

Voluntary Report – Voluntary - Public Distribution

Date: June 03, 2022

Report Number: E42022-0042

Report Name: European Commission Authorizes two GE Crops for Import

Country: European Union

Post: Brussels USEU

Report Category: Biotechnology and Other New Production Technologies

Prepared By: Luigi Castaldi

Approved By: Elisa Fertig

Report Highlights:

On May 19, 2022, the European Commission (EC) approved two genetically engineered (GE) crops (1 soybean and 1 corn/maize) for food and animal feed. The two authorizations were published in the European Union's Official Journal on May 20, 2022, and they remain valid for 10 years.

General Information:

On May 19, 2022, the European Commission (EC) approved two genetically engineered (GE) crops (1 soybean and 1 corn/maize) used for food and animal feed. All these crops have gone through a comprehensive and stringent authorization procedure, including a favorable scientific assessment by the European Food Safety Authority (EFSA). The authorization and renewal decisions apply to food and feed for import and processing, but do not cover cultivation and are valid for 10 years. All products will be subject to the EU's strict labelling and traceability rules.

The two Commission Implementing Decisions for the authorizations were published in the [Official Journal of the European Union, L 141, 20 May 2022](#):

[Commission Implementing Decision \(EU\) 2022/798 of 19 May 2022 authorising the placing on the market of products containing, consisting of or produced from genetically modified soybean MON 87769 × MON 89788 pursuant to Regulation \(EC\) No 1829/2003 of the European Parliament and of the Council \(notified under document C\(2022\) 3182\) \(1\)](#)

[Commission Implementing Decision \(EU\) 2022/797 of 19 May 2022 authorising the placing on the market of products containing, consisting of or produced from genetically modified maize NK603 × T25 × DAS-40278-9 and its sub-combination T25 × DAS-40278-9, pursuant to Regulation \(EC\) No 1829/2003 of the European Parliament and of the Council \(notified under document C\(2022\) 3179\) \(1\)](#)

Authorization Process:

All GE crops have gone through the EU's full authorization procedure, including a favorable scientific assessment by the European Food Safety Authority (EFSA), as set in Directive 2001/18/EC. After a positive evaluation by EFSA, the EC puts forward a proposal for the authorization of the events that must be voted at the Standing Committee on Plants, Animals, Food and Feed (PAFF) for Genetically Modified Food and Feed and Environmental Risk by EU Member State (MS) representatives. A positive outcome in the PAFF Committee requires a qualified majority. Member States did not reach a qualified majority either in favor or against the GE crops at the Standing Committees and at the subsequent Appeal Committees thus the Commission has the legal duty to proceed with the authorizations.

Consideration and Outlook:

These two events were approved during PAFF Committee meetings respectively on February 16, 2022, and on April 1, 2022. The Appeal Committee meetings took place respectively on April 5, 2022, and on April 26, 2022. This is the second group of GE approvals for export to the EU that the Commission has approved in 2022.
