

Voluntary Report – Voluntary - Public Distribution

Date: October 06, 2022

Report Number: E42022-0064

Report Name: EU Early Alert - Pesticide Review - September 2022

Country: European Union

Post: Brussels USEU

Report Category: SP2 - Prevent or Resolve Barriers to Trade that Hinder U.S. Food and Agricultural Exports

Prepared By: Tania De Belder

Approved By: Elisa Fertig

Report Highlights:

The European Union (EU) follows a complex, rolling system of review for active ingredients and Maximum Residue Levels (MRLs) in food. For agricultural inputs, U.S. farmers must know early in the process of review to prevent or mitigate the loss of, and/or access to, chemical inputs. The information in this document provides interested stakeholders with advance notice of those active ingredients under review, highlighting those substances undergoing new restrictions or may not be renewed. This is a quarterly update from August 2022 and includes a link to the consolidated version as well.

General Information:

The active ingredients of plant protection products (PPPs), along with Maximum Residue Levels (MRLs) and/or import tolerances, are an increasingly important concern in the EU given the decrease in the number of active ingredient substances approved for use. [Regulation \(EC\) No 1107/2009](#) and [Regulation \(EC\) No 396/2005](#) regulate PPPs and MRLs, respectively. The EU follows a complex, rolling system of review for use of active ingredients and MRLs in food. For agricultural inputs, U.S. farmers must know early in the process of EU reviews in order to prevent or mitigate trade disruption due to new restrictions or non-renewals of chemical inputs.

The information presented in this document provides interested stakeholders with advance notice of active ingredients under review for renewal of approval in the EU and highlights which substances may have restricted or non-renewal of approval. This is a quarterly update. The arrows to the left of each section explain where a substance is in the EU review process as of August 31, 2022.

Please find a link to the [EU Early Alert – Pesticide Review](#) and the Consolidated version, which incorporates information made available in past publications with the updates of the latest version as explained above. USDA is seeking feedback from our stakeholders on this document and the information it presents. If it is considered useful, it may be updated and distributed quarterly according to your preferences. Please send comments and questions to AgUSEUBrussels@usda.gov and PlantDivision@usda.gov.

Disclaimer: Please note that while every effort is made to capture all upcoming and completed reviews, this list may not be all-inclusive.
