Section II: Specific Attestation Required on Export Certificate 8

Section III: Government Certificate Legal Entry Requirements 8

Section IV: Other Certification/Accreditation Requirements to Ensure Market Entry 10

Appendix I 11

DISCLAIMER: This report was prepared by the OAA Port-au-Prince for U.S. exporters of domestic food and agricultural products. While every possible care has been taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. FINAL IMPORT APPROVAL OF ANY PRODUCTS IS SUBJECT TO THE IMPORTING COUNTRY’S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

Executive Summary

This report addresses the certificates required by the Government of Haiti to authorize the entry of food and other agricultural products in Haiti. There are no major changes in the requirements for imported food to Haiti.

Section I: List of all Export Certificates Required by Haiti and the Products They Cover

Haiti has several documentation requirements for imported food and agricultural products. Such requirements include those related to quality, quarantine, origin, and import control and can vary between products and product categories. However, it is highly recommended that U.S. exporters ensure that all necessary customs clearance requirements have been verified with local authorities and to work closely with Haitian importers to be informed of changes.

Export Certification Requirement Examples:

The following provides a sample of products and certification requirements. Please note that not all sample copies of attestations are available, as they differ for each product and are subject to change. Updates to links for government certificates and other resources remain limited.

Purpose of Specific Export Certificate

To import food and agricultural products into Haiti, the importer must supply a different set of documents depending upon the category of the product being imported. Those documents include certificate of origin, phytosanitary certificate, zoo sanitary certificate, certificate of weight and quality, insurance certificate, and laboratory certificate. The purpose and the requesting ministry for each document are listed in Table A above by category, including all food products, plant and plant products, bulk products, seeds, seedlings, ornamental plants, processed food, animal and animal products, fresh and frozen meat, table eggs and fertile egg, fishery products, and dairy products.

Section II: Specific Attestation Required on Export Certificate

Each category of products requires specific attestation related to Haitian health and quarantine measures applied by the government of Haiti. Controlled agricultural products can be imported if the sanitary certificate testifies to the absence of pest, disease, and banned treatment processes related to the category of product. The specific attestation of each document is listed above by category. For additional information, review Post's 2025 FAIRS Country Annual report.

Section III: Government Certificate Legal Entry Requirements

The original certificate must accompany each shipment at the port of entry for all categories of products. Haiti does not require a certificate of free sale. All certificates listed above are applied to one shipment. Sanitary certificates for plant/plant products and animal/animal products are valid for three months and are part of the documentation required to export those products into Haiti. A supplier's or manufacturer's export declaration or a U.S. state-issued export certificate are accepted as additional documents but cannot substitute official documents.

Table B: Government Certificate Legal Entry Requirements

Title of Certificate	Does the original certificate need to accompany the product at the time of entry?	How long is the certificate valid? Can certificate be applied to multiple shipments?	Will the country accept a Supplier's or Manufacturer's Export Declaration as proof of compliance?	Will the foreign country accept a U.S. state- issued export certificate?	Will the country derogate export certificates? Which certificates? How do you apply?
Certificate of origin	Yes	3 months, but are valid only once to facilitate one shipment entry	Yes, this is required in addition to other required certificates listed in Table A	Yes, this is required in addition to other required certificates listed in Table A	Yes, the country may derogate a certificate that does not comply with the requirements on a case by case basis
Phytosanitary certificate	Yes	”	”	”	”
Certificate of weight and quality	Yes	”	”	”	”
Insurance certificate	Yes	”	”	”	”
Laboratory certificate	Yes	”	”	”	”
Sanitary certificate	Yes	”	”	”	”

Section IV: Other Certification/Accreditation Requirements to Ensure Market Entry

According to shipping sources, Haitian authorities indicate that radioactive type commodities are restricted; therefore, it should be subject to letters of attestation. There is no information available regarding specific language and/or model of certificate in this case.

Appendix I

The USDA is the official authority to issue a phytosanitary or zoo sanitary certificate. A laboratory must be authorized by the U.S. Government to be able to issue a laboratory certificate. An insurance company must be legally registered internationally to be able to issue an insurance certificate.
