Required Report: Required - Public Distribution **Date:** December 19, 2021

Report Number: AG2021-0015

Report Name: Food and Agricultural Import Regulations and Standards Export Certificate Report

Country: Algeria

Post: Algiers

Report Category: FAIRS Export Certificate Report

Prepared By: Nabila Hales

Approved By: Justina Torry

Report Highlights:

This report provides information on export certificates required by the Government of Algeria. Effective December 31, 2021, a new regulation requiring Algerian importers to have an electronic trade register for each single sub-group of products they import will be implemented.

THIS REPORT CONTAINS ASSESSMENTS OF COMMODITY AND TRADE ISSUES MADE BY USDA STAFF AND NOT NECESSARILY STATEMENTS OF OFFICIAL U.S. GOVERNMENT POLICY

Disclaimer:

This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Algiers, Algeria for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped.

All the Official Journals (Journal Officiel) (JO.) included in this report can be found at the website: https://www.joradp.dz/HFR/Index.htm. (The website can be read in English. However, all the journals are in Arabic and French).

All FAS Algiers reports can be reviewed at: https://gain.fas.usda.gov/#/search

FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

Please contact this office, if you have any comments, corrections or suggestions about the material contained in this report at: AgAlgiers@usda.gov

Appendix I: Electronic Copy, Scanned copy, or outline of Each Export Certificate. 13

Executive Summary:

This report provides information on the required export certificates and the regulation in force for importing food and agricultural products into Algeria.

For any products or goods entering Algeria, the regulation requires mandatory conformity and quality certificates as well as a certificate of origin along with the customs documents. In addition, a sanitary and health certificate is required in case of plant products or animals and products of animal origin. All of these goods are subject to conformity control at ports of entry. This control is carried out by a joint team composed of inspectors from Ministries of Commerce, Agriculture, Customs, and Transportation in compliance with a regulation in force that is outlined in this report. Any imported products or goods destined for sale as is, requires an additional certificate of free sale. In 2021, Algeria modified its regulation for imports of goods destined for resale. The new regulation is outlined in this report.

Algeria has a phytosanitary certificate requirement for all plant products and sanitary veterinary certificate requirement for all animal products and products of animal origin. Algeria negotiates bilaterally with countries to meet the Algerian requirements.

Regarding trade with the U.S., currently, the market is open for: milk & milk products, turkey and chicken hatching eggs and one-day chicks as well as bovine embryos. The U.S. and Algeria have not yet reached agreement on certificate requirements for trade regarding beef, bovine semen, dairy cattle, and beef cattle.

Section I: List of All Export Certificates Required by Algeria (Matrix)

All imported food and goods are subject to conformity control at ports of entry in compliance with the Executive Decree no 05-467 of December 10, 2005, published in the Journal Official (Journal Officiel) (JO.) No 80 of December 11, 2005. Conformity control at ports of entry is carried out by a joint team composed of inspectors from: the Ministries of Commerce, Agriculture, Customs, and Transport in accordance with the terms and conditions under the provisions of the Executive Decree No 90-39 of January 30, 1990, (published in JO. No 05 of January 31, 1990) as amended and supplemented. Inspectors from the Ministry of Agriculture's Veterinary Services and Phytosanitary and Plant Protection primarily carry out the sanitary and phytosanitary inspections.

A certificate of conformity and quality as well as a certificate of origin are mandatory for all imported products along with the customs documents (See Section IV).

In compliance with the Executive Decree no 93-286 of November 23, 1993, a phytosanitary control is mandatory for all plants, plant products and plant materials as defined in Article 2 of the law no 87-17 of August 1987 (published in the JO. No.32 of August 05, 1987). The phytosanitary authority represented by the Plant Protection and Technical Control Directorate (DPVCT) at the Ministry of Agriculture controls phytosanitary certificates.

A sanitary veterinary certificate is mandatory for all animal and products of animal origin.

The Veterinary Services Office at the Ministry of Agriculture regulates the sanitary veterinary certificates for animals and products of animal origin. Executive Decree No 91-452 of November 16, 1991 (published in the JO. No 59 of November 20, 1991), regulates veterinary inspections at border posts.

Table: List of All Export Certificates Required by Algeria

Product(s)	**Certificate's Title**	**Attestation Required on Certificate**	**Purpose**	**Requesting Ministry**
Food Products (non-animal origin)	Certificate of Conformity and quality; Certificate of Origin satisfied via a local chamber of commerce; Certificate of Free Sale (Free Marketing/Movement)	N/A	Certifies that the goods are in compliance with Algeria's technical regulations and standards	Ministry of Commerce
Seeds	Phytosanitary Certificate for Re-export Certificate of Conformity & Quality; Certificate of Origin	-Non GMO attestation required - International Orange Seed Certificate (ISTA) - technical import authorization	Food safety Food quality	Ministry of Agriculture Phytosanitary Directorate (DPVCT)
Dairy Products	Health Export Certificate (For Milk and Milk Products for Algeria); Certificate of Conformity Quality Certificate of	Certificate of analysis from a certified laboratory to be presented at the port of entry with the sanitary certificate	Food safety Food quality	Ministry of Agriculture Veterinary Services (DSV)

	Origin			
Turkey day-old chicks & hatching eggs	Health Certificate (for Exportation of Turkey-Hatching Eggs and Turkey One-Day Old Poults); Certificate of Conformity; Certificate of Origin	Health certificates require original ink signatures from the issuing USDA-Accredited Veterinarian and the endorsing APHIS-Veterinary Medical Officer with the application of the APHIS embossed seal.	Food safety Food quality	Ministry of Agriculture Veterinary Services (DSV)
Grains	Phytosanitary Certificate; FGIS Certificate of Origin; Certificate of Conformity & Quality; Certificate of Fumigation; Certificate of non-radioactivity (isotopic)		Food safety Food quality	Ministry of Agriculture Phytosanitary Directorate (DPVCT)
Tree Nuts	Phytosanitary Certificate; Certificate of Conformity & Quality; Certificate of Origin; Certificate of		Food safety Food quality	Ministry of Agriculture Phytosanitary Directorate (DPVCT)

	Free Sale (Free Marketing/Movement)			
Bovine Embryos	Health Certificate (for Exportation of Bovine Embryos); Certificate of Conformity; Certificate of Origin	Health certificates require original ink signatures from the issuing USDA-Accredited Veterinarian and the endorsing APHIS-Veterinary Medical Officer with the application of the APHIS embossed seal.	Food safety Food quality	Ministry of Agriculture Veterinary Services (DSV)
Chicken day-old chicks & hatching eggs	Health Certificate (for Exportation of Chicken-Hatching Eggs and One-Day Old Poults); Certificate of Conformity; Certificate of Origin	Health certificates require original ink signatures from the issuing USDA-Accredited Veterinarian and the endorsing APHIS-Veterinary Medical Officer with the application of the APHIS embossed seal.	Food safety Food quality	Ministry of Agriculture Veterinary Services (DSV)

Trade for beef, bovine semen, dairy cattle, and beef cattle are not yet permitted, as the United States and Algeria have not yet reached agreement on export certificate requirements. The U.S. and Algerian regulatory agencies reached agreement and the market is open for bovine embryos, and turkey and chicken day-old chicks & hatching eggs.

Additional export information:

- APHIS: Live Animals, Animal Products, and Plant Products
- FSIS: Meat and Poultry
- AMS: Dairy
- https://www.fas.usda.gov/certificate-free-sale-point-contact-list

Section II: Purpose of Specific Export Certificate (S)

Algeria has a sanitary veterinary certificate requirement for all animal products and products of animal origin. However, the Veterinary Services at the Ministry of Agriculture negotiates certificates bilaterally with countries to meet Algerian requirements. In 2009, the Ministry of Agriculture's Veterinary Services implemented the requirement to negotiate veterinary health certificate bilaterally with the U.S.

Currently the Algerian market is open for: milk & milk products, turkey and chicken hatching eggs and one-day chicks as well as bovine embryos. Certificates for milk and milk products as well as turkey day-old chicks and hatching eggs were agreed respectively in 2004 and 2007. In 2020, the two regulatory agencies agreed on the certificates for bovine embryos and chicken day-old chicks and hatching eggs. Bovine semen, beef cattle, and dairy breeding cattle certificates are still under discussion.

Section III: Specific Attestations Required on Export Certificates

Sanitary certificates for Algeria are required to be bilingual (French and English).

A bilateral export certificate for dairy and dairy based products for export from the United States to Algeria was negotiated between Algeria and the United States in 2004 and updated in 2011. Applicants must request sanitary certificates for Algeria from AMS. The applicants must complete the Algeria-Sanitary Certificate request worksheet found at: https://www.ams.usda.gov/services/imports-exports/dairy-exports/dairy-sanitary-certificates.
The applicants must follow the instructions and explanation found in the link above for filling out the worksheet.

A non-GMO certificate needs to accompany plants and plant products to attest that the plant material has not undergone any transfer or modification of genes. Genetically engineered plant material importation, production, distribution, and commercialization as well as their utilization is prohibited by the Ministry of Agriculture's Decree of December 24, 2000 (published in the Official Journal on January 7, 2001). Algeria makes an exception to this requirement for research purposes.

Section IV: Government Certificate's Legal Entry Requirements.

A certificate of conformity and quality as well as a certificate of origin are mandatory for all imported products along with the customs documents (bill of lading and commercial invoice). The original

documents need to accompany the shipments. Original documents need to be presented at port of entry. Each shipment requires a certificate of conformity and quality as well as a certificate of origin. Certificates of origin are delivered by Chambers of Commerce. Certificates of conformity and quality are delivered by Government Agencies.

The regulation regarding the conformity control at the borders can be found at:
https://www.commerce.gov.dz/reglementation/decret-executif-n-deg-05-467
The conformity control is performed before the clearance of the imported products based on a file presented to the inspectorate at the borders by the importer or by his duly authorized representative. The file includes:

- the declaration of the importation of the product, duly filled in by the importer
- a certified copy of the extract from the trade register a certified copy of the invoice
- the original of any other document (sanitary and phytosanitary) required by the regulations in force and relating to the conformity of the imported products.

More information on Customs requirements can be found at:

- https://douane.gov.dz/spip.php?rubrique30&lang=fr

Effective October 22, 2017, a new requirement to regulate imports of products destined for resale as is, was enforced. The requirements apply to non-agricultural as well as, agricultural products. Any imported goods for resale as is, requires the importer to deposit 120% of the import transaction value with an Algerian Bank, 30 days prior to shipment. In addition, a certificate of free movement (Free Marketing/Movement) of the product in the country of origin or provenance is required for the products destined for resale as is. (see below).

Effective January 1, 2018, banking domiciliation's applications must include the following documents:

a) Sanitary and Phytosanitary certificates delivered to the importer by the Ministry of Agriculture, Rural Development regarding imports of (bananas, wheat, barley**,** garlic, beef and fish except sardines).
b) Prior technical authorization delivered by the Ministry of Commerce related to the import of cosmetics and toxic products.
c) Certificate of free movement of the product in the country of origin or provenance, established by a duly empowered authority in the exporting country and / or of origin attesting that the goods to be imported except (bananas, wheat, barley, beef, garlic and fish), are actually and freely marketed in their territory in accordance with the provisions under article 12 of the executive decree no12-203 of May 06, 2012 relating to the rules applicable for the security of the products. The certificate is delivered by the respective Chambers of Commerce. A copy of the certificate is available in the appendix of this report.

In addition, to the certificate requirements, the temporary additional safeguard duty (Droit Additionnel Provisoire de Sauvegarde, (DAPs), implemented in January 2019 and revised in April 2019 remains in

effect. The Algerian Ministry of Commerce indicated in a September 2020 press report that the list of products subject to the DAPs would be extended, however, the Ministry has yet to publish a new list.

For background, effective in January 2019, 1,095 items of which 658 are food items and 437 industrial products are subject to a temporary additional safeguard duty (Droit Additionnel Provisoire de Sauvegarde, (DAPs). This temporary duty replaces the import ban implemented in 2018. The temporary duty is an additional tax added to the customs duty and the Valued Added Tax (VAT) that are the responsibility of the importer.

The list of goods subject to the temporary additional safeguard duty and the corresponding rates were published in the Journal Officiel No 06 of January 27, 2019 as part of the Ordinance of January 26, 2019. Food items represent 60 percent of the list. Most of the food items listed are processed and high value products. In April, 2019, the Ordinance of April 8, 2019, published in the Journal Officiel No.26 modified the previous decree to exempt tree nuts, peanuts, dried raisins, dried fruits, butter, and fresh or chilled beef from the DAPs. The revision removes the 30 percent additional duty on tree nuts, 70 percent additional duty on peanuts, butter and dried fruits, and the 50 percent additional duty on beef. All these rates were in addition to an existing 30 percent customs duty and a 19 percent value added tax (VAT).

An English-language version of the detailed DAP list can be found in FAS reports at: https://apps.fas.usda.gov/newgainapi/api/Report/DownloadReportByFileName?fileName=Trade%20Policy%20Update_Algiers_Algeria_4-25-2019.

The original full revised list in French with the current DAPs rate can be found at: https://www.joradp.dz/FTP/jo-francais/2019/F2019026.pdf.

Section V: Other Certification/ Accreditation Requirements:

The May 7, 2015 Order (published in the JO. No44 of August 19, 2015) modifies and completes the July 14, 2002 Order, (published in the JO. No 62 September 15, 2002) that establishes the list of plant varieties that require authorization prior to importation and specifies the phytosanitary requirements. Importation of seeds and plants for reproduction and / or propagation is subject to technical import authorization prior to importation.

The phytosanitary authority (DPVCT) of the Ministry of Agriculture issues the import authorization at the request of the importer at least thirty (30) days before the planned date of import. This authorization is valid for three months from the date of signature and is only valid for one shipment.

The importer must submit an application to request the importation of seeds and seedlings. The file consists of the following:

- a request for the technical import authorization
- the agreement of the activity if the importer is producing seeds and seedlings
- the agreement of the activity if the importer is selling seeds and seedlings

- a farmer's identification card for those engaged in agricultural production
- a phytosanitary certificate issued by the official phytosanitary services of the production zone that must be free, attesting that the plant material is subject to control and monitoring by the phytosanitary services of the production area;
  a certification scheme for certified material or product
- a certificate of non-GMO attesting that the plant material has not undergone any transfer or modification of genes.
- an International Orange newsletter (for any dry seed).

Forms are available for potato seeds and plant material of seedling at:
http://madrp.gov.dz/agriculture/services-phytosanitaire/procedures/

The April 7, 2004 Order (published in JO. No 07 of January 23, 2005) amends and supplements the Order of May 21, 1995 fixing the phytotechnical and phytosanitary standards for imports of seeds and seedlings of vegetables, cereals, fruits and viticulture. This decree lists the crops and seeds with the standards for (varietal purity, humidity, germination rates for the different categories as well as the phytosanitary standards for seeds).

A certificate of non-GMO attesting that the plant material has not undergone any transfer or modification of genes is required. Genetically engineered plant material importation, production, distribution, and commercialization as well as their utilization is prohibited by the Ministry of Agriculture's Decree of December 24, 2000 (published in the Official Journal on January 7, 2001) except for research purposes. The plant material includes live plants or pieces of live plants, including their dormant buds, tendrils, grafts, tubers, rhizomes, cuttings, shoots, seeds intended for propagation and reproduction.

Regarding animal products: the November 16, 1991 Executive Decree No 91-452 (published in the JO. No 59 of November 20, 1991), regulates veterinary inspections at border posts. All products listed in the law are subject to sanitary authorization prior to import. This authorization is called "derogation sanitaire". This authorization is required for all animal products except processed products with animal origin, concentrates for animal feed and pets. This authorization certifies that no reportable disease has been reported in the country of origin. This document is delivered by the Office of Veterinary Services at the Ministry of Agriculture.

Starting December 31, 2021, imports of products or goods destined for resale as is, are subject to the March 9, 2021 decree No 21-94 regulation requiring importers to import raw materials, and products and goods for resale as is, with electronic trade register bearing homogeneous activity codes belonging to a single sub-group activity. The purpose of this decree is to modify and supplement certain provisions of the November 30, 2005 decree No 05-458 amended and supplemented, fixing the terms carrying out import of raw materials, products for resale as is. Importers will have to have an electronic trade register for each single sub-group of products they import. For example, if an importer used to import almonds and other tree nuts, pulses or several food products under one trade register for food, now, he is required to have an electronic trade register for tree nuts, another for pulses and another for each sub-group.

Commercial companies are required to subscribe, as appropriate, to one of the specifications setting the conditions and commitments for import of raw materials, products and goods intended for resale as is. The specifications are set in the annexes attached to the decree. The certificate of compliance with the conditions, provided in Article 5 of this decree, are issued only after subscription to one of the specifications listed in the decree. The compliance certificate model along with the conditions and specifications, are set respectively in appendices 1, 2 and 3 of the decree.

In the event of non-compliance with the conditions provided in this decree, the certificate is withdrawn, and the withdrawal decision is notified to the trading company as well as to the involved institutions.

By December 31, 2021, importers of those goods should be in compliance with the new regulation. After this period, trade registers not in accordance with the provisions of this decree become invalid.
