General Summary

The German Federal Ministry of Agriculture's final estimate for the 1999 grain harvest is set at 44.5 million tons, which is only 118,000 tons less than in 1998. Crop conditions for 2000 are still favorable despite a lack of rainfall in the northern and eastern parts of the country. In contrast, the central and southern parts of the country received sufficient rains during recent weeks. The AgBerlin crop forecast of February 2000 remains unchanged at 46.5 million tons. The European umbrella organization of grain merchants COCERAL recently released their own forecast amounting to 46.1 million tons.
