

Required Report: Required - Public Distribution

Date: August 09, 2024

Report Number: HK2024-0043

Report Name: FAIRS Export Certificate Report Annual

Country: Hong Kong

Post: Hong Kong

Report Category: FAIRS Export Certificate Report

Prepared By: ATO Hong Kong Staff

Approved By: Jennifer Clever

Report Highlights:

Hong Kong does not have any certification changes for food imports since the last report submitted in July 2023. This report lists the certificates required by the Hong Kong Government (HKG) for U.S. agricultural and food exports to Hong Kong. Certificate samples are included in the appendix.

This report was prepared by the Agricultural Trade Office of the Foreign Agricultural Service in Hong Kong for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of certificate requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING REGION’S RULES AND REGULATIONS.

Table of Contents

Section 1: List all the Export Certificates required by Government (Matrix) 2

Product: Poultry..... 2

Product: Pork 2

Product: Beef 3

Product: Fish & Seafood Products (not mandatory but strongly recommended by the HKG) 3

Product: Milk and Milk Beverages 3

Product: Frozen Confections 4

Product: Table Eggs 5

Product: Other Egg Products, including powdered eggs and liquid eggs..... 5

Product: Plants..... 5

Product: Pet Food/Animal Feed (Not mandatory)..... 6

Section II. Purpose of Specific Export Certificate(s) 6

Section III. Specific Attestations Required on Export Certificate(s) 6

Section IV. Government Certificate’s Legal Entry Requirements..... 6

Poultry, Red Meats, and Game Meats 6

Eggs 7

Seafood Products..... 7

Milk and Frozen Confections..... 7

Plants..... 7

Products Containing Living Modified Organisms 8

Section II. Purpose of Specific Export Certificate(s)

Please refer to the Matrix under Section I.

Section III. Specific Attestations Required on Export Certificate(s)

Please refer to the Matrix under Section I.

Section IV. Government Certificate’s Legal Entry Requirements

For meats, egg products, milk, frozen confections, and plant imports to Hong Kong, the relevant Hong Kong laws require that each shipment must be accompanied by a valid health/phytosanitary certificate issued by government authorities. Suppliers or Manufacturers Export Declarations are not regarded as valid certificates.

Poultry, Red Meats, and Game Meats

A certificate from FSIS is compulsory. Species should be given as part of product description on FSIS certificates. In the past, Hong Kong recognized system-based registration of foreign suppliers. However, in recent years, Hong Kong has been moving away from a systems-based approach towards facility registration for exporters of red meats (beef, pork, and mutton) and poultry. The HKG has been implementing these new registration requirements on a partner-by-partner basis. In 2023, the HKG initiated these discussions with the United States. As of the date of this report, the HKG confirmed that there are no changes on the health certificate requirements under the new import protocol.

If the species is not covered by an FSIS inspection, a certificate issued by APHIS or a state government may be acceptable.

If the shipment is of a game meat product, the certificate must show the scientific name and the origin. If the game meat comes from a CITES listed species, the shipment needs to be accompanied by a CITES export permit.

U.S. exporters are advised to contact FSIS or ATO Hong Kong to check if any trade protocol has been established between the United States and the HKG regarding the export of a particular exotic meat to Hong Kong.

In 2017, the HKG confirmed that U.S. bison can be exported to Hong Kong with a FSIS health certificate.

Eggs

Mandatory certification for table eggs and other egg products including pasteurized egg, liquid egg, and powdered egg products became effective December 5, 2015. U.S. table eggs have to be accompanied by a health certificate issued by AMS together with a “Disease Free Certification Statements for Hong Kong” in order to have access to the Hong Kong market. For other U.S. egg products including pasteurized egg, powdered egg, and liquid egg to be exported to Hong Kong, a health certificate issued by FSIS is required.

Seafood Products

While no specific Hong Kong laws requires health certificates for marine products, the FEHD strongly encourages importers to obtain certificates issued by U.S. health authorities to accompany imports certifying that the marine products concerned are fit for human consumption. Valid certificates expedite customs clearance. Under administrative orders, all raw-consumed seafood products, for example, oysters, are allowed entry to Hong Kong only when they have a health certificate.

Milk and Frozen Confections

Hong Kong importers are required to obtain prior approval from the Center for Food Safety (CFS) for bringing in shipments of milk and frozen confections. In addition, each consignment must be accompanied by a valid certificate. For products from the United States, the HKG accepts certificates issued by a State government.

Plants

The HKG requires plant shipments from the United States be accompanied by phytosanitary certificates issued by APHIS. If the species is listed on CITES, a CITES export permit is required as well.

Products Containing Living Modified Organisms

Hong Kong passed a Genetically Modified Organisms (Control of Release) Ordinance and the Genetically Modified Organisms (Documentation for Import and Export) Regulation in March 2010 and November 2010, respectively. In the Ordinance, “GMOs” are referred to as “living modified organisms” (LMOs). Since the commencement of the Ordinance and the Regulation in March 2011, shipments containing genetically modified organisms for food or feed or for processing must be accompanied by documentation containing the following information:

- A statement indicating the shipment *contains* a GMO intended for direct consumption as food or feed or for processing (when the identity of the GMO is known), *or* a statement indicating the shipment *may contain* a GMO intended for direct consumption as food or feed or for processing (when the identity of the GMO is not known);
- The GMO is not intended for release into the environment;
- The common name, scientific name and, where available, commercial name of the GMO;
- The Internet address of the Biosafety Clearing House LMO registration;
- The transformation event code of the GMO or, where available, its unique identifier code; and,
- The details of the importer or exporter (such as name, address and contact information) for further information.

There is no specific requirement regarding the form of documentation accompanying GMO shipments. The use of a commercial invoice or other documents required by existing documentation systems is sufficient.

The HKG uploaded a document sample listing required information for traders’ reference at the Agriculture, Fisheries and Conservation Department (AFCD)’s website.
(http://www.afcd.gov.hk/english/conservation/con_gmo/con_gmo.html)

Products containing GMO ingredients for release into the environment or for contained use are required to provide different attestations on documents. Also, importers are required to seek prior approval from AFCD before the importation of products containing GMOs, which are intended to be released to the environment.

Horses

USDA APHIS has a bilateral agreement with Hong Kong on U.S. horse exports that went into effect on September 20, 2011. There are now three certificates for the: (1) permanent importation, (2) temporary importation, and (3) transit of U.S.-origin equines. The bilateral agreements relax the veterinary examination and animal disease testing requirements and timelines for equines from the United States.

For details, please contact APHIS Beijing at 86-10-8531-3033 (fax) or Dr. Ashley Van Batavia at email: ashley.vanbatavia@usda.gov

Section V. Other Certification/Accreditation Requirements

The Hong Kong government does not require attestation of radioactivity for imports.

Appendix

A1. FSIS Health Certificate for Meats (FSIS 9060-5)

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0583-0153. The time required to complete this information collection is estimated to average 25 minutes per response, including the time for reviewing instruction, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

U.S. DEPARTMENT OF AGRICULTURE FOOD SAFETY AND INSPECTION SERVICE		A knowingly false entry or false alteration of any entry on this certificate may result in a fine of not more than \$10,000 or imprisonment for not more than 5 years or both (18 U.S.C.1001). Additional penalties exist under the Federal Meat Inspection Act [21 U.S.C. 611(b) (1), (2); and (5), 21 U.S.C. 461] for an unauthorized or false alteration or misuse of this certificate.

Letterhead Certificate for Raw Poultry Meat Exported to Hong Kong

Date Issued: _____ Certificate Number: _____

1. The meat was derived from birds found clinically free from generalized contagious, infectious and parasitic diseases.
2. The meat was derived from birds that were free from clinical signs of avian influenza (AI) and Newcastle disease (ND). The birds have been kept on farms free from AI and ND and not situated in an AI or ND infected zone, as defined by OIE. The birds were slaughtered in an establishment not situated in an AI or ND infected zone and were found to be healthy upon ante- and postmortem inspection.
3. The birds, from which the meat was derived, were subject to ante- and postmortem veterinary inspection by an official veterinarian and the meat was found to be sound, wholesome and fit for human consumption.
4. The birds were slaughtered, processed, cut and stored in establishments approved by USDA/FSIS and are eligible to produce and store poultry meat for domestic and international commerce.
5. The birds have been slaughtered and processed hygienically and the meat complies with all current USDA laws and regulations.
6. The poultry meat was packed and transported under hygienic conditions.
7. The poultry meat has been produced subject to the U.S. National Residue Program. The results of the tests have not provided any evidence of the presence of chemical/drug residues or toxic substances which could be harmful to human health.
8. The consignment of poultry meat was derived from live poultry which had been subjected to ante- and postmortem inspection and were found free of highly pathogenic avian influenza.

**Letterhead Certificate for the Export of Beef and Beef Products to Hong Kong
Slaughtered on or after June 17, 2014**

Date Issued: _____ Certificate Number: _____

1. The beef or beef products exclude mechanically separated beef, products from advanced recovery system, lean finely textured beef, scrap meat, trimmings or other pieces (whether with or without bone) indistinguishable from trimmings.
2. The feeding of ruminants with meat and bone meal and greaves derived from ruminants has been banned and the ban has been effectively enforced.
3. The beef or beef products were neither derived from nor contaminated with the following specified risk materials: the brain, skull, eyes, trigeminal ganglia, spinal cord, vertebral column (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae, and the wings of the sacrum), and dorsal root ganglia of cattle 30 months of age and older, and the tonsils and distal ileum of any cattle regardless of age.
4. The cattle from which beef or beef products were derived were not subjected to a stunning process, prior to slaughter, with a device injecting compressed air or gas into the cranial cavity or to a pithing process.
5. The beef or beef products were derived from cattle that passed ante-mortem and post-mortem inspection. The beef or beef products were derived from cattle that were slaughtered under official supervision in FSIS-inspected establishments. The beef or beef products were derived from cattle free from systemic contagious, infectious and parasitic disease at the time of slaughter.
6. The beef or beef products were produced in accordance with the FSIS National Residue Program, which ensures that the product is free of harmful residues.
7. The United States has been evaluated and classified by the World Organization for Animal Health (OIE) as a country with a negligible-risk status for bovine spongiform encephalopathy (BSE).

Disease Free Certification Statements for Hong Kong

Shell Egg Grading Certificate No. SEA - 098765432 Dated: October 15, 2012

"The U. S. Department of Agriculture, Animal and Plant Health Inspection Service, Veterinary Services certifies that:

No cases of notifiable avian influenza (NAI), including the highly pathogenic subtype H5N1, and no cases of velogenic Newcastle disease (VND) have been reported in commercial laying chicken flocks in the county(ies) of origin where the eggs originated for the 3 months preceding departure of this consignment. These eggs were produced in the county(ies) in the state of Arkansas identified below:

Pulaski County

The shell eggs covered by this certificate were produced by birds originating from Salmonella enteritidis (SE) -certified breeding flocks which have not been identified within 90 days before shipment by the U.S. Department of Agriculture, Animal and Plant Health Inspection Service, as being infected with SE, including SE phage type 4."

Circular Letter to importers of pet food/animal feed

Dear Sir/Madam,

Importation/transshipment of pet food/animal feed to/via Hong Kong

We have no objection to the importation/transshipment of pet food/animal feed to/via Hong Kong. Nevertheless, no import permit will be issued by this Department for such purpose. If the products contain materials derived from ruminant or poultry origin or milk, it is recommended that a veterinary certificate issued/endorsed by the relevant official veterinary authority in the country of export be accompanied with the pet food/animal feed importing into Hong Kong to facilitate trade and re-export. Please find below some relevant provisions for the veterinary certificate.

1. The certified materials were derived from ruminant animals that have passed ante-mortem and post-mortem inspections, and were not found any evidence or clinical signs of any disease transmissible by the certified materials. These animals did not show any clinical signs of generalised central nervous system disease.
2. The materials were not derived from bovine animals that were subject to any official restrictions by the competent veterinary authority of the country/state for the risk of Bovine Spongiform Encephalopathy (BSE).
3. The materials were sourced from bovine animals that were in live condition prior to the slaughter, and were not subject to a stunning process, i.e. with a device injecting compressed air or gas into the cranial cavity, or to a pithing process prior to being slaughtered.
4. The feeding of ruminants with meat-and-bone meal and greaves derived from ruminants has been prohibited in the country of production for at least eight years.
5. The products of ruminant origin were derived from animals slaughtered in licensed premises.
6. The certified materials of ruminant origin were not derived from downer animals.
7. Any components of the certified material of bovine origin were not derived from the following Specified Risk Materials (SRM) from any cattle in any BSE affected countries; the brains, skulls, eyes, spinal cords, vertebral columns of cattle 12 months of age and older, and the tonsils and distal ileum of the small intestines of any cattle regardless of age.
8. Every precaution was taken to prevent direct or indirect contact during the slaughter, processing and handling of the bovine origin ingredients with the aforementioned SRM in item 7.
9. If the products comprise materials derived from poultry origin, they have to be treated to ensure the destruction of Avian Influenza virus by a heat treatment of:
 - 75°C for at least 30 minutes
10. Necessary precautions were taken to avoid contact of the treated poultry-containing products with any source of avian influenza virus.
11. The packets have been clearly labelled as "for pet food only" or "dog food" or "cat food" or "not for human consumption".
12. The products do not contain any prohibited chemicals. In case the product contains any specified agricultural and veterinary chemicals, all information such as the amount of each type of chemicals, instructions for use, the withholding period and the name and address of the importer, must be clearly displayed on the packet in accordance with the legal requirements. (For details, please visit <http://www.legislation.gov.hk/eng/home.htm> and refer to Sections 12 and 13 of the Public Health (Animals And Birds) (Chemical Residues) Regulation (Cap. 139 sub. leg. N).
13. The milk or milk-based products have undergone pasteurisation.
14. Appropriate control and monitoring measures are in place to prevent the products from presenting a risk to animal health.

Thank you for your attention in this matter. Should you have any further enquiries, please feel free to contact our staff at 2150 7063.

Yours faithfully,

Dr. SZE Ling-wai, Tommy
for Director of Agriculture, Fisheries and Conservation
