

Required Report: Required - Public Distribution

Date: January 02, 2024

Report Number: ID2023-0032

Report Name: FAIRS Export Certificate Report Annual

Country: Indonesia

Post: Jakarta

Report Category: FAIRS Export Certificate Report

Prepared By: FAS Jakarta

Approved By: Jasmine Osinski

Report Highlights:

This report supplements information provided in the 2023 Indonesia FAIRS Country Report and updates the 2022 Indonesian FAIRS Export Certificate Report.

EXECUTIVE SUMMARY

The FAIRS Export Certificate Report lists the major export certificates and other requirements expected by the Government of Indonesia (GOI) from U.S. exporters of food and agricultural products. Information has been updated in Section III, Section IV, and Section V.

SECTION I. LIST OF MAJOR EXPORT CERTIFICATES REQUIRED

PRODUCTS	TITLE OF CERTIFICATES	ATTESTATION REQUIRED ON CERTIFICATE	PURPOSE	REQUESTING MINISTRY
Livestock & other animals genetics (semen, embryos, and poultry hatching eggs)	Certificate of Health	Please refer to the information in Section III.	To attest to compliance with the animal health requirements	Ministry of Agriculture
	Certificate of Origin	The certificate shall attest that the genetics product originates from the United States.	To attest to compliance with country-of-origin requirements, which is linked to the animal health status of the country of origin.	
	Pedigree Certificate	None	To attest to compliance with quality requirements (showing the superiority of the genetics product through the genealogy of the parents)	
Live poultry (day-old chicks)	Certificate of Health	Please refer to the information in Section III.	To attest to compliance with animal health requirements	Ministry of Agriculture
	Certificate of Origin	The certificate shall attest that the day-old chick originates from the United States.	To attest to compliance with country-of-origin requirements, which is linked to the animal health status of the country of origin	

PRODUCTS	TITLE OF CERTIFICATES	ATTESTATION REQUIRED ON CERTIFICATE	PURPOSE	REQUESTING MINISTRY
	Pedigree Certificate	None.	To attest to compliance with quality requirements (showing the superiority of the day-old chicks through the genealogy of the parents)	
Live large ruminants	Certificate of Health	Please refer to the information in Section III.	To attest to compliance with animal health requirements	Ministry of Agriculture
Certain food products of animal origin: 1. Milk 2. Eggs 3. Honey 4. Gelatin 5. Collagen 6. Tallow 7. Swallow Bird's Nest 8. Processed products thereof	Certificate of Origin	The certificate shall attest that the food product of animal origin originates from the United States.	To attest to compliance with country-of-origin requirements, which is linked to the animal health status of the country of origin	Ministry of Agriculture
	Veterinary Certificate (including USDA AMS Dairy Sanitary Certificate and U.S. FDA Certificate to a Foreign Government: Food for Human Consumption)	1. Product's compliance with animal and public health requirements and fitness for human consumption 2. Import recommendation number.	To attest to compliance with animal and public health requirements and fitness for human consumption	
	Certificate of Analysis	Product's laboratory testing results	Attesting the compliance with the quality requirements	
	Certificate of Free Sale	That the product is freely sold in the exporting country	Food safety	National Agency for Drug and Food Control (BPOM)

PRODUCTS	TITLE OF CERTIFICATES	ATTESTATION REQUIRED ON CERTIFICATE	PURPOSE	REQUESTING MINISTRY
	Halal Certificate	That the halal-required product was produced according to halal standards	To attest to compliance with Islamic religious halal standards (only for halal-required products)	Ministry of Religious Affairs and Ministry of Agriculture
Non-food products of animal origin	Certificate of Origin	The certificate shall attest that the non-food product of animal origin originates from the United States.	To attest to compliance with country-of-origin requirements, which is linked to the animal health status of the country of origin	Ministry of Agriculture
	Certificate of Analysis	Product's laboratory testing results	To attest to compliance with quality requirements	
	Veterinary Certificate	Product's compliance with animal health requirements	To attest to compliance with animal health requirements	
	Halal Certificate	That the halal-required product was produced according to halal standards	To attest to compliance with Islamic religious halal standards (only for halal-required products)	Ministry of Religious Affairs and Ministry of Agriculture
Pet food products (including milk replacers)	Certificate of Origin	The certificate shall attest that the pet food product originates from the United States.	To attest to compliance with country-of-origin requirements, which is linked to the animal health status of the country of origin.	Ministry of Agriculture
	Certificate of Analysis	Product's laboratory testing results	To attest to compliance with quality requirements	

PRODUCTS	TITLE OF CERTIFICATES	ATTESTATION REQUIRED ON CERTIFICATE	PURPOSE	REQUESTING MINISTRY
	Veterinary Certificate	1. Product's compliance with animal health requirements 2. Import recommendation number	To attest to compliance with animal health requirements	
	Halal Certificate	That the halal-required product was produced according to halal standards	To attest to compliance with Islamic religious halal standards	Ministry of Agriculture
Fresh, chilled, and frozen carcasses, meat, edible offal, and their processed products thereof (from poultry, cattle, and other livestock)	Sanitary Health Certificate (FSIS Meat & Poultry Export Certificate of Wholesomeness FSIS Form 9060-5)	Please refer to the information in Section III.	To attest to compliance with animal and public health requirements, and fitness for human consumption.	Ministry of Agriculture
	Halal certificate	That the halal-required product was produced according to halal standards	To attest to compliance with Islamic religious halal standards (only for halal-required products)	Ministry of Religious Affairs and Ministry of Agriculture
Feed ingredients of plant origin	Certificate of Origin	The certificate shall attest that the feed ingredients of plant origin originate from the United States.	To attest to compliance with country-of-origin requirements	Ministry of Agriculture
	Certificate of Analysis or Certificate of Quality	Product's laboratory testing results	To attest to compliance with quality requirements	
	Certificate of Weight	Shipped product's weight	To attest the shipment of the feed ingredients of plant origin is of a certain weight	

PRODUCTS	TITLE OF CERTIFICATES	ATTESTATION REQUIRED ON CERTIFICATE	PURPOSE	REQUESTING MINISTRY
(Complete) Feed	Certificate of Analysis or Certificate of Quality	Product's laboratory testing results	To attest to compliance with quality requirements	Ministry of Agriculture
	Certificate of Origin	The certificate shall attest that the complete feed originates from the United States.	To attest to compliance with country-of-origin requirements, which is linked to the animal health status of the country of origin	
	Self-statement/certification on ingredients used	In manufacturing the feed, the following ingredients were <u>not</u> used: 1. Feed ingredients of animal origin from animals given Antibiotic Growth Promotor (AGP), 2. Feed ingredients of animal origin from animals given synthetic hormones, 3. (For ruminant complete feed only) feed ingredients of ruminant origin 4. (For poultry and pig complete feed) urea	To attest product is free of AGP and synthetic hormones (for all types of complete feed), free of feed ingredients of ruminant origin (for ruminant complete feed only), and free of urea (for poultry and pig complete feed)	
Feed ingredients of animal origin	Health certificate	Please see the information in Section III.	To attest to compliance with animal health requirements.	Ministry of Agriculture

PRODUCTS	TITLE OF CERTIFICATES	ATTESTATION REQUIRED ON CERTIFICATE	PURPOSE	REQUESTING MINISTRY
	Certificate of Origin	The certificate shall attest that the feed ingredients of animal origin originate from the United States.	To attest to compliance with country-of-origin requirements, which is linked to the animal health status of the country of origin.	
	Certificate of Analysis or Certificate of Quality	Product's laboratory testing results	To attest to compliance with quality requirements	
Processed food products	Health Certificate	The certificate shall attest that the processed product is fit/safe for human consumption.	Food safety	National Agency of Drug & Food Control (BPOM)
	Certificate of Free Sale	The certificate shall attest that the processed product is freely sold in the exporting country.	Food safety	
	Halal Certificate	That the halal-required product was produced according to halal standards	To attest to compliance with Islamic religious halal standards (only for halal-required products)	Ministry of Religious Affairs
Plant Products	Phytosanitary Certificate	Please refer to the information in Section III.	Plant safety	Ministry of Agriculture
	For Wheat: - Bulk and containerized shipment: Certificate of Fumigation shall be	For Wheat: Phytosanitary certificate must contain a declaration stating that " <i>This consignment is in</i>	For Wheat: To comply with Phytosanitary requirement for imports of wheat grain (<i>triticum aestivum</i>) into the

SECTION II. PURPOSE OF SPECIFIC EXPORT CERTIFICATES

Please refer to the “Purpose” column in the matrix under Section I.

SECTION III. SPECIFIC ATTESTATION REQUIRED ON THE EXPORT CERTIFICATE

Livestock & Other Animals Genetics (Embryos and Semen)

The attestation required on the health certificate can be seen at this [link](#).

Poultry (day-old chick and hatching eggs)

The attestation required on the health certificate can be seen at this [link](#).

Live large ruminants

The attestation on the health certificate shall include the status and situation of infectious animal diseases in the country of origin and on the farm/registered premises/approved premises, as well as the individual animal's health status. In addition, the Ministry of Agriculture's import recommendation number should be included in the health certificate that will accompany each live large ruminant. The import recommendation for feeder cattle/buffaloes, breeding cattle/buffalo heifers, and productive bulls shall be valid for 12 months after the date of its issuance.

Carcass, Meat, Edible Offal, and Their Products

Attestation on health certificates vary depending on the animal origin of the product as follows:

Products from large ruminants

- The country of origin is free of foot-and-mouth disease (FMD), Rift Valley Fever (RVF), Contagious Bovine Pleuropneumonia (CBPP), and Bovine Spongiform Encephalopathy (BSE).

Products from small ruminants

- The country of origin is free of FMD, RVF, Sheep and Goat Pox, Peste des Petits Ruminants (PPR), and Scrapie.

Products from swine

- The country of origin is free of FMD, Classical Swine Fever (CSF)/Hog Cholera and African Swine Fever (ASF).

Products from poultry

- The country of origin is free of Highly Pathogenic Avian Influenza (HPAI) disease.
- At least 90 days prior to shipment, within a 50 km radius, the country of origin has been declared without outbreak of Newcastle Disease (ND), Duck Viral Hepatitis (DVH), and Duck Viral Enteritis (DVE).

Each shipment of product should be accompanied by the appropriate health certificate (FSIS Meat & Poultry Export Certificate of Wholesomeness Form 9060-5). Please note that beginning March 6, 2023, the FSIS Meat & Poultry Export Certificate of Wholesomeness will be digitally signed. A sample of this certificate can be found in Appendix I.

FSIS Meat & Poultry Export Certificate of Wholesomeness (Form 9060-5) should contain the following information in the remarks section:

- The number from the Ministry of Agriculture's (MOA) import recommendation (see [MOA Regulation No. 15/2021](#))
- The full sixteen-digit number from the Ministry of Trade's (MOT) import license (see [MOT Regulation No. 25/2022](#) in Indonesian language)
- The issuance date of the import license.

For more information on documentation requirements for exporting meat and meat products to Indonesia, please refer to the [FSIS Export Library](#).

Feed Ingredients of Animal Origin

Based on the Regulation of the Minister of Agriculture Number 15 Year 2021, these statements must be included in the health certificate issued by the country of origin:

A. For rendered products of ruminant origin:

1. that the ruminants used as the raw material are healthy, raised in the country of origin and have never been fed feed containing ingredients of animal origin all of their life;
2. that the ruminants used as the raw material have passed ante- and post-mortem examinations;
3. that the ruminants used as the raw material are not showing any Bovine Spongiform Encephalopathy (BSE) symptoms;
4. that the ruminants used as the raw material are originated from slaughterhouses accredited by and registered with the authorized institution of the country of origin, and under routine supervision of the veterinary authority of the country of origin;
5. that the ruminants used as the raw material can be traced back to the farm, slaughterhouse, and processing facility;
6. that the rendered product is not contaminated by porcine and non-domesticated ruminants' materials;
7. that the rendered product is processed in such a way that inactivates or kills *Clostridium* spp., *Salmonella* spp., *Escherichia coli*, *Bacillus anthracis* bacteria, with precautions taken against recontamination; and
8. that the rendered product has obtained assurance from the authorized veterinary authority, for countries with "Controlled BSE Risk" status, which declares the Meat and Bone Meal does not contain Specific Risk Material (SRM)/SRM-removed Meat and Bone Meal.

B. For rendered products of poultry origin:

1. that the poultry used as the raw material are healthy, bred, and raised in the country of origin;
2. that the poultry used as the raw material are free from Avian Influenza (AI) disease;
3. that the poultry used as the raw material are not contaminated with porcine and other animals' materials other than poultry;
4. that the poultry used as the raw material are originated from poultry slaughterhouses accredited by and registered with the authorized institution of the country of origin, and under routine supervision of the veterinary authority of the country of origin;
5. that the poultry used as the raw material can be traced back to the farm, slaughterhouse, and processing facility; and
6. that the rendered product is processed in such a way that inactivates or kills *Clostridium* spp., *Salmonella* spp., *Escherichia coli*, *Bacillus anthracis* bacteria, with precautions taken against recontamination.

Fresh Fruits and Vegetables

- The plant quarantine service from the country of origin and transit country must issue phytosanitary certificates.
- Fresh fruits and vegetables from California do not need pre-treatment. However, the additional declaration of the phytosanitary certificate for California horticultural products

must state that the imported fruits/vegetables have been produced within a pest infestation free area.

- To date only production areas in the State of California have been declared by the GOI to be free from *Ceratitis capitata*, *Anastrepha fraterculus*, *Anastrepha ludens*, *Anastrepha obliqua*, *Anastrepha serpentine*, *Anastrepha suspense*, *Rhagoletis cingulate*, *Rhagoletis fausta*, and *Rhagoletis pomonella* infestation. Fruits and vegetables from other states must be treated prior to shipment (including fumigation, vapor heat treatment (VHT), and irradiation) or in-transit (cold treatment with temperatures appropriate for fresh fruit and vegetables) whenever the commodities originate from a production area where the regulated quarantining for fruit flies is known to have occurred. The approved treatment shall be explained in the Phytosanitary Certificate under the Treatment Information column. For in-transit cold treatment, a temperature record must be attached to the Phytosanitary Certificate. A list of fresh fruits and vegetables, fruit fly names, and treatments is included in the appendix of MOA regulation No. 42/2012.
- Fruits and vegetables must be packed in carton boxes and transported as containerized cargo.

On December 1, 2020, the GOI extended the recognition of the U.S. food safety control system of fresh foods of plant origin (FFPO) through MOA Decree No. 771/KPTS/KR.050/M/12/2020. This decree came into effect on January 5, 2021 and is valid for 3 years. FFPO recognition simplifies the export process, eliminating the need for laboratory testing for exports of 88 U.S. fruits, vegetables, and other plant origin products. In addition, only FFPO products that originate from countries that have food safety systems recognition or labs registered with Indonesia can enter the country through the port of Jakarta. A full list of these commodities, as described in MOA decree No. 771/2020, can be seen in the [2022 FAIRS Country Report](#).

Fish and Fishery Products

Under the Ministry of Marine Affairs and Fisheries (MMAF)'s regulation No. 11/2019, the GOI has issued requirements for importing fish and fisheries products. A health certificate for fish and fisheries products and a certificate of origin are required, along with other certificates, such as a copy of the quarantine installation certificate and catch certificate, as well as the Certificate of Analysis for the importation of other fisheries materials (i.e., carrier media other than fish that have the potential to spread quarantine fish pests and diseases). A health certificate sample is included in [Appendix I](#) of this report.

Wheat

On October 11, 2023, the Indonesian Quarantine Agency (IQA) stipulated a letter number B-2127/KR.020/K.3/10/2023 on new wheat import procedures. The letter states that:

1. Indonesia is importing wheat from Argentina, Australia, Bulgaria, Canada, Denmark, France, India, Lithuania, Moldova, Pakistan, Russia, South Korea, Ukraine, the United States, and Paraguay.
2. Based on risk analysis results and evaluation of the importation of wheat from the above countries, it is noted that wheat grains pose high potential to become carriers of fungi and insects, i.e. *Tilletia spp.*, *Sitophilus granaries*, and *Trogoderma granarium*.
3. In order to manage risks regarding imports of wheat grain, the import of wheat grain must

be carried out by importers who have production facilities to ensure the prevention of the entry and spread of quarantine plant pest organisms (OPTK, *Organisme Pengganggu Tanaman Karantina*) that have the potential to be carried on wheat grain:

- a. Heat treatment at 80 centigrade to free wheat grains from *Tilletia* spp.
 - b. The company has procedures for unloading and transporting wheat grains that ensure that the wheat grains are not scattered, including using a conveyor belt or packing them in plastic jumbo bags or bulk in containers.
4. Related to no.3:
- a. Head of the Quarantine Technical Implementation Unit must inform IQA of the list of wheat grains importers which have been designated as a Plant Quarantine Installation (IKT) to be included in the list of wheat seed importers into Indonesian territory.
 - b. Inform wheat grain importers who have not been designated as IKT to submit an application for IKT determination online to the Indonesian Quarantine Agency by paying attention to point 3.
 - c. Carrying out quarantine measures and monitoring the import of wheat grain into Indonesian territory in accordance with the phytosanitary requirements for the import of wheat grain as attached.

The letter also stated that the production area of wheat intended for export into Indonesia shall implement Good Agricultural Practices (GAP), including the monitoring and investigation of pest and diseases of concern to Indonesia and necessary chemical and biological control measures. The wheat production area must be registered by the competent authority in the exporting countries. The registration information shall include the name, identification code, and address of the production field to trace back in the case of non-compliance. Wheat imported into Indonesia must fulfill the requirements in Indonesia's food safety regulation for Fresh Food of Plant Origin (FFPO).

Please also see Appendix I in GAIN Report [ID1456](#) for the following sample documents:

Sample "Certificate of Poultry Meal and Feather Meal of Avian Origin"

Sample "Certificate of Origin for Dairy Products"

Sample "Certificate of Quality of Poultry by Product Meal"

Sample "Sanitary Certificate for Dairy Products"

Sample "Health Certificate of Pet Food"

Sample "Health Certificate of Egg Products"

Sample "Statement Letter of Ineligible Phytosanitary Certificate"

Sample "Export Certificate of Processed Plant Products"

Sample "Halal Export Certificate"

Example of Prior Notice

Sample "Declaration of Conformity and Table of Product List"

Sample "State Apostille"

Sample "Letter of Authorization"

Sample "Fish Certificate of Origin"

Appendix I in this report shows samples of the following documents:

Sample “Meat and Poultry Export Certificate of Wholesomeness” (digitally signed)

Sample “Phytosanitary Certificate for California Horticultural Products”

Sample “Phytosanitary Certificate of Horticultural Products from States other than California”

Sample “Health Certificate of Fish and Fishery Products”

Sample “FDA’s Certificate to a Foreign Government”

SECTION IV. GOVERNMENT CERTIFICATE LEGAL ENTRY REQUIREMENTS

1. Health certificates for products of animal origin:
 - must accompany the commodities at the time of entry. If the commodities are transported by vessel, the certificate should be sent earlier to the quarantine officer at the port of entry.
 - must be issued by a veterinarian authorized by the U.S. Department of Agriculture and endorsed by an APHIS/Veterinary Services (VS) veterinarian.
 - applies to only one shipment. must include the full sixteen-digit GOI import license number and the issuance date of this import license, as well as the import recommendation number.
 - State-issued certificates will be accepted by the Indonesian government (GOI). However, the GOI requires that a standard certificate form be used, including institution logo/symbol, health certificate number, consistency on whether handwritten or typed, and consistent paper size and weight. If possible, GOI would like to obtain the certificate electronically to make it easier for checking certificate validity and releasing the commodity faster.
 - Export declarations by suppliers or manufacturers as proof of compliance are acceptable.
2. Phytosanitary certificates should be in accordance with recommendations of the International Plant Protection Convention (IPPC). Additionally, fumigation certificates are required for products that are considered as a vector of disease, such as soybeans and corn.
3. BPOM requires Certificates of Free Sale for processed food products and food additives. However, they accept the FDA’s Certificate to a Foreign Government, as long as there is a statement attesting the product is fit for human consumption or is sold freely in the United States, or “Certificate of Free Sale” is included in the title of the letterhead. For more information on the certificate, please visit the [FDA’s website](#).
4. Meat and meat products
 - a) The imported meat should be shipped directly from the country of origin to the port of entry in Indonesia unless prior approval is obtained from the Ministry of Agriculture.
 - b) The food contact materials for packing meat must be from the country of origin, display a label, be constructed from food grade materials, and be non-toxic.

- c) During transportation, meat and meat products with halal certificates should be kept separate from non-halal products.
 - d) Frozen meat products must be transported in a container with a stable temperature between -18° to -22° C).
5. Fresh fruits and vegetables:
Phytosanitary certificates must be issued by the plant quarantine service from the country of origin and the transit country.
6. The GOI requires phytosanitary certificates for processed plant products. However, if the competent authority in the exporting country is unable to issue the certificate (shown by a statement letter from the authority in the country of origin), the GOI can accept the export certificate for processed plant products with an explanation of the treatment for the products in the certificate. In addition, the statement letter should also include the address of the authorization office.
7. Based on the Halal Product Assurance Law No. 33/2014, all food and beverage products that are distributed and traded in Indonesia will need to be halal certified. Law 33/2014 came into force on October 17, 2019, beginning a five-year grace period. All food and beverage products must be in compliance with the new law by October 17, 2024. An unofficial English translation of the list of products that require halal certification can be found [at this link](#), and a list of materials that do not require halal certification can be seen [at this link](#).
8. According to Government Regulation No. 39/2021 regarding the Organization of Halal Product Assurance, imported raw materials, food additives, food processing aids, and slaughtering products can obtain their halal certificates from foreign Halal Certifying Bodies (HCB) that have been recognized by the GOI's Halal Product Assurance Organizing Agency (BPJPH). However, their halal certificates must be registered with BPJPH before the products can be sold in Indonesia.

For this foreign halal certificate registration, the importer and/or their official representative must apply directly to BPJPH in writing by attaching:

- a) the applicant data;
- b) a list of products that will be imported into Indonesia, including HS codes;
- c) a statement letter that attests the submitted document is accurate and valid.

After BPJPH examines the document and deems it valid and complete, BPJPH will register the foreign halal certificate and issue the registration number. The importer or their official representative must attach the registration number adjacent to the halal label on product packaging or on certain parts/areas of the product.

The foreign halal certificate registration must contain the following information:

- a) name of the HCB;
- b) foreign halal certificate registration number;
- c) applicant data;

- d) name of registered product;
- e) validity period of foreign halal certificate;
- f) signature of the Head of BPJPH; and
- g) unique identity code.

The validity period of foreign halal certificate registration is adjusted to the validity period of the foreign halal certificate. The foreign halal certificate registration must be renewed by the importer or the official representative three months prior to the expiration of the foreign halal certificate registration.

Indonesian import regulations do not require separate individual halal certificates for each shipment, although port quarantine officers encourage exporters and importers to submit the original halal certificate to quarantine headquarters and to attach a copy with each shipment. Post recommends that exporters contact their halal certifying body directly to determine if they require certification for each shipment.

SECTION V. OTHER CERTIFICATION/ACCREDITATION REQUIREMENTS

1. Any entry of animals, materials of animal origin, or products made of materials of animal origin are subject to the following conditions:
 - a) Importers must obtain an import license from the Ministry of Trade. The license is valid for 6 months from the issuance of an import recommendation.
 - b) The import license for live animals, animal products, and processed animal products that possess a risk of zoonosis spread will be released after obtaining an import recommendation (SRP) from the Ministry of Agriculture. The Minister of Agriculture delegates authority on the issuance of SRP to the Directorate General of Livestock and Animal Health Services. Import recommendations can be applied for at any time but must be used to apply for an import license to the Ministry of Trade within 3 months after its issuance.
 - c) The import license for processed animal products will be released after obtaining a recommendation from the Head of the National Agency of Drug and Food Control.
 - d) Shipments must be accompanied by a Certificate of Origin declaring that the animals, materials of animal origin or their products came from an area known to be free from Category I quarantine diseases and acknowledged by a GOI authorized official if originating from abroad.
 - e) Importation must be made through designated points of entry.

Note: In 2022, Indonesia began implementing a new commodity balances policy for beef import licenses which became valid for one year.

2. An increasing number of key commodities are subject to Indonesia's new commodity balance policy which requires import licenses to be issued on the basis of a non-transparent economic formula that determines the gap between national supply and national demand. Under the new policy, once a year, importers must submit their "Needs Plans" for the following year which will be verified and approved by the ministry overseeing the commodity. In the case of beef, one of the first commodities subject to this

policy, the commodity balance policy replaced the Import Recommendation requirement with a Letter of Consideration issued by the Ministry of Agriculture through the online National Commodity Balance System (SINAS NK). Implementation of the commodity balance policy began in 2022 with beef, fish, rice, salt, and sugar. In 2023, the policy will also apply to 19 additional commodities, including alcoholic beverage raw materials, corn, and saccharin and cyclamate, and garlic.

3. Certificate of origin can be issued by the secretary of the state, chamber of commerce, or notary public.
4. Prior to import, seed importers must request an import license from the Ministry of Agriculture (DG of Horticulture, DG of Food Crops, DG of Estate Crops, or DG of Livestock and Animal Health Service, depending on the seed category) through the MOA's Center for Plant Variety Protection and Agriculture Licensing. A copy of the request must also be sent to the Agriculture Quarantine Agency. The license is valid for 6 months.
5. Processed products must be registered with BPOM. Product registration requires a letter of appointment from the processed food producer. This letter can be submitted to BPOM directly by an Indonesian distributor. These documents shall be properly notarized and accompanied by a document which verifies that the company is a legal entity in the United States (e.g., a certificate origin from the Chamber of Commerce).
6. An entry license (SKI) from the Head of BPOM is required for every shipment of imported processed foods, raw food materials, food additives, processing aids, and food ingredients. SKI applications can be submitted online at <https://e-bpom.pom.go.id>.
7. In addition, to prove that the Good Processed Food Production Method (CPPOB) has been applied to the processed food product, a certificate of Good Manufacturing Practice (GMP) or Hazard Analysis and Critical Control Points (HACCP) or ISO 22000 or Risk Management Program (PMR) or a similar certificate, which is issued by the authorized or accredited institution and/or from the local government audit result, is required.
8. Other certificates needed for certain food products, including raw materials and food additives, are as follows:
 - a) Composition analysis certificates from producers (per batch) or from accredited laboratories. The certificate must be original and valid for maximum 12 months.
 - b) A Genetically Modified Organism (GMO) or non-GMO statement for food containing potatoes, soybeans, corn, tomatoes and their derivative products (including food additives). However, if the derivatives have undergone further refining processes to the point where the GE material cannot be identified (such as: oils, fats, sucrose, and starch), they do not require any GMO or non-GMO statements.
 - c) Aflatoxin analysis result for nuts and peanut products.
 - d) Halal certificate for products that indicate Halal logo on the label.
 - e) Indonesian National Standard (SNI) certificate and Potassium Bromate (KBrO₃)

- Free Certificate for wheat flour.
- f) Radiation free certificate for products originating from Japan and dairy products originating from Europe.
 - g) 3-Monochloro Propandiol (3-MCPD) residue analysis result for isolated soy protein, soy sauce, and hydrolyzed vegetable protein.
 - h) Original document listing production date and expiration date, as well as batch number/lot number/production code.
 - i) Products with short shelf life, such as: milk and milk products, and other high-risk foods, should have at least 2/3 of shelf life remaining at time of the entry license (SKI) application date.
 - j) The SNI certificate for bottled water, cocoa powder, refined sugar, and salt.
 - k) Melamine analysis results for raw material that is suspected of containing melamine, such as: milk, flour, vegetable protein, egg and its processed products, and for food additives (ammonium bicarbonate).
 - l) Chloramphenicol analysis results for honey.
 - m) Formalin analysis results for products suspected of containing formalin.
9. Sudan Red analysis results for Oleoresin Capsicum products. In addition to submitting a phytosanitary certificate, the commodities that are imported from FFPO recognized countries must submit prior notice. Prior notice is a statement letter regarding the identity of the FFPO that must be completed by the producer or exporter in the country of origin. Prior notice, which must be submitted [online](#), should be issued prior to the FFPO product arriving in Indonesia. Prior notice, which accompanies the consignment, must indicate the date and place of loading, date and place of arrival/destination, type of transportation, product name, quantity imported, country of origin, packing unit, import purpose and container's identification number. Additional information regarding FFPO import procedures can be found in GAIN Report [ID1637](#).
10. According to Ministry of Trade (MOT) Regulation No. 25/2022, the MOT continues to require rice, sugar, garlic, horticultural products (i.e., potato, onion, shallot, carrot, banana, pineapple, mango, mangosteen, orange, mandarin, grapefruit, lemon, lime, clementine, grape, melon, papaya, apple, durian, dragon fruits, chili, longan), processed foods, herbs, and supplements entering Indonesia to be verified by Indonesian surveyors and/or their authorized agents in the country of origin. This verification is not a food safety and/or quarantine inspection, but rather a way for the MOT to oversee the completeness and correctness of import documents, product accountability, and the physical condition of the products.
11. Based on Ministry of Maritime and Fishery (MOMF) Regulation No. 11/2019, in addition to a health certificate and certificate of origin (COO), imported fish and fishery products must also be labeled (for packaged form) or accompanied by an invoice/packing list (for bulk form). The products must also include a copy of a certificate of quarantine installation. Additionally, a catch certificate from the authority agency at the origin country is required and must be validated by the Embassy of the origin country in the importing country.

12. The import of processed food for special nutrition needs such as: complementary food of breast milk, food specially formulated for athletes, human milk fortification, and food for weight loss programs, must be accompanied by a certificate that proves the product complies with good manufacturing practices for processed food, issued by the competent authority in the country of origin which has a Mutual Recognition Agreement with the GOI.
13. In addition to a health certificate or certificate of free sale issued by the competent authority in the country of origin, imported organic food must also be accompanied by a transaction certificate, that is issued by the National Accreditation Committee (KAN)'s approved Organic Certification Institute (LSO). This LSO certifies the business unit in the country of origin. The LSO can be a local or foreign institute that resides in Indonesia.
14. Besides a certificate of free sale, imported alcoholic beverages also require the following documents to register the products with BPOM;
 - An appointment letter that is validated in the country of origin by a Public Notary or Chamber of Commerce or the Indonesian Embassy in that country.
 - Certificate of HACCP/ISO 22000/GMP/ Food Safety
 - A production flow chart; ingredients info; label design; front and back label; batch code/lot number/production code.
15. For imported animal-based food products, i.e.: dairy, eggs, honey, gelatin, collagen, tallow, swallow nests, and their products, the certificate of analysis must be issued by an accredited laboratory in the country of origin. In addition, if the imported animal-based food product is exported to Indonesia for the first time, the certificate of origin and veterinary certificate can be replaced by a stamped statement letter.

APPENDIX I. SAMPLE CERTIFICATES

Sample of digitally signed “Meat and Poultry Export Certificate of Wholesomeness”

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0583-0153. The time required to complete this information collection is estimated to average 25 minutes per response, including the time for reviewing instruction, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

U.S. DEPARTMENT OF AGRICULTURE FOOD SAFETY AND INSPECTION SERVICE Meat and Poultry Export Certificate of Wholesomeness		A knowingly false entry or false alteration of any entry on this certificate may result in a fine of not more than \$10,000 or imprisonment for not more than five years or both (18 U.S.C. 1001). Additional penalties exist under the Federal Meat Inspection Act (21 U.S.C. 611(b) (1), (2); and (5), 21 U.S.C. 461) for an unauthorized or false alteration or misuse of this certificate.
