

**Required Report:** Required - Public Distribution

**Date:** August 02, 2024

**Report Number:** IS2024-0015

**Report Name:** FAIRS Export Certificate Report Annual

**Country:** Israel

**Post:** Tel Aviv

**Report Category:** FAIRS Export Certificate Report

**Prepared By:** Hila Zakay

**Approved By:** Jenny Morgan

**Report Highlights:**

This report lists and describes certificates and other documentation required by the Government of Israel for U.S. exporters exporting food and agricultural products to Israel. It also includes the purpose of each certificate and the governmental agency responsible. In general, an original invoice, bill of lading, packing list, health certificate, batch number certificate, invoice declaration, and insurance certificate are required to accompany any shipment along with Imported documentation. An export certificate matrix is included in this report. This report supplements the Israel Food and Agricultural Import Regulations and Standards (FAIRS) – Country Report 2024.

## **DISCLAIMER:**

This report was prepared by the OAA/Tel Aviv office, for U.S. exporters of domestic food and agricultural products. While every possible care has been taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. **FINAL IMPORT APPROVAL OF ANY PRODUCTS IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.**

## **Executive Summary**

This report summarizes the major export certificates required to export U.S. food and agricultural products to Israel. The certificates include an invoice declaration; export certificate; health certificate; phytosanitary certificate; and additional certificates stated in the report. These certificates are for sanitary, phytosanitary, and food safety purposes. Post recommends that U.S. exporters verify the full set of import requirements with their Israeli customers before any goods are shipped. In 2023, a Breeding Cattle and Fattening Cattle Health Certificate was implemented by the U.S. Department of Agriculture's (USDA) Animal and Plant Health Inspection Service (APHIS) and the Israeli Ministry of Agriculture (MOAG). Additionally, market access for processing eggs were approved for certification.

## SECTION I: Required Export Certificates:

**Table 1: Required Export Certificates**

Product (s)	Title of Certification	Attestation Required	Purpose	Requesting Ministry
<b>All Products</b>	Export Certificate (FDA <sup>1</sup> Certificate of Free Sale, Certificate to a Foreign Government or Sanitary/Health Certificate <sup>2</sup> )		Health/Free Sale Certificate	MOAG, MoH <sup>3</sup>
	Invoice Declaration <sup>4</sup>		Origin of Product	MOAG, MoH
<b>Grains and Oilseeds (Human Consumption)</b>	Phytosanitary Certificate (APHIS)	See model # 1 in Appendix II	Health Certificate	MOAG, MoH
	Grain Inspection Certificate (FGIS <sup>5</sup> )		Weight, Grade	MOAG, MoH
	Stowage Examination Certificate (FGIS)		Free of pests and contaminants	MOAG, MoH
	Fumigation Certificate (if applicable)		Health Certificate	MOAG, MoH
	Weight Certificate (FGIS)		Weight	MOAG, MoH
<b>Meat Frozen, Fresh or Chilled and Processed Meat Products</b>	Kosher Slaughter Certificate		Religious Certification	Chief Rabbinate of Israel
	FSIS Letterhead Certificate	See model #2 in Appendix II	Health Certificate	MOAG, MoH
	Meat and Poultry Export Certificate of Wholesomeness <sup>6</sup> (FSIS)	See model #3 in Appendix II	Health Certificate	MOAG, MoH

<sup>1</sup> USDA's Food and Drug Administration

<sup>2</sup> Export certificates are issued by several US agencies, depending on product. Please see example certificates in Appendix III: FDA – Processed Products; AMS – Dairy Products; FGIS – Grains and Oilseeds; FSIS – Meat and Poultry; NOAA – Fish and Seafood Products.

<sup>3</sup> Ministry of Health

<sup>4</sup> Note that the *Certificate of Origin for Exporting to Israel* has been replaced with an “Invoice Declaration”, see [Certificate of Origin update](#).

<sup>5</sup> USDA's Federal Grain Inspection Service

<sup>6</sup> For additional requirements relating to meat, please see the [FSIS Export Library](#).

<b>Product (s)</b>	<b>Title of Certification</b>	<b>Attestation Required</b>	<b>Purpose</b>	<b>Requesting Ministry</b>
<b>Poultry Products Frozen, Fresh or Chilled</b>	Kosher Slaughter Certificate		Religious Certification	Chief Rabbinate of Israel
	Currently there is no agreed upon Health Certificate for poultry.		Health Certificate	MOAG, MoH
<b>Day Old Chicks and Hatching Eggs</b>	Veterinary Health Certificate for day old chicks/waterfowl/turkey and hatching eggs exported from the United States of America and imported to Israel	NOTE: Specific attestations are required. See Section III for details and model # 5 in Appendix II	Health Certificate	MOAG
<b>Shell Eggs (Only for processing)</b>	Shell Egg Grading Certificate (AMS) <sup>7</sup>	See model #6 in Appendix II	Grade	MOAG
	Disease Free Certification Statements for Israel (AMS)	See model #7 in Appendix II	Health Certificate	
<b>Dairy Products</b>	Sanitary Certificate (AMS)		Health Certificate	MoH
	Certificate of Analysis			MoH
<b>Fish and Fish Products</b>	Export Health Certificate and Certificate of Origin (NOAA) <sup>8</sup>	See model #8 in Appendix II	Health Certificate	MoH
<b>Fruits and Vegetables</b>	Phytosanitary Certificate (APHIS)	See model # 1 in Appendix II	Phytosanitary Certificate	MOAG, MoH
<b>Live Animals</b>	Veterinary Health Certificate (APHIS) <sup>9</sup>	For Domestic Dogs and Cats, see model #9 in Appendix II	Health Certificate	MOAG

<sup>7</sup> For additional requirements see [General Export Requirements | Agricultural Marketing Service \(usda.gov\)](https://www.usda.gov/ams/programs/food-safety/food-safety-requirements)

<sup>8</sup> For additional requirements see [NOAA FISHERIES Export Requirements by Country and Jurisdiction.](https://www.noaa.gov/fisheries/export-requirements)

<sup>9</sup> For additional and specific requirements see [APHIS Export Live Animals, International Regulations for Animals, Export by Country, Israel.](https://www.aphis.usda.gov/animal-plant-and-soil-health/animal-plant-and-soil-health-services/animal-plant-and-soil-health-services/animal-plant-and-soil-health-services/animal-plant-and-soil-health-services)

Product (s)	Title of Certification	Attestation Required	Purpose	Requesting Ministry
<b>Breeding Cattle and Fattening Cattle</b>	Veterinary Health Certificate for Export of Breeding Cattle from the United States of America to Israel (APHIS) <sup>10</sup>	See model #10 in Appendix II	Health Certificate	MOAG
	Veterinary Health Certificate for Export of Feeder Cattle from the United States of America to Israel (APHIS) <sup>11</sup>	See model #11 in Appendix II	Health Certificate	MOAG

### **Sensitive Products**

Israel divides food products broadly into “sensitive” and “non-sensitive products.” Israeli authorities have more stringent certificate requirements for those goods listed as sensitive. While non-sensitive products may require only a sanitary or health certificate, sensitive products could require additional certification such as a manufacturing license (ISO 9001 or 22000), Good Manufacturing Practices (GMP) certificate, or a certificate of thermal treatment for low acid canned goods. A list of sensitive food products can be found in Appendix I. Exporters should work closely with Israeli importers on verifying and meeting certificate requirements for sensitive products.

### **Animal Feeds**

Israel groups animal feeds into ten categories, each of which maintains a distinct certificate requirement. Exporters of these products should be aware of the group that includes their specific product and the certificate requirements for that group of products, which are listed on the MOAG website.<sup>12</sup>

Note that the requirement for a Plant Accreditation Certificate can generally be met with International Organization for Standardization (ISO) 9001/2000 standard or similar (GMP, hazard analysis and critical control points (HACCP) or equivalent).

## **SECTION II: Purpose of Specific Export Certificate**

(See Section I above)

## **SECTION III: Specific Attestations Required on Export Certificates**

(See Section I above)

<sup>10</sup> [For Online certificate form](#)

## **SECTION IV: Government Export Certificate's Legal Entry Requirements**

The general principles of certification for a consignment of animals or products of animal origin are detailed below and can also be found in Appendix II.

### **General Principles of Certification:**

- The representative of the competent authority of dispatch issuing a certificate to accompany a consignment of animals or animal origin must sign the certificate and ensure that it bears an official stamp. This requirement applies to each sheet of the certificate if it consists of more than one.
- Certificates must be drawn up in English. However, it is possible to certify bilingually for the official language of the exporting country and English.
- The original version of the certificate must accompany consignments on entry into Israel.
- Certificates must consist of:
  - A single sheet of paper; or
  - Two or more pages that are part of a single and indivisible sheet of paper; or
  - A sequence of papers numbered so as to indicate that it is a particular page in a finite sequence (for example, 'page 2 of 4').
- Certificates must bear a unique identifying number. Where the certificate consists of a sequence of pages, each page must indicate this number.
- The original veterinary health certificate must bear the word "ORIGINAL". Copies of the veterinary health certificate must bear the word "COPY".
- The certificate must be issued before the consignment to which it relates leaves the control of the competent authority of the country of dispatch.
- The color of the stamp and signature must be different then to that of the other particulars in the certificate.
- Near each addition or correction, a signature and an official stamp must be added. Any deletion in the certificate should be in a manner that the deleted should be readable.

### **Radiation Monitoring**

There is no requirement by Israel to have an attestation of radioactivity for imported agricultural products. Radiation labeling is according to the international labeling of radiation and imported food must be pre-approved by Ministry of Health. For more information, please refer to the Public Health Protection (Food) (Preservation of food by irradiation) 1985<sup>13</sup> (Hebrew only).

## **SECTION V: Other Certification Requirements to Ensure Market Entry**

### **Invoice Declaration**

In 2018, the Certificate of Origin for Exporting to Israel was replaced with an "Invoice Declaration." For more information, please refer to GAIN report: Israel: Certificate of Origin Update<sup>14</sup>.

---

<sup>13</sup> <https://faolex.fao.org/docs/pdf/isr49130.pdf>

<sup>14</sup> <https://www.fas.usda.gov/data/israel-certificate-origin-update>

## **Packing List**

A certificate from the exporter listing the content of the shipment.

## **Animal Feed**

Importation of animal feed is regulated under the 2014 Control of Animal Feed Law <sup>15</sup>(Hebrew), which regulates the production and marketing of animal feed.

## **Live Animals (including semen and embryos)**

Importation of Live Animals (including semen and embryos) is regulated under Animal Disease Regulations (Imports of Animals) 1974<sup>16</sup>. Further details on the importation of pets are available in Section I.

## **Other Products of Animal Origin**

The importation of products of animal origin is regulated under the Animal Disease Regulations (Import and Export of Animal Products) 1988<sup>17</sup>. For the purpose of these regulations, *animal products* are considered the carcass of animal, inclusive of any part of an animal including blood and its components, skin, hide, bones, internal organs, hooves, horns, wool, hair, bristles, feathers, dung, and including meal, processed fat, and other products derived from animal products, or material containing any such part used for the feeding of animals or the preparation of animal feed.

## **Food**

Importation of food is regulated under the Public Health Protection (Food) Law 2015<sup>18</sup> (Hebrew). Food imports to Israel can be broadly divided into two categories: sensitive and non-sensitive products. A list of sensitive food products can be found in Appendix I. The importation of sensitive food products often requires specific analysis, for instance in the case of milk products the Certificate of Analysis must include a phosphate and microbiological analysis.

## **Plants and Plant Products**

Under Israeli plant regulation, certain low-risk plant materials may be imported without a phytosanitary certificate. In these cases, the products are required to be accompanied by an invoice declaration. The specific products that are eligible for the exception are listed in the Regulation. Exporters that believe their products may be eligible for this exemption are encouraged to review Israeli Plant Protection Regulations (Plant Import, Plant Products, Pests and Regulated Articles) - 2009<sup>19</sup> and work closely with Israeli importers.

## Appendix I: Sensitive Food Products

1. Milk products, and milk products substitutes, that contain milk components
2. Meat and poultry products
3. Fish and fish products, including mollusks, crustaceans, and marine animals from the echinoderms group
4. Eggs and egg products
5. Honey and honey products
6. Products containing gelatin, or collagen products, or both.
7. Low acidic canned food (pH $\geq$ 4.5)
8. Food products that must be stored, kept, or transported at a controlled temperature or at a defined temperature, as defined by law, provided that the temperature is less than eight degrees Celsius
9. Food products for people with special nutritional needs, excluding food marked as "Gluten free", as specified below: <ul style="list-style-type: none"><li>a. Foods intended for consumption by infants and toddlers including formulas and foods marked as supplementary foods;</li><li>b. Designated foods as defined by law, excluding foods marked "gluten free";</li><li>c. Foods intended to replace a daily diet, in whole or in part, including athletes' formulas or supplements;</li><li>d. Dietary supplements as defined by law;</li><li>e. Vitamins, minerals, and amino acids for use as a nutritional component in the food industry.</li></ul>
10. Mushrooms and mushroom mixtures, including products in which mushrooms are a main ingredient
11. Microorganisms for use in the food industry or as a finished product
12. Bottled drinking water, mineral water, and mineral water-based beverages
13. Edible food colors for the retail market
14. Khat leaves in their natural form intended for chewing

## Model Export Certificate #2- Letterhead Certificate for Export of Beef and Products<sup>21</sup>

United States  
Department of  
Agriculture

Food Safety  
and Inspection  
Service

Washington, D.C.  
20250

### Letterhead Certificate for Export of Beef, Beef Meat Products and Beef Offal to Israel

Date Issued: \_\_\_\_\_ Certificate Number: \_\_\_\_\_

1. The United States complies with the conditions of a Negligible BSE risk country by the OIE.
2. The cattle from which the beef and beef offal were derived were born in the United States or legally imported
3. The cattle from which the beef and beef offal were derived were born after the date from which the ban on the feeding of ruminants with meat and bone meal and greaves derived from ruminants had been effectively enforced.
4. The beef and beef offal originate from cattle from a country or zone/county free of Foot and Mouth Disease without vaccination since birth or the previous 3 months or were legally imported and a Rift Valley fever free country or zone/county since birth or for the 30 days prior to slaughter.
5. The beef and beef offal were subject to testing for chemical residues in accordance with the FSIS National Residue Program sampling plans.
6. Beef meat products were produced in (an) establishment(s), implementing a program based on the HACCP principles.
7. Additional specific details for the **Beef products:**

No.	Description of commodity (e.g., smoked/ dried / salted/ coated, etc. – appearance and main characteristics of commodity, as indicated on the invoice)	RTE/ NRTE (e.g., Ready to eat, Ready to cook)	Date of processing/preparation dd/mm/yy

## Model Export Certificate #4- General Principles of Certification for Consignments of Animal or Products of Animal Origin

מדינת ישראל  
STATE OF ISRAEL  
MINISTRY OF AGRICULTURE AND RURAL DEVELOPMENT  
VETERINARY SERVICES & ANIMAL HEALTH

### General principles of certification

1. The representative of the competent authority of dispatch issuing a certificate to accompany a consignment of animals or products of animal origin must sign the certificate and ensure that it bears an official stamp. This requirement applies to each sheet of the certificate if it consists of more than one.
2. Certificates must be drawn up in English. However, it is possible to certify bilingually, the official language of the exporting country and English.
3. The original version of the certificate must accompany consignments on entry into Israel.
4. Certificates must consist of:
  - (a) a single sheet of paper; or
  - (b) two or more pages that are part of a single and indivisible sheet of paper; or
  - (c) a sequence of pages numbered so as to indicate that it is a particular page in a finite sequence (for example, 'page 2 of 4 pages').
5. Certificates must bear a unique identifying number. Where the certificate consists of a sequence of pages, each page must indicate this number.
6. The original veterinary health certificate must bear the word "ORIGINAL". Copies of the veterinary health certificate must bear the word "COPY".
7. The certificate must be issued before the consignment to which it relates leaves the control of the competent authority of the country of dispatch.
8. The color of the stamp and signature must be different then to that of the other particulars in the certificate.
9. Near each addition or correction a signature and an official stamp must be added.
10. Any deletion in the certificate should be in a manner that the deleted should be readable.

General principles of certification

Dr. Shlomo Garazi  
Chief Import & Export  
Veterinary Officer

## Model Export Certificate #5- Day-Old Chicks and Hatching Eggs<sup>23</sup>

Health Certificate No. \_\_\_\_\_  
 (Valid only if the USDA Veterinary  
 Seal Appears over the Certificate No.)

מדינת ישראל  
**STATE OF ISRAEL**  
**MINISTRY OF AGRICULTURE AND RURAL DEVELOPMENT**  
**VETERINARY SERVICES AND ANIMAL HEALTH**

**Veterinary Health Certificate for day old chicks/waterfowl/turkey\* and hatching eggs\*  
 exported from the United States of America (US) and imported to Israel**

Exporting country: US  
 Ministry: US Department of Agriculture (USDA), Animal and Plant Health Inspection Service (APHIS)  
 Department: Veterinary Services (VS)  
 Province or District, etc. (USDA APHIS VS Area Office): .....

**I. Identification of the birds or hatching eggs\***

Type and Species	Breed	Number of containers birds, eggs*/container	Total number of birds/eggs*

**II. Origin of the birds or hatching eggs\***

Name, address and county of the breeding flocks of origin .....

Name and address of the hatchery\* .....

Name and address of exporter .....

**III. Destination of the birds or hatching eggs\***

Name and address of consignee: .....

Nature and identification of means of transport: .....

- IV. I, the undersigned, USDA accredited veterinarian, hereby certify that:**
1. The flock(s) of origin and the hatchery\* are situated in a zone in the state (county) which has been officially free of notifiable avian influenza according to the OIE for at least the past 3 months.
  2. The hatchery\* and farm of origin of the said birds/hatching eggs\* in a radius of 10 km has been free from Newcastle disease, as defined in the Terrestrial Animal Health Code of the OIE, during the last 12 months.
  3. The breeding flocks and hatchery\* from which the said hatching eggs/birds\* originated are recognized as being free from bacillary white diarrhoea (Pullorum disease), fowl typhoid (Gallinarum disease), *Salmonella* Typhimurium, *Salmonella* Enteritidis, *Salmonella* Virchow, *Salmonella* Hadar, *Salmonella* Infantis, *Mycoplasma gallisepticum*, *Mycoplasma synoviae* and (for turkeys only) *Mycoplasma meleagridis* and *Arizona hinshawii*.
  4. The breeding flocks and hatchery\* from which the said hatching eggs/birds\* originated are recognized as being free from duck virus hepatitis (for ducks only) and from duck virus enteritis/duck plague, and have not been vaccinated against these diseases

<sup>23</sup> [https://www.aphis.usda.gov/sites/default/files/Is\\_DOC\\_HE\\_6\\_17.pdf](https://www.aphis.usda.gov/sites/default/files/Is_DOC_HE_6_17.pdf)

The breeding flocks and hatchery\* from which the said hatching eggs/birds\* originated are recognized as being free from goose viral hepatitis (for geese and muscovy ducks only) and have not/have been\* vaccinated against these diseases. (indicate the nature of vaccine used and date of vaccination)

\_\_\_\_\_

5. Routine monitoring of the breeding flocks of origin and their progeny has not disclosed infection with *Salmonella* Typhimurium, *Salmonella* Enteritidis, *Salmonella* Virchow, *Salmonella* Hadar and *Salmonella* Infantis.
6. The breeding flocks from which the said hatching eggs/birds\* originated are known to be free from evidence of infectious diseases and in particular of Avian chlamydiosis (Ornithosis), Tuberculosis, Reticuloendotheliosis and (for chicken, heavy breeders only) Lymphoid leucosis (LLV) including subgroup J., during the last 12 months. The Israeli Authorities have been notified of all *Salmonella* serotypes that have been isolated in the breeding flocks of origin, and of any other findings regarding infectious or toxic agents at least 48 hours prior to exports.
7. ELISA tests for Reticuloendotheliosis and (for chicken, heavy breeders only) LLV, have been carried out in the breeding flock of origin within 2 months prior to the date of export with negative results. Birds reacting positive on the ELISA test were tested by a serological test with negative results.
8. The day old chicks/ day old turkeys/ day old waterfowl\* described above originate from the above mentioned hatchery, which uses eggs obtained only from breeding farms which comply to the requirements specified above. Routine monitoring of the above mentioned hatchery has not disclosed contamination with *Salmonella* Typhimurium, *Salmonella* Enteritidis, *Salmonella* Virchow, *Salmonella* Hadar, *Salmonella* Infantis.
9. a. All commercial flocks in the State have been free from *Salmonella* Pullorum-Gallinarum for the last 24 months and 300 birds from flocks of more than 300, or each bird in flocks of 300 or less, from the breeding flocks of origin were serologically tested for Pullorum-Gallinarum within 12 months prior to the date of export with negative results per the requirements of the APHIS National Poultry Improvement Plan (NPIP), OR\*  
b. The State is not free from *Salmonella* Pullorum-Gallinarum and all (100%) the birds in the breeding flocks of origin were serologically tested for Pullorum-Gallinarum within 12 months prior to the date of export with negative results.  
All birds reacting positive on the agglutination test were tested by bacteriology with negative results for Pullorum-Gallinarum.
10. No antibiotics or other bactericidal or other bacteriostatic agents have been administered to the parent flocks within the two weeks prior to egg production or to the birds/hatching eggs\* at any time. All established antibiotic withdrawal periods have been observed.
11. The said birds/ hatching eggs\* will be inspected on the day of exportation and shipped only if found adequately packed in new and clean containers, and the birds healthy and fit to travel.

### Disease Free Certification Statements for Israel

Shell Egg Grading Certificate No. SEA \_\_\_\_\_ Dated: \_\_\_\_\_

The U.S. Department of Agriculture, Animal and Plant Health Inspection Service (APHIS),  
Veterinary Services (VS) certifies that:

1. Based upon information provided by the applicant, the shell eggs covered by this certificate originated from layer flock(s) located in the following County(ies), State(s):  
  
\_\_\_\_\_  
  
\_\_\_\_\_
2. The eggs were produced and packed in a zone which meets the requirements to be considered free from notifiable avian influenza (NAI) according to the World Organization for Animal Health (WOAH) Terrestrial Animal Health Code Chapter 10.4 (2021) for at least the past 28 days.
3. The eggs were obtained from poultry which:
  - a. Have been held in the country since hatching or have been imported as day-old chicks;
  - b. Come from holdings which have not been placed under animal health restrictions in connection with poultry diseases as recognized by the government of the United States and around which, within a 10km radius, there have been no outbreaks of NAI for at least 28 days and Newcastle disease for at least 90 days in poultry, as all are defined according to the WOA.
4. The laying flocks from which the eggs were derived:
  - a. Participate in the official Salmonella control program overseen by the competent authority. The certifying authority ensures only eggs from participating flocks yielding negative test results prior to shipment are eligible for export.
  - b. Have not been in contact during the 90 days preceding egg collection with poultry which do not fulfill the requirements listed in 4(a).

---

<sup>25</sup> [Online form](#)

5. The eggs described above:
- a. Come from establishments which, at the time of packaging, were not under restrictions due to a suspect or actual outbreak of NAI or Newcastle disease and around which, within a radius of 10km, there have been no commercial poultry outbreaks of NAI for the past 28 days and Newcastle disease for the past 90 days.
  - b. Have not been in contact with eggs which do not fulfill the requirements listed in 5(a).
  - c. Meet U.S. standards and regulations for residues, which assures that the products do not contain harmful levels of veterinary drugs, pesticides or environmental contaminants.
  - d. Are labeled in accordance with the "Export Procedures Shell Eggs to Israel (11/1/2023)
  - e. Are transported in new packaging materials and containers, in such condition that the health status of the eggs will not be jeopardized during the transport from their place of origin.

**HEALTH ATTESTATION:**

Certification No.: \_\_\_\_\_

**II.1.-** I, the undersigned official veterinarian, declare that I am aware of the relevant provisions of Regulations (EC) No 178/2002, (EC) No 852/2004, (EC) No 853/2004 and (EC) No 854/2004 and certify that the fishery products described above were produced in accordance with those requirements, in particular that they:

- Come from (an) establishment(s) implementing a programmed based on the **HACCP principles** in accordance with Regulation (EC) No 852/2004
- Have been caught and handled on board vessels, landed, handled and where appropriate prepared, processed, frozen and thawed hygienically in compliance with the requirements laid down in Section VIII, Chapters I to IV of Annex III to Regulation (EC) No 853/2004
- Satisfy the health standards laid down in Section VIII, Chapter V of Annex III to Regulation (EC) No 853/2004 and the criteria laid down in Regulation (EC) No 2073/2005 on microbiological criteria for foodstuffs
- Have been packaged, stored and transported in compliance with Section VIII, Chapters VI to VIII of Annex III to Regulation (EC) No 853/2004
- Have been marked in accordance with Section I of Annex II to Regulation (EC) No 853/2004
- The guarantees covering live animals and products thereof, if from aquaculture origin, provided by the residue plans submitted in accordance with Directive 96/23/EC, and in particular Article 29 thereof, are fulfilled; and
- Have satisfactorily undergone the official controls laid down in Annex III to Regulation (EC) No 854/2004.

**II.2.-** Animal health attestation for fish and crustaceans of aquaculture origin (2) (4)

I, the undersigned official veterinarian, hereby certify that the aquaculture animals or products thereof referred to in Part I of this certificate:

**II.2.1.-** Requirements for susceptible species to Epizootic ulcerative syndrome (EUS), Epizootic haematopoietic necrosis (EHN), Taura syndrome and Yellow head disease. (3) (4)

Originate from a country/territory, zone or compartment declared free from <sup>(1)</sup>[EUS] <sup>(2)</sup>[EHN] <sup>(3)</sup>[Taura syndrome] <sup>(4)</sup>[Yellowhead disease] in accordance with Chapter VII of Directive 2006/88/EC or the relevant OIE Standard by the competent authority (5)

- (i) where the relevant diseases are notifiable to the competent authority and reports of suspicion of infection of the relevant disease must be immediately investigated by the official services.
- (ii) all introduction of species susceptible to the relevant diseases come from an area declared free of the diseases.
- (iii) species susceptible to the relevant diseases are not vaccinated against the relevant diseases

**II.2.2.-** Requirements for species susceptible to Viral haemorrhagic septicaemia (VHS), Infectious haematopoietic necrosis (IHN), Infectious salmon anaemia (ISA), Koi herpes virus (KHV) and White spot disease (3) (4)

Originate from a country/territory, zone or compartment declared free from <sup>(1)</sup>[VHS] <sup>(2)</sup>[IHN] <sup>(3)</sup>[ISA] <sup>(4)</sup>[KHV] <sup>(5)</sup>[White spot disease] in accordance with Chapter VII of Directive 2006/88/EC or the relevant OIE Standard by the competent authority (6)

- (i) where the relevant diseases are notifiable to the competent authority and reports of suspicion of infection of the relevant disease must be immediately investigated by the competent authority
- (ii) all introduction of species susceptible to the relevant diseases come from an area declared free of the disease.
- (iii) species susceptible to the relevant diseases are not vaccinated against the relevant diseases

**II.2.3.-** Transport and labeling requirements:

**II.2.3.1.-** the aquaculture animals referred to above are placed under conditions, including the water quality, that do not alter their health status.

**II.2.3.2.-** the transport container or well boat prior to loading is clean and disinfected or previously unused.

**II.2.3.3.-** the consignment is identified by a legible label on the exterior of the container, or when transported by well boat, in the ship's manifest, with the relevant information referred to in Part I of this certificate, and the following statement:  
<sup>(1)</sup>[Fish] <sup>(2)</sup>[Crustaceans] <sup>(3)</sup>[Molluscs] intended for human consumption in Israel".

Done at: \_\_\_\_\_, on: \_\_\_\_\_  
(Place) (Date)

Official Stamp (English) Name, position and signature of the Official Veterinarian/ Inspector

**NOTES:**

- To clarify :
  - o This document is valid only when issued and signed by the official competent authority of the exporting country.
  - o This document is addressed to the Israeli Ministry of Health and when presented, during the consignment inspection process and thereafter, this document will be considered as the property of the Ministry of Health.

**Part I:**

- **Box: Place of origin:** name and address of the dispatch establishment.
- **Box: Identification of container:** Where there is a serial number of the seal it has to be indicated.
- **Box Date of departure :** Will be no sooner than the date of issuing the Health certificate.
- **Box Identification of commodities:**
  - **Description of commodity :**Specify the appearance and main Characteristics of commodity (ex: head on / head off / fillet / smoked / dried / salted/coated etc., as indicated on the invoice )
  - **Nature of commodity:** Specify whether aquaculture or wild origin
  - **Treatment type:** Specify whether live, chilled, frozen or processed .
  - **Manufacturing plant:** includes factory vessel, freezer vessel, cold store, processing plant
  - **Harvesting date:** Specify the original date of harvesting : specific date in chilled fish and at least , month and year in the case of non-chilled fish.
  - **Production date :** Specify the original date of production (freezing , packaging, processing ) .
  - **Best before:** Specify the date which is printed on the Hebrew label (**optional**)
  - **Shipment No.:** Specify the shipment number which is printed on the Hebrew labels

**Part II:**

- (1) Part II.1 of this certificate does not apply to countries with special public health certification requirements laid down in equivalence agreements or other European Union legislation.
  - (2) Part II.2 of this certificate does not apply to:
    - (a) non-viable crustaceans, which means crustaceans no longer able to survive as living animals if returned to the environment from which they were obtained
    - (b) fish which are slaughtered and eviscerated before dispatch
    - (c) aquaculture animals and products thereof, which are placed on the market for human consumption without further processing, provided that they are packed in retail-sale packages which comply with the provisions for such packages in Regulation (EC) No 853/2004.
    - (d) crustaceans destined for processing establishments authorised in accordance with Article 4(2) of Directive 2006/88/EC, or for dispatch centers, purification centers or similar businesses which are equipped with an effluent treatment system inactivating the pathogens in question, or where the effluent is subject to other types of treatment reducing the risk of transmitting diseases to the natural waters to an acceptable level.
    - (e) crustaceans which are intended for further processing before human consumption without temporary storage at the place of processing and packed and labelled for that purpose in accordance with Regulation (EC) No 853/2004.
  - (3) Parts II.2.1 and II.2.2 of this certificate only apply to species susceptible to one or more of the diseases referred to in the title. Susceptible species are listed in Annex IV to Directive 2006/88/EC.
  - (4) Keep as appropriate.
  - (5) For consignments of species susceptible to EUS, EHN, Taura syndrome and/or Yellowhead disease this statement must be kept for the consignment to be authorised into the country of destination.
  - (6) To be authorised into a country of destination declared free from VHS, IHN, ISA, KHV or Whitespot disease or with a surveillance or eradication programme established in accordance with Article 44(1) or (2) of Directive 2006/88/EC, one of these statements must be kept if the consignment contain species susceptible to the disease(s) for which disease freedom or programme(s) apply(ies).
- The colour of the stamp and signature must be different from that of the other particulars in the certificate.

**II. ANIMAL HEALTH CERTIFICATIONS:**

I, the undersigned USDA accredited veterinarian, certify to the following statements:

1. The United States is free in the last 6 months of contagious bovine pleuropneumonia, foot and mouth disease, and rinderpest.
2. The United States is recognized by the World Organization for Animal Health (WOAH) as a country with negligible risk of bovine spongiform encephalopathy (BSE). The United States complies with the conditions prescribed by the WOAH Terrestrial Animal Health Code including completing a risk assessment; maintaining a surveillance program; and conforming to programs, notifications, ruminant feed-control and identification, movement control and destruction (at slaughter or death) for indigenous cases.
3. Cattle to be exported were born in the United States.
4. Have not received any stilbene or thyreostatic substances, oestrogenic, androgenic, gestagenic, or  $\beta$ -agonist substances for purposes other than therapeutic or zootechnic treatment.
5. The herds of origin:
  - a. Are in states officially free of tuberculosis and brucellosis for the 12 months prior to export.
  - b. Have been free of clinical cases of trichomoniasis, campylobacteriosis, infectious bovine rhinotracheitis/infectious pustular vulvovaginitis (IBR/IPV), bovine viral diarrhea/mucosal disease (BVD/MD), leptospirosis, paratuberculosis (Johne's disease) or enzootic bovine leukosis for the 12 months prior to export.
  - c. Have been in an area with a 150 km radius where there has been no reports of clinical cases of bluetongue or epizootic hemorrhagic disease in cattle for 60 days prior to export.
5. Cattle were isolated for at least 8 days prior to their movement for export under the supervision of a USDA accredited veterinarian.
6. Cattle were inspected within 8 days prior to export and found to be free from clinical evidence of communicable diseases.

**III. TEST REQUIREMENTS:**

1. Cattle for export are test negative for enzootic bovine leukosis (EBL) twice, with at least 30 days between the tests, and the second test was conducted during isolation.

## Model Export Certificate #11- Feeder Cattle<sup>27</sup>

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control numbers for these information collections are 0579-0020, 0038, 0048, 0101, 0156, 0270, and 0432. The times required to complete these information collections is estimated to average 26 to 1.5 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

ISAH-issued import permit number:

Certification Statements:

II. ANIMAL HEALTH CERTIFICATIONS:

I, the undersigned USDA accredited veterinarian, certify to the following statements:

1. The United States is free in the last 6 months of contagious bovine pleuropneumonia, foot and mouth disease, and rinderpest.
2. The United States is recognized by the World Organization for Animal Health (WOAH) as a country with negligible risk of bovine spongiform encephalopathy (BSE). The United States complies with the conditions prescribed by the WOAH Terrestrial Animal Health Code including completing a risk assessment; maintaining a surveillance program; and conforming to programs, notifications, ruminant feed-control and identification, movement control and destruction (at slaughter or death) for indigenous cases.
3. Cattle to be exported were born in the United States.
4. Have not received any stilbene or thyreostatic substances, oestrogenic, androgenic, gestagenic, or  $\beta$ -agonist substances for purposes other than therapeutic or zootechnic treatment.
5. The herds of origin:
  - a. Are in states officially free of tuberculosis and brucellosis for the 36 months prior to export.
  - b. Have been free of clinical cases of trichomoniasis, campylobacteriosis, infectious bovine rhinotracheitis/infectious pustular vulvovaginitis (IBR/IPV), bovine viral diarrhoea/mucosal disease (BVD/MD), leptospirosis, paratuberculosis (Johne's disease) or enzootic bovine leukosis for the 12 months prior to export.
  - c. Have been in an area with a 150 km radius where there has been no reports of clinical cases of bluetongue or epizootic hemorrhagic disease in cattle for 60 days prior to export.
6. The cattle were isolated for at least 8 days prior to their movement for export under the supervision of a USDA accredited veterinarian.
7. The animals were inspected within 8 days prior to export and found to be free from clinical evidence of communicable diseases.

III. TEST REQUIREMENTS:

1. In regard to testing for campylobacteriosis and trichomoniasis:

**Veterinary Health Certificate for Export of  
Feeder Cattle from the United States of America to Israel**

**Veterinary Authority**  
UNITED STATES DEPARTMENT OF AGRICULTURE

**Date Of Issue**  
[REDACTED]

**Certificate Number**  
[REDACTED]

**Additional Field(s):**

**Certification Statements:**

The cattle are either less than 6 months of age, or castrated, or are female cattle that have not been exposed to intact bulls since 6 months of age, and are exempt from testing.

The cattle were tested negative for bovine campylobacteriosis AND bovine trichomoniasis using culture for campylobacteriosis, and either conventional PCR with culture, or real-time PCR test for trichomoniasis, according to the WOAHP Terrestrial Test Manual.  
Test date(s): [REDACTED]

**IV. OTHER VETERINARY TREATMENTS AND INSPECTIONS:**

1. Regarding leptospirosis:

The animals were treated against leptospirosis with one injection of long acting oxytetracycline (20 mg/kg body weight) once during the time of isolation.

The animals were vaccinated against leptospirosis within 60 days prior to export.

The animals were tested negative for leptospirosis within 60 days prior to export by isolation and identification method.

2. The animals were protected from attacks from biting flies (i.e. Culicoides) for at least 30 days prior to export using insecticide (approved for use in the United States) according to the manufacturer's recommendations.

3. During the time of isolation, the animals were inspected and treated with an anthelmintic, approved for use in the United States, effective against internal parasites (roundworms, tapeworms and fluke infections).

Date of treatment(s): [REDACTED] Name of product(s): [REDACTED]

4. During the time of isolation, the animals were inspected and treated with an insecticide, approved for use in the United States, effective against external parasites, including biting flies (i.e. Culicoides).

Date of treatment(s): [REDACTED] Name of product(s): [REDACTED]

5. The cattle are transported from the isolation to the port of embarkation in vehicles that have been cleaned and disinfected.

6. The cattle are examined 48 hours before export and found to be free from clinical evidence of communicable diseases.

- NOTE: The animals must be transported in compliance with CFR Part 91.
