

Required Report: Required - Public Distribution **Date:** April 17,2020

Report Number: SN2020-0001

Report Name: Food Processing Ingredients

Country: Singapore

Post: Singapore

Report Category: Food Processing Ingredients

Prepared By: Ira Sugita

Approved By: William Verzani

Report Highlights:

Almost all raw materials for the Singaporean food processing industry are imported, as local agricultural production is minimal. Total industry output value in 2019 reached almost \$8.3 billion USD. The main products produced by the Singaporean food processing industry include flavorings, sauces, ready-to-eat meals, noodles, deli meat, sausage, confectionery, chocolates, snacks and beverages (including beer). Top prospective U.S. food processing ingredient products for the Singaporean market include animal fats, dairy, vegetable oils, processed vegetables, tree nuts and pork.

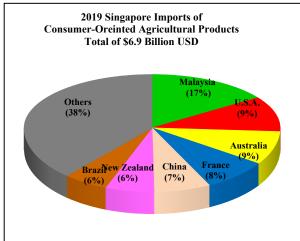

Market Fact Sheet: Singapore

Executive Summary

Singapore's highly import dependent, multibillion-dollar food industry is driven by robust consumer spending, high disposable incomes and intense urbanization. The country's trade and regulatory policies are focused on ensuring consistent foreign supply of high-quality food and agricultural products. Singapore's total agricultural product imports in 2019 reached \$10.1 billion USD, roughly 10% of which was sourced from the United States.

Imports of U.S. Consumer-Oriented Products

In 2019, the United States was Singapore's second largest supplier of consumer-oriented food and beverage products, with total sales reaching \$638 million USD for the year. Top U.S. products in the market include dairy, fresh fruit, processed vegetables, poultry and beef.

Food Processing

The Singaporean food processing industry is relatively small. However, almost all raw materials or ingredients used in the processing industry are imported. Total industry output value in 2019 reached almost \$8.3 billion USD.

Hotel, Restaurant and Institutional

Singapore has a highly developed and competitive hotel, restaurant and institutional (HRI) sector. Singaporeans are some of Asia's top spenders on dining out. In 2018 (most recent data available), the country's tourist receipts topped \$27.1 billion USD, of which almost \$2 billion was derived from food and beverage sales.

Singapore's retail sector is also highly developed, with total sales in 2019 reaching over \$6 billion USD. Three key players dominate the sector: NTUC Fair Price Cooperative, Dairy Farm International Holdings and Sheng Siong Supermarket Chain.

SECTION I. MARKET OVERVIEW

Singapore's food processing sector is relatively small and is comprised of mainly small and mediumsized enterprises (SMEs). These SMEs range from bakery, flour and confectionary factories to dairy processing plants and noodle/pasta manufacturers. The main products produced by the Singaporean food processing industry include flavorings, sauces, ready-to-eat meals, noodles, deli meat, sausage, confectionary, chocolates, snacks and beverages (including beer).

Almost all raw materials for the Singaporean food processing industry are imported, as local agricultural production is minimal. Australia and New Zealand supply the majority of the ingredient products for the Singaporean dairy processing plants while Malaysia and China are the local food manufacturer's top suppliers of fresh vegetables. The United States is a major supplier of animal fats, dairy products, vegetable oils, processed vegetables, and fresh fruit.

Major Processed Food and Beverage Companies in Singapore

- F&N Foods Pte. Ltd. Established regional food and beverage company: Soft drinks, health & wellness drinks, dairy products, and ice cream. https://www.fnnfoods.com/
- Tee Yih Jia Food Manufacturing Pte. Ltd. Processed, frozen and convenience food producer: Spring rolls, buns, breads and crepes. http://www.tyjfood.com/
- Singapore Food Industries Pte. Ltd. Largest integrated food company in Singapore with processing facilities: Produces value-added foods (nuggets, bacon, ham, patties, seafood) and fresh, chilled and frozen pork. Also processes fruits, vegetables, soups, and sauces. https://www.sats.com.sg
- Asia Pacific Breweries (APB) Singapore Leading beer manufacturer and distributor: Over 40 beer brands including Tiger, and Baron. https://www.apbsingapore.com.sg/
- Yeo Hiap Seng Pte. Ltd. Manufacturer and distributor of beverages, sauces, and canned/preserved foods. https://www.yeos.com.sg
- Khong Guan Biscuits Pte. Ltd. Biscuits producer: Range includes assorted biscuits, wafers, digestives, and cream crackers. https://www.khongguan.com.sg/
- Auric Pacific Group Ltd. Processed food manufacturer including bakery, frozen and ready-to-eat meals: Breads, oils, fats, frozen pizza/pies, butter, and gourmet delicatessen. Also distributes global brands and wines/spirits. https://www.auricgroup.com/
- Lam Soon Group Established manufacturer of cooking oil: Products include cooking oil, margarine, specialty fats, and organic products. http://www.lamsoongroup.com

Sector Trends

- Health and wellness trends continued to be highly prevalent in 2019.
- Increased demand for "natural" and "less processed" food and beverage products.
- Growing demand for smaller food package sizes and individually wrapped products.
- The Singaporean Ministry of Health (MOH) will introduce several measures restricting some types of pre-packaged, sugar-sweetened beverages (SSBs). These regulations are expected to take effect by the end of 2021 and may have ramifications on the sale of some processed food products in the country.

- Partially hydrogenated oils (PHOs), a common ingredient used in the manufacturing of many processed foods, will be banned by the MOH. The March 2019 announcement will affect four categories of products including snacks, baked goods, prepared meals and fat spreads.
- Growing demand for ready-to-eat meals and convenience foods that are considered fresh and nutritious.
- Increased blurring of product categories as manufacturers mix and match ingredients and concepts.
- Increased "localized strategies" to snack products, such as adding local flavors.

Road Map for Market Entry

U.S. exporters of food and agricultural products should consider the following when planning to enter the Singapore market:

- Analyze Singapore food laws, packaging & labeling requirements and importer criteria for entry into the Singapore market. Detailed information on Singapore regulations and requirements can be found by accessing the <u>FAS/Singapore Food and Agricultural Import Regulations & Standards Country Report</u>.
- Review the types of U.S. products that can be readily targeted in the market. Consider the price competitiveness of U.S. products compared to similar products available in Singapore.
- Participate in regional trade shows and trade missions by tapping into the resources offered by <u>State</u> and <u>Regional Trade Associations</u>.
- Develop links with local importers that target the major processors. U.S. exporters are advised to
 appoint local distributors or at least a local representative to help guide them through the
 requirements of Singapore food regulations and local trading practices.
- After establishing links with importers, strive to educate them (in person if possible) on the qualities of your product/s and supply chain.
- After establishing trade agreements with local importers, conduct product promotions with endusers. This type of marketing event is particularly effective during festivals and peak seasons (Chinese New Year, Christmas, etc.).
- Provide technical assistance (e.g. handling techniques and product formulations) to end-users.
- Maintain strong communication with your local importer to ensure all certificates and import permits are valid and up to date.

SECTION II. NATIONAL FOOD STANDARDS & TRADE REGULATIONS/PROCEDURES

The Singapore Food Agency (SFA) is the national authority responsible for food security and safety matters in the country. Established in April 2019, the SFA has assumed all food-related regulatory responsibilities from its predecessor, the Agri-Food and Veterinary Authority (AVA).

Several types of food/food products entering Singapore must originate from establishments approved by SFA. Additionally, multiple types food/food products, including meat and meat products, processed eggs, fresh table eggs and live poultry, require proper accreditation and approved procedures with SFA. Overseas establishments that supply these products are required to apply for accreditation with SFA through the supplying country's competent authorities.

For more details on export requirements to the Singapore market, please refer to the USDA Food Safety and Inspection Service Export Library.

SECTION III. COMPETITION

Product	Major Supply Sources	Foreign Supplier	Local Supplier
Category (2019)	(2019)	Situation	Situation
Dairy Products Net Imports: \$949 million	 New Zealand: 30% Australia: 14% United States: 8% Thailand: 7% 	Australia & New Zealand are traditional suppliers.	Local/regional dairy companies have strong brand/name familiarity.
Processed Vegetables Net Imports: \$213 million	 United States: 31% China: 24% Malaysia: 10% Japan: 5% 	Processed U.S. potatoes are in strong demand. China and regional countries offer competitive pricing for other processed vegetables.	Singapore is a small producer of processed vegetables.
Fresh Vegetables Net Imports: \$473 million	 Malaysia: 38% China: 25% Australia: 9% Thailand: 5% 	Regional countries offer competitive pricing.	Singapore produces mainly leafy vegetables and bean sprouts. Production is minimal.
Processed Fruit Net Imports: \$125 million	 China: 22% United States: 13% Malaysia: 12% Thailand:10% 	U.S. dried fruits are popular; some are repacked and sold as private local brands.	Singapore is not a significant producer of dried fruit.
Fresh Fruit Net Imports: \$528 million	 Malaysia: 14% United States: 13% Australia: 13% China: 12% 	The top U.S. fresh fruits in Singapore include grapes, oranges, strawberries and apples.	Singapore produces very little fresh fruit.
Tree Nuts Net Imports: \$157 million	 Indonesia: 28% Malaysia: 18% United States: 17% India: 7% 	Along with cashews from neighboring countries, U.S. nuts are very popular. Some U.S. nuts are repacked and sold	Singapore is not a major producer of edible nuts.

		under local brands.	
Beef/Beef Products Net Imports: \$250 million	 Brazil: 32% Australia: 32% United States: 12% New Zealand: 7% 	Australia and New Zealand are traditional suppliers. Brazil is currently price competitive in the frozen beef segment.	Singapore does not produce beef.
Poultry/Poultry Products (excluding eggs) Net Imports: \$375 million	 Brazil: 53% Thailand: 24% United States: 9% Malaysia: 5% 	Brazilian poultry is currently price competitive in the Singaporean market.	Malaysian live chickens are imported and processed in-country.
