GAIN Report #UK9065

Date: 12/21/1999

United Kingdom Exporter Guide 1999

Approved by: Thomas A. Hamby

Drafted by: Michael L. Conlon

Report Highlights: This report provides information to U.S. companies interested in doing business in the United Kingdom. It focuses on exports of consumer oriented foods, beverages, edible fishery products and food ingredients.

Includes PSD changes: No Includes Trade Matrix: No Annual Report London[UK1], UK GAIN Report #UK9065 Page 1 of 16

SECTION I. MARKET OVERVIEW

The UK economy is one of the strongest in Europe, with high growth of its Gross Domestic Product (GDP), modest inflation and low unemployment. Data for the third quarter of 1999 shows that the economy continues to grow at an increasing pace. Growth in the service sector has regained some momentum, while the manufacturing sector has recovered from its earlier decline, and now shows increasing growth particularly in a number of hi-tech areas.

The UK population has grown steadily in recent years, recorded at just over 59.2 million in 1998. That said, the population is stabilizing, with some forecasters (including the United Nations) suggesting it will go into steady decline in the coming years, reaching 57 million by 2050. Almost 90 percent of the UK population is to be found in England, one of the most urbanized areas in Europe. Of this total, over 7 million people live in Greater London (the area within the M25 ringroad).

UK: Population Trends, 1994 -1998

'000s

| | 1994 | 1995 | 1996 | 1997 | 1998 |
|---------|--------|--------|--------|--------|--------|
| Males | 28,592 | 28,727 | 28,856 | 28,990 | 29,128 |
| Females | 29,803 | 29,878 | 29,946 | 30,019 | 30,108 |
| Total | 58,395 | 58,606 | 58,801 | 59,009 | 59,237 |

Source: Office for National Statistics, 1999

The UK population is getting older; in 1998, 15.7 percent of the population was 65 years of age or older. There is also an increasing proportion of working women and the number of one-person households is on the increase. This is affecting the demands being placed on the retail sector. The UK consumer is now demanding more convenience foods (including both fresh and frozen ready meals), a greater variety and more specialty foods. Healthy eating, or "watching what you eat", is a growing trait as is the popularity of vegetarian and organic foods. Unprocessed and semi-processed products are decreasing in popularity. Although price remains important, disposable incomes are on the rise (average weekly earnings rose 4.4 percent to US\$612 in 1998) and the UK consumer is becoming increasingly discerning with quality an important concern.

Advantages and Challenges Facing the U.S. Products in the UK

| Advantages | Challenges |
|--|--|
| Market dominated by few retailers with strong market penetration. Sophisticated replenishment systems mean U.S. product would be widely distributed. | Retailers demand significant volume and their concentration can make market access difficult initially. Trial listings must give results in a short time or product will be de-listed. |
| There are a large number of specialist importers. | The UK has well-established brands for mainstream products. Brand building costs are substantial. |

GAIN Report #UK9065 Page 3 of 16

| The U.S. has a good brand image in the UK. | Strict (EU) regulation. Labeling/ingredient requirements. |
|--|--|
| The country is English speaking. | Culture clash - U.S. exporters must appreciate that the UK is not the 51 st state. Negative UK reaction to biotechnology and other agricultural practices commonplace in the U.S. highlight the importance of understanding the market. Indeed consumers are more wary of imports than of domestic product. |
| The U.S. is a popular destination for the UK tourist and familiarity with U.S. products is widespread. | Popularity of specialty products from many EU countries and U.S. competitors is high, eg French cheeses, Spanish citrus, Italian pasta, South African wines. In addition to higher transport costs, the U.S. has to compete with the duty free nature of intra-EU trade. |
| Strong purchasing power, sophisticated market. | High marketing costs. |
| Strong interest in innovative products. | |

SECTION II. EXPORTER BUSINESS TIPS

General Consumer Tastes and Preferences

These are some generalities often heard from British businessmen.

- Most businessmen would rather have lunch than breakfast or dinner.
- The British food retail environment is fairly direct.
- You should go through an importer because retailers want regular contacts with their suppliers.
- While the British are less formal than they used to be there are still formalities to be observed, such as being on time for meetings and dressing formally.
- You should have plenty of business cards and brochures.

Food Standards and Regulations

The UK follows EU policies regarding labeling and ingredient requirements. A more detailed report that specifically addresses labeling and ingredient requirements in the UK is entitled: The UK: Food and Agricultural Import Regulations & Standards Report (FAIRS) and can be obtained from the FAS homepage at http://www.fas.usda.gov.

General Import and Inspection Procedures

HM Customs are responsible for the clearance of all goods entering the UK. When any food or agricultural product does not have the required documentation - i.e. animal or plant health, food safety certification, officials bring this to the attention of the Ministry of Agriculture which in turn alerts the Foreign Agricultural Service Office of Agricultural Affairs. That office then alerts the relevant USDA agency and/or the exporter to advise them which documentation has to be

GAIN Report #UK9065 Page 4 of 16

provided in order for the goods to be cleared.

If products not meeting EU/UK animal and plant health, and food safety legislation should enter the UK they will often time be destroyed or the exporter will be advised that they must be shipped back to the place of origin in the export chain.

For further information, please refer to the UK: Food and Agricultural Import Regulations & Standards Report (FAIRS), which can be obtained from the FAS homepage at http://www.fas.usda.gov.

SECTION III. MARKET SECTOR STRUCTURE AND TRENDS

The structure of the UK food market is one of the most concentrated in Europe. The UK has experienced considerable movement towards the "one-stop shopping" concept. Several large multiple retail chains dominate, to the detriment of the independent retailer.

The distribution chain starts with the U.S. producer/manufacturer/exporter who normally sends the product to a UK importer/agent. The importer will have responsibility for distribution to multiple retailers, independent retailers, foodservice chains or wholesalers as appropriate.

Retail Food Sector

The dominance of the five major retailers has continued to rise year on year since 1995. In 1998, the five major retailers accounted for nearly 68.9 percent of total retail sales. Tesco is the leading UK supermarket, with 20.5 percent of the market, followed by Sainsbury (18.0 percent), Asda/Wal-Mart (11.9 percent), Safeway (9.4 percent) and Somerfield (9.0 percent). Tesco is the strongest in the south of the country, Sainsbury in London, Asda in the North East and Safeway in Scotland.

Superstores in the UK are smaller than their counterparts in Germany or France, much of this a result of tight UK planning law: the stores of the two major players, Tesco and Sainsbury, average around 3,500m². The aforementioned restrictions and the resulting limited availability of suitable sites has fueled the move back towards smaller stores by some of the big players.

With sophisticated replenishment systems, the UK leaders are able to offer full food range in smaller stores and compete more effectively with the minor multiples, whose share of the market remains fairly static, accounting for 7.9 percent of retail sales in 1998. The two leading minor retailers are Morrisons (3.5 percent) and Iceland (2.7 percent).

The neighborhood has traditionally been the home of the independent retailer. However, here too the major retailers are making an impact. Tesco and Safeway have developed forecourt (gas-mart) based supermarket formats while Sainsbury has opened "Local" stores.

The discount market, predominantly Lidl and Netto, has been showing recent growth in the UK. However, the discount market's 2 percent share of retail sales is not expected to show much more growth following the introduction of low cost ranges by some of the major multiples. This move is yet another example of the moves made by the major retailers who are anxious to maintain their stranglehold on the UK retail market.

<u>GAIN Report #UK9065</u> Page 5 of 16

A key way in which UK retailers stand out against their Continental counterparts is with their own brands. Each retailer looks on the business as a brand. All of the major multiples and some of the smaller retailers have a substantial number of private (or own) label lines. The market leader Tesco has 45.9 percent of its total product lineage as own label, with Sainsbury in front with 50.4 percent, Asda with 46.0 percent, Safeway with 40.5 percent and Somerfield with 37.4 percent (figures are at March 1997). Goods carrying the company's brand are not necessarily cheap but, rather, are often quality goods competing with the brand leader. A good example is Tesco's "Finest" brand. The quality and value for money of these brands are then used by the retailers as marketing tools to attract custom.

Company Profiles

| Retailer Name | Outlet Type | Operating name | Store Type | Ownershi p | Sales CY98 (\$ mil) | No. of Outlets | Location | Purchasing Agent Type |
|--------------------|-------------------|---|---|---------------|------------------------------|-----------------------|---|--------------------------|

|---------------------|---------------------|----------|------------|---------------------|
|---------------------|---------------------|----------|------------|---------------------|

As mentioned previously, UK retailers generally prefer to purchase through importers. However, the Agricultural Office in London does hold details of the buying procedures of individual retailers should exporters still prefer to make direct contact.

Hotel, Restaurant and Institutional (HRI) Sector

The HRI sector is highly fragmented and is generally referred to as the food service or catering sector, and includes both private (profit) and public (cost) outlets. The profit sector includes hotels, restaurants, pubs, fast food, travel, cafes, take-away and clubs. The public sector is comprised primarily of health care, education and public service.

Independent and small catering chains source primarily through the wholesale markets, often via secondary wholesalers. The national catering chains increasingly source direct from importers.

There are almost 300,000 catering establishments in the UK which can be broken down as follows:

Catering Outlets in the United Kingdom, 1997

| Profit Sector | Approx. No. | % of Total | % Change 1996-97 |
|--------------------------|----------------|---------------|---------------------|
| Hotels | 60,861 | 20.4 | +0.2 |
| Restaurants | 15,925 | 5.3 | +0.1 |
| Fast food (major chains) | 1,913 | 0.6 | +22.3 |
| Cafes/take away | 30,369 | 10.2 | -0.9 |
| Pubs/clubs | 57,408 | 19.2 | +1.5 |
| Leisure | 47,912 | 16.0 | +14.1 |
| Subtotal: Profit Sector | 215,701 | 72.1 | -1.0 |

Wholesale

The main function of the wholesale markets is to break bulk, distribute produce to secondary wholesale operations and to supply regional independent grocers and catering outlets. In 1996 (the last year figures are available) the total wholesale sector produced a turnover of \$22.9 billion, up from \$22.6 billion in the previous year. Cash and Carry rose from \$14.8 billion to \$15.1 billion and delivered trade from \$7.5 billion to \$7.8 billion.

The major London markets are based at Covent Garden, Western International, Spitalfields, Smithfield (Meat) and Billingsgate (Fish). In addition, most major cities in the UK have smaller wholesale markets, which are serviced by the major importer/distribution companies or the London markets.

The wholesale market system is under considerable pressure, and has been for some time due to a number of factors, including the recent UK economic recession. The main cause of its decline, however, is the role that the multiple retailers play and their dominance.

The role of the wholesale market has been reduced to supplying independent retailers and caterers. Increasingly, wholesalers handling specialty produce supply primarily to the catering trade. As much as 80 percent of customers are thought to be from this sector. The wholesale sector is characterized by a strong "day-to-day" nature of the trading activity, being a price dominant market, with little long term loyalty shown by buyers to suppliers. Promotional activities can stimulate sales in the short term, but often do not sustain long term development.

Domestic Food Processing Sector

The British food processing sector, with an output of around \$83 billion, is one of the most advanced and developed in the world. Companies such as Unilever, Guinness and Grand Metropolitan are among the largest in Europe. Many U.S. companies, for example Pepsico, Kellogg's, ADM, ConAgra and Cargill also have substantial interests in the UK. The commercial companies that produce further processed and branded products vary in size, but the major brands

GAIN Report #UK9065 Page 8 of 16

recognized by most British consumers are mainly owned and produced by the larger companies.

As the UK is 59 percent self sufficient in all types of food and feed and 76 percent self sufficient in indigenous products, there is substantial demand for imported products. It is estimated that around 20 percent of the UK's agricultural imports are of unprocessed products, of which almost two thirds are not indigenous to the UK. Lightly processed products account for around 50 percent of agricultural imports, one third of which are not produced in the UK. Of the remaining 30 percent of agricultural imports (highly processed products), around half are non native to the UK.

The major unprocessed commodities that are not commercially produced by the UK are rice, citrus fruit, bananas, maize, coffee, cocoa, stone fruit, tea and some oilseeds and oleaginous fruit. Although the UK produces sugar beet, cane sugar is imported under the Lome Convention. Processed products that the UK has to import include wine and preserved/frozen fruit and fruit juices.

GAIN Report #UK9065 Page 9 of 16

SECTION IV. BEST HIGH VALUE PRODUCTS PROSPECTS

Key ongoing markets for U.S. products which show good growth potential are canned salmon, meal accompaniments, cooking sauces, vegetable and salad oils and dressings, confectionery, dips and salsa, frozen foods, exotic meats, wine and beer.

U.S. exports of consumer-oriented product to the UK (US\$ thousands)

| Product | 1996 | 1997 | 1998 |
|----------------------------------|---------|---------|---------|
| Snack Foods (excl. Nuts) | 17,353 | 38,635 | 48,403 |
| Breakfast Cereals & Pancake Mix | 2,608 | 4,131 | 3,996 |
| Red Meats, Fresh/Chilled/Frozen | 13,533 | 15,624 | 24,891 |
| Red Meat, Prepared/Preserved | 1,127 | 335 | 684 |
| Poultry Meat | 3,992 | 4,413 | 1,210 |
| Dairy Products | 7,993 | 10,552 | 11,436 |
| Eggs & Products | 2,562 | 2,478 | 4,737 |
| Fresh Fruit | 54,049 | 62,018 | 65,021 |
| Fresh Vegetables | 12,806 | 17,943 | 20,629 |
| Processed Fruit & Vegetables | 120,178 | 110,074 | 105,392 |
| Fruit & Vegetable Juices | 19,675 | 22,476 | 23,373 |
| Tree Nuts | 80,941 | 59,132 | 59,623 |
| Wine & Beer | 102,509 | 123,841 | 164,243 |

KEY FOOD AND BEVERAGE TRADE ASSOCIATIONS

Food and Drink Federation 6 Catherine Street London WC2B 5JJ

Tel: 0171 836 2460 Fax: 0171 836 0580

The Food and Drink Federation represents and promotes welfare of food and drink manufacturers, providing authoritative information to media, consumers, distributors, legislators, health professional, academics and schools. Its services division provides the secretariat for over 36 other food and beverage sector trade associations including the Association of Cereal Manufacturers, Association of Fish Canners, the Bakery Allied Traders' Association, British Fruit and Vegetable Canners Association, Fresh Produce Association, the Pet Food Manufacturers' Association, the Rice Association and the British Starch Industry Association.

Institute of Grocery Distribution Letchmore Heath Watford WD2 8DQ

Tel: 01923 857141 Fax: 01923 852531

IGD is a prominent source of data and analysis of the grocery industry - retail trade and manufacturing trade supplying the retailers. Its membership is made up of mainly food manufacturers and multiple grocers (national supermarket chains). The Institute offers its services to both members and non-members. Research/Information services fees can run from 15BPS for a minimal request (size of a particular product market and the provision of two names within that market) to 40BPS per hour for more detailed research/information. Within its publications service, the Institute publishes a monthly Grocery Market Bulletin reporting on the latest trends in national and international manufacturing, wholesaling, distribution and retailing.

Importers Division
Fresh Produce Consortium
266-270 Flower Market
New Covent Garden Market
London SW8 5NB

Tel: 0171 627 3391 Fax: 0171 498 1191

The Fruit Importers Division of the Fresh Produce Consortium operates through an elected Chairman. It provides market information to members, specifically Covent Garden Market prices (3 times a week), customs tariffs, etc.(when implemented), and a circular (once a week) on such items as requests from overseas Countries for contacts with members to handle their fresh produce in the UK, and information on new regulations.
