears to be near or better than normal. The MY 2001 production estimate is raised slightly.

Prices have stayed stable and even dropped a bit as the Government has held several large auctions from their stocks in recent months. It seems very likely that China will be able to get through the rest of the marketing year without a significant increase in imports. Through February, exports are only 270,000 MT. Post suggest lowering the MY 2000 imports have been lowered to 500,000 MT from the current 1 MMT.
