

Required Report: Required - Public Distribution

Date: April 22, 2025

Report Number: MY2025-0002

Report Name: FAIRS Export Certificate Report Annual

Country: Malaysia

Post: Kuala Lumpur

Report Category: FAIRS Export Certificate Report

Prepared By: Katherine McBride

Approved By: Timothy Harrison

Report Highlights:

This report provides information on the export certification requirements of the Government of Malaysia. This report supplements the Malaysia Food and Agricultural Import Regulations and Standards (FAIRS) – Country Report 2025.

DISCLAIMER

This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Kuala Lumpur, Malaysia, for the U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped.

FINAL IMPORT APPROVAL OF ANY PRODUCTS IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

Executive Summary

This report provides information on the export certification requirements of the Government of Malaysia.

Note: This report includes certificates for some products that may not currently be eligible for export to Malaysia. For example, poultry products, day old chicks, and live cattle all currently face restrictions related to avian influenza. As always, U.S. exporters should work closely with their importer to ensure that import permits and other requirements are in place.

Section I. List of All Export Certificates Required by Malaysia:

Product(s)	Title of Certificate	Attestation Required on Certificate	Purpose	Requesting Ministry
(1) Milk and Milk products	Sanitary Certificate for Exports from USDA, Agricultural Marketing Service Halal Export Certificate Additional certificate for soft cheeses: Certificate of Analysis for Listeria Monocytogenes by Competent Authority of the Exporting Country	Please refer to Section III: Specific Attestations Required on Export Certificate(s)	Health & Veterinary Halal Certification	Ministry of Agriculture, Malaysia & Ministry of Health, Malaysia Department of Islamic Development Malaysia (JAKIM)

Section II. Specific Attestations Required on Export Certificate(s)

For milk and milk products, day-old chicks and horses, please see below.

1. Milk and Milk Products

A. Required Attestation on the Veterinary Health Certificate:

- The country of origin or part of country or state of origin has been free from foot-and-mouth disease and rinderpest for the past twelve (12) months prior to and up until the date of export.
- The milk or milk products were derived from herds/flocks that have been kept in the country in the preceding twelve (12) months prior to export.
- The farm of origin has been certified free from tuberculosis and brucellosis by the Veterinary Authority of the exporting country.
- The animals were found to be healthy and free from any clinical signs of infectious or contagious diseases (including ectoparasites) at the time of milking.
- The milk or milk products were processed and packed in a plant that has been approved for export by the competent authority of the exporting country (the name, address and establishment number of the plant as well as batch/lot number and date of production must be clearly stated in the certificate).
- The milk or milk products were processed, packed and stored under sanitary conditions and do not contain any preservatives, coloring matter, residue or any foreign substance or harmful material injurious to health and that every precaution had been taken to prevent contamination during the processing, packing, storing and handling prior to export.
- In the case of milk or cream for human consumption, the milk used has been treated by ultra-high temperature (UHT) at a minimum of 132 degrees C for at least 1 second or by simple high temperature short time pasteurization (HTST) at 72 degrees C for at least 15 seconds for milk with pH less than 7.0 or double HTST for milk with pH 7 or over.

- Milk for animal consumption has been subjected to either double HTST or in case of simple HTST or UHT, this was combined with either physical treatment to maintain pH 6 for at least 1 hour or additional heating to at least 72 degrees C combined with desiccation.
- In the case of milk or milk products intended for human consumption; that the milk or milk products destined for export to Malaysia are wholesome and fit for human consumption.
- In the case of milk or milk products intended for purposes other than for human consumption, the product should be clearly identified and labeled (in RED) as "unfit for human consumption" or "not for human consumption" or "for animal use only" or "animal feeds" or "stock feeds".

B. Required Sanitary Certificate for Export Attestation:

- The exporting country is free from Foot-and-Mouth Disease and Rinderpest.
- The product was manufactured in facilities inspected and approved by the competent authority and subjected to regular audits or inspections aimed at ensuring that the processing is properly and hygienically carried out, to produce a product that is fit for human consumption.
- The product was manufactured from milk that received a pasteurization treatment or adequate safeguards have been taken with the aim of avoiding public health hazards arising from pathogenic organisms associated with milk.
- The product contains no harmful levels of contaminants.

Day-old chicks

A. Required Veterinary Health Certificate Attestations:

- The country or part of country or state of origin has been continuously free from Newcastle Disease and fowl plague for the past twelve (12) months prior to and up until the date of export.
- The chicks were hatched from eggs derived from a registered farm which is accredited to be free from Salmonella pullorum, Salmonella enteritidis, Salmonella gallinarum and Salmonella typhimurium, and no case of fowl cholera, infectious bronchitis, infectious laryngotracheitis, infectious bursal disease, Marek's disease, egg drop syndrome, swollen head syndrome, avian encephalomyelitis, salmonellosis or mycoplasmosis had been diagnosed or occurred on the farm in the preceding six (6) months prior to export.
- The chicks were hatched in a hatchery approved by the veterinary authority of the country of export and that no eggs from any other farms have been hatched in the same incubator at the same time.
- The eggs and incubators used in the hatchery have been fumigated and disinfected prior to incubation.

- The chicks were packed direct from the incubator in the hatchery into satisfactory clean and new disposable boxes for export and had no contact with any bird other than day-old chicks originating from the same hatchery.
- The day-old chicks destined for export to Malaysia have not been vaccinated against any disease except Marek's disease, using a vaccine that is approved by the veterinary authority of the exporting country.
- The day-old chicks destined for export to Malaysia have been examined by a registered veterinarian and found to be healthy and free from any clinical sign of infectious or contagious disease at the time of export.

3. Horses

A. Required Veterinary Health Certificate Attestation:

- The country or part of country or area/farm of origin has been free from African horse sickness, Western, Eastern, and Venezuelan equine encephalomyelitis for the past two (2) years immediately preceding the date of export, and no vaccination is permitted in the country against African horse sickness.
- The country or part of country or area/farm of origin has been free from glanders for the past twelve (12) months prior to date of export or the animals have been tested with mallein with negative result(s) within 10 days immediately preceding export.
- The country or part of country or area/farm of origin has been free from trypanosomes for the past twelve (12) months immediately preceding the date of export or the animals have been tested for trypanosomes by inoculation of whole blood into mice/rats and examined by Giemsa stained blood smears every alternate day for a period of twenty-eight (28) days with negative results.
- The country or part of country or area/farm of origin has been free from contagious equine metritis for the past twelve (12) months immediately preceding the date of export or the animals have never been mated and are gelded, or the animals have been tested for the causal agent of contagious equine metritis by bacterial culture with negative results.
- The animals have been kept in an area or farm where no cases of equine encephalomyelitis, vesicular stomatitis or equine viral arteritis occurred for the past twelve (12) months.
- The animals have been examined within forty-eight (48) hours of export and found to be healthy and free from clinical signs of any infectious or contagious disease including glanders, epizootic lymphangitis, ulcerative lymphangitis, dourine, horse-pox, sarcoptic mange, influenza, ringworm, strangles, infectious equine anemia, equine encephalomyelitis, vesicular stomatitis and equine viral arteritis.

- The country or part of country or area/farm of origin has been free from equine infectious anemia and equine viral arteritis for the past twelve (12) month prior to date of export or the animals have been tested in the laboratory approved by the government authority for the following diseases;
 - a) Equine infectious anemia by immunodiffusion (Coggins) test with negative results within 30 days preceding export; and
 - b) Equine viral arteritis by serum neutralization test with negative results at dilution of 1 in 4 within 10 days preceding export.
- The animals have not been vaccinated with any vaccine within one (1) month of the date of shipment.

4. Live Cattle

A. Required Veterinary Health Certificate Attestation

- The country has been free from food and mouth disease, rift valley fever, contagious bovine pleuropneumonia, and hemorrhagic septicemia for the past twelve (12) months prior to and till the date of export.
- United States has been classified by the WOAH as a country with negligible bovine spongiform encephalopathy (BSE)
- The animals were kept for the 20 days prior to shipment in an establishment where no case of anthrax was officially declared during that period.
- With regard to the bovine genital campylobacteriosis, the animals; are virgin heifers; or the animals were kept in a herd in in which no case of bovine genital campylobacteriosis has been declared, and for animals which have been mated, the culture of the vaginal mucus for the presence of the causal agent of bovine genital campylobacteriosis proved negative.
- The animals originate from a herd free from infection with M. tuberculosis complex and have been tested using tuberculin test for infection with M. tuberculosis complex with negative results within 30 days prior to shipment.
- The animals were subjected to a diagnostic test for bovine anaplasmosis with negative results during 30 days prior to shipment and were treated with an acaricide and, if necessary, a repellent against biting insects prior to shipment and were completely free of ticks.
- The animals shall be vaccinated against infectious Bovine Rhinotracheitis Bovine Viral Diarrhea not more than one (1) month prior to export.

Section III. Government Certificate's Legal Entry Requirements

Dairy:

Each consignment of milk or milk products must be accompanied by a veterinary health certificate dated within seven (7) days of export and signed or endorsed by a competent veterinary officer of the veterinary authority of the country of export.

All cheese made from unpasteurized milk and all soft/semi soft cheese made from pasteurized milk imported into Malaysia must be accompanied by a Health Certificate and Certificate of Analysis (*Listeria monocytogenes*).

Day-Old Chicks:

Each consignment of day-old chicks shall be accompanied by a veterinary health certificate dated within thirty (30) days of import and signed or endorsed by a competent veterinary officer of the veterinary authority of the country of export.

Horses:

The consignment of animals (horses) shall be accompanied by a veterinary health certificate issued by a competent veterinary officer of the veterinary authority of the country of export.

Fish:

Each consignment of fish and seafood products shall be accompanied by a health certificate issued by a federal or state health agency.

Tree Nuts:

Each consignment of tree nuts shall be accompanied by a Phytosanitary Certificate issued by agencies in charge of quarantine in the exporting country/state.

Live Cattle:

The consignment of animals shall be accompanied by a valid import permit issued by the Malaysian Quarantine and Inspection Services (MAQIS) permitting the importation of such animals in Peninsular Malaysia with full description of identification of the animals. The animals shall be tagged with visual tag for identification and traceability and accompanied by an official export health certificate that is valid for 30 days from the date of issuance.

Section IV. Other Certification/Accreditation Requirements

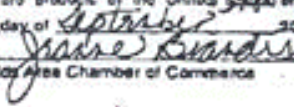

For further details on food export requirements in the Malaysian market, please refer to the FAS/Malaysia Food and Agricultural Import Regulations & Standards Country Report, Exporter Guide, Food Ingredients and Retail Report at the following link: <http://www.fas.usda.gov/>

Radiation

Malaysia monitors food safety issues, including radiation, through inspections at international entry points.
