

Required Report: Required - Public Distribution

Date: July 16,2020

Report Number: TU2020-0020

Report Name: Food and Agricultural Import Regulations and Standards
Export Certificate Report

Country: Turkey

Post: Ankara

Report Category: FAIRS Export Certificate Report

Prepared By: Nergiz Ozbag

Approved By: Christine Strossman

Report Highlights:

This FAIRS Export Certificate Report for Turkey 2020 lists the major export certificates and other requirements expected by the Turkish government for food and agricultural products imports to Turkey. This report should be read in coordination with the Food and Agriculture Import Regulations and Standards (FAIRS) -Annual Country Report for Turkey -2020, which outlines specific requirements for food and agricultural products imports into Turkey and can be accessed via the link.

<https://gain.fas.usda.gov/#!/search>. It was prepared by the Office of the USDA Foreign Agricultural Service in Ankara, Turkey for U.S. exporters of food and agricultural products.

APPENDIX-IV: The list of U.S. competent certifying authorities recognized by Ministry of Agriculture and Forestry

APPENDIX-V: Some of the sample Veterinary Health Certificates

Disclaimer

This report is prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Ankara, Turkey, for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. Exporters should also check [FSIS Export Library](#) online and [APHIS iregs](#) website to ensure there is approval for sending products to Turkey.

FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

EXECUTIVE SUMMARY:

The report provides information on export certificates that the Turkish government requires. The Ministry of Agriculture and Forestry (MinAF) is the responsible authority for preparing and implementing policy and legislation related to food and agricultural product safety. Products imported into Turkey must meet existing legislation and must be accompanied by the proper certificates at the port of arrival. The MinAF identifies food and agricultural products which must be accompanied by an "original certificate" stating the safety of animal and plant health of the product in question. Due to the COVID-19 outbreak, the MinAF "temporarily accepts" copies of certificates. However, originals must be provided later. Some of the products that require plant/veterinary health certificates are listed in the appendixes of this report. The exporter must be in close communication with importers in Turkey to find out the latest requirements at the time of export to prevent detainment of cargo.

SECTION I: List of All Export Certificates Required by Turkey (Matrix)

This is the list of certificates required by Turkey for import of food and agriculture products.

Product	Title of Certificate	Attestation Required on Certificate	Purpose	Requesting Ministry
Animals, certain animal products, certain plants (listed in FAIRS Annual Country Report for Turkey)	Control Certificate	It is an import license that states whether or not the product is eligible for importation	Import License	Ministry of Agriculture and Forestry (MinAF)
Sheep/Goat Intestines (Cleansed-Untreated)(This certificate is valid until 7/1/2020 and there will be NEW Certificate which will be valid from 7/1/2020. Please see both in the Appendix IV)	Veterinary Health Certificate	Animal health attestation, Public health attestation	Animal Health, Public Health	MinAF
Female Breeding Cattle	Veterinary Health Certificate	Health status of animals	Animal Health	MinAF
Domestic Rabbits	Origin Veterinary Health Certificate	Identification and origin of animals, Health status of animals, Health status of the colony of origin, Health Status of the United States	Animal Health	MinAF
Registered Horses for breeding and production	Health Certificate	Health information of animals	Animal Health	MinAF
Ovine and Caprine semen	Health and Origin Certificate	Health information of animal country and zone information of animals and semen	Animal Health, Product Safety	MinAF
Breeding Bull	Origin and Veterinary Health Certificate	Health status of animals Health Status of the United States	Animal Health	MinAF
Domestic Bovine	Veterinary Health	Health information	Animal	MinAF

Animals intended for fattening	Certificate		Health	
<i>In vivo</i> derived embryos of domestic animals of the bovine species	Veterinary health certificate	Health information	Animal Health, Product Safety	MinAF
Honey and apiculture products intended for human consumption	Veterinary Health Certificate	Honey is coming from beehives in which the American foulbrood disease does not occur, and honey is fit for human consumption	Animal Health, Public Health	MinAF
Animal products for the manufacture of technical products (including pharmaceutical products)	Health Certificate	Animal products that satisfy the animal health requirements specified in the certificate	Animal Health, Product Safety	MinAF
Domestic dogs, cats and ferrets	Veterinary Health and Origin Certificate	Country of origin, country of dispatch, Health information of animals	Animal Health	MinAF
Poultry meat	Health Certificate	Animal health attestation, Public health attestation	Animal Health, Public Health	MinAF
Registered Horses for racing, competition and cultural events	Health Certificate	For the re-entry of registered horses for racing, competition and cultural events into Turkey after temporary export for a period of less than 30 days, Health information of animal	Animal Health	MinAF
Animal casings	Animal Health Certificate	Health status of animals which casings derived from; Approval of establishments by the competent authority, certificate is for	Animal Health, Product Safety	MinAF

		veterinary purposes only and must accompany the consignment until it reaches the Turkish border inspection post		
Treated hides and skins of ungulates,	Animal Health Certificate	Health status of animals, Health Status of the exporting country, Safety of product	Animal Health, Product Safety	MinAF
Live ratites (large, flightless birds)	Origin Veterinary Health Certificate	Health information of animal	Animal Health	MinAF
Ovine and Caprine Semen	Health and Origin Certificate	Health information of animal	Animal Health	MinAF
Domestic rabbits	Origin Veterinary Health Certificate	Health information of animal	Animal Health	MinAF
Sheep's untreated wool	Animal Health Certificate	Health status of animals from which sheep's wool was obtained	Animal Health, Product Safety	MinAF
Sheep's treated wool	Animal Health Certificate	Health status of animals from which sheep's wool was obtained	Animal Health, Product Safety	MinAF
Semen of domestic animals of bovine species collected, processed and stored before 12/31/2004	Veterinary Health Certificate	Health information of animal, Origin of the semen	Animal Health and Product Safety	MinAF
Semen of domestic animals of bovine species	Veterinary Health Certificate	Health information of animal Origin of the semen	Animal Health and Product Safety	MinAF
Primates	Animal Health Certificate	Health information of animal	Animal Health	MinAF
Animal casings to Turkey intended for export to the European Community	Animal Health Certificate	Animal Health Attestation	Animal Health	MinAF
Bumble bees	Health Certificate	Health information of	Animal	MinAF

(Bombus Spp.) Bred under environmentally controlled conditions within recognized establishments		animal	Health	
Queen Bees And Queen Bumble Bees (Apis Mellifera and Bombus Spp.) and their attendants	Health Certificate	Health information of bees and hives	Animal Health	MinAF
Day-old chicks other than of ratites	Veterinary Health Certificate	Animal health attestation, Public Health Additional Guarantees, Additional Health Requirements, Animal transport attestation	Animal Health, Public Health	MinAF
Hatching Eggs of Poultry other than of Ratites	Veterinary Health Certificate	Animal health attestation Animal transport attestation	Animal Health	MinAF
Fresh or chilled hides and skins of ungulates	Veterinary Health Certificate	Health status of animals Health Status of the exporting country Safety of product	Animal Health, Product Safety	MinAF
Certain birds other than poultry	Animal Health Certificate	Health information of animal	Animal Health	MinAF
Fresh, chilled, frozen meat (carcass) of domestic bovine animals	Veterinary Health Certificate	Animal Health Attestation, Public Health Attestation	Animal Health, Public health	MinAF
Ova and Embryos of the Ovine and Caprine Species (Sheep and Goats)	Veterinary Health Certificate	Health information of animal	Animal Health	MinAF
Veterinary Health Certificate for Dairy Products (Derived From Milk of Cows, Ewes, Goats And	Veterinary Health Certificate	Public health attestation, Animal health attestation	Animal Health, Public health	MinAF

Buffaloes For Human Consumption Intended For Exportation To The Republic of Turkey				
Gelatin for human consumption	Veterinary Health Certificate	Health attestation	Animal Health, Public health	MinAF
Collagen for human consumption	Veterinary Health Certificate	Health attestation	Animal Health, Public health	MinAF
Egg Products for human consumption (note: the United States and Turkey have not come into agreement on this protocol)	Veterinary Health Certificate	Animal health attestation, Public health attestation	Animal Health, Public Health	MinAF
Fishery products intended for human consumption	Veterinary Health Certificate	Public health attestation, Animal health attestation for fish, crustaceans of aquaculture origin	Animal Health, Public health	MinAF
Aquaculture animals for farming, relaying, put and take fisheries and open ornamental facilities	Veterinary Health Certificate	Health information Transport and labelling requirements	Animal Health, Public Health	MinAF
Ornamental aquatic animals intended for closed ornamental facilities	Veterinary Health Certificate	Health information Transport and labelling requirements	Animal Health	MinAF
Wild carnivores	Animal Health Certificate	Health information of animals	Animal Health	MinAF
Fish Oil Not Intended For Human Consumption To Be Used As Feed	Veterinary Health Certificate	Health information of product	Product Safety	MinAF

Material or For Purposes Outside The Feed Chain				
Processed Animal Protein Not Intended For Human Consumption, Including Mixtures And Products Other Than Pet food Containing Such Protein	Veterinary Health Certificate	Health information of product	Product Safety	MinAF
<u>Dog chews</u>	Veterinary Health Certificate	Health information of product and animals from which the dog chews were produced	Product Safety	MinAF
Processed Pet Food Other Than Canned Pet Food	Veterinary Health Certificate	Health information of product and of animals from which the pet food was produced	Product Safety	MinAF
Hay and straw	Health Certificate	Health information of product and animal health status of hay or straw's origin area	Product Safety	MinAF
Canned Pet food	Veterinary Health Certificate	Health information of product and of animals from which the canned food was produced	Product Safety	MinAF
Highly Refined Chondroitin Sulphate, Hyaluronic Acid, Other Hydrolysed Cartilage Products, Chitosan, Glucosamine, Rennet, Isinglass And Amino Acids Intended For Human Consumption	Veterinary Health Certificate	Public health attestation	Public Health	MinAF
Plants and plant product	Phytosanitary Certificate	Plant health attestation	Plant Health	MinAF
Plants and plant product	Re-export Phytosanitary Certificate	Plant health attestation	Plant Health	MinAF

Food products of plant origin	Free Sale Certificate/Health Certificate	Product is fit for human consumption, sold freely in the country of origin	Food Safety	MinAF
Materials and articles in contact with foods	Declaration given by producer or exporter	Product is fit for contact with foods	Product Safety, Food Safety	MinAF
Alcoholic beverages	Certificate of Age	According to legislation where necessary, aging period of product	Age of product	MinAF

Section II: Purpose of Specific Export Certificate(s)

Please refer to the Matrix under Section I.

Section III. Specific Attestations Required on Export Certificate(s)

A **Phytosanitary Certificate** is required for unprocessed agricultural products such as cotton, oilseeds, grains, nuts, wood products, etc. It should be issued by the relevant competent plant protection authority of the producing or exporting country according to the sample certificate provided in APPENDIX-I. The Certificate may also be issued in accordance with the International Standards for Phytosanitary Measures (ISPM)-12 rules and must be issued in Turkish or English. Special conditions related to plant and plant products are given in Annex 4 of the Quarantine Regulation, which is available in Turkish [here](#) and English [here](#).

Any information about special conditions should be provided clearly in the Phytosanitary Certificate or can be supplied as an additional declaration by referring to the Phytosanitary Certificate's relevant section.

The Phytosanitary Certificate must be issued at most 14 (fourteen) days prior to the **shipment date**. Additionally, for Certificates on which the **inspection date** and the **date of issue** are separately stated as is the case in the United States, the period between the **inspection date** of the product and the **shipment date** of the product must be at most 14 (fourteen) days. Inspection date of the product must be stated on the Phytosanitary Certificates issued after the shipment date. Exporters should take note that this regulation differs from EU regulations, which require that a commodity depart a country within 14 days of issuance of a phytosanitary certificate, not the inspection date.

There should not be any erasure or scrapings on the Phytosanitary Certificate. Each correction made on a certificate should be approved and signed by the relevant competent authority.

A **Free Sale Certificate/Health Certificate** is required for processed food and feed of plant origin, such as canned food, pet food of plant origin, vegetable juices, energy drinks, alcoholic beverages, etc., and for materials and articles which are intended to come into contact with food.

A Free Sale Certificate/Health Certificate should have one of the statements such as “product is sold and traded freely in USA,” “product is produced in compliance with the legislation of USA,” “product does not possess any risk to human and/or animal health,” “product does not possess any risk in the aspect of food and/or feed safety,” “test results of product are in compliance with legislation,” “product is fit for contact with food.”

If a product is required both quarantine and food/feed safety controls and accompanied with Phytosanitary Certificate, Free Sale Certificate/Health Certificate is not required for the product in question.

Free Sale Certificate/Health Certificate should be issued on behalf of producer or exporter and must be endorsed by the competent authority of the origin or exporting country.

Effective October 1st, 2018, the U.S. Food and Drug Administration (FDA), as part of its implementation of the Food Safety Modernization Act (FSMA), has updated the format of the Certificate of Free Sale (COFS), which is called now “Certificate to a Foreign Government”. The FDA issues this new format to U.S. manufacturers and exporters who choose to use them. MinAF has been informed about the new format of FDA’s Certificate. The previously issued FDA COFS using the old format are still valid for the remainder of the period of validity indicated on the Certificate.

MinAF publishes the list of state or local certifying competent authorities which issue free sale certificate(s)/health certificate(s) recognized for food and feed of plant and plant origin from other countries, including the United States. The list is available for recognized U.S. competent authorities [here](#) in Turkish language in Turkish language. The current list of competent authorities recognized for the United States is given in APPENDIX-IV. The USDA/FAS Office of Agricultural Affairs at the U.S. Embassy may need to provide Turkish officials with a document confirming the authority of the local or Federal certifier if not already included on the above list.

A copy of **Certificate of Age** is provided for products which require aging (such as whiskey) at the time of pre-notification of the product. The original copy of this certificate should be supplied at the time of import.

For the materials and articles which are intended to come into contact with food, a declaration from the producer or exporter is accepted as sufficient to meet Turkey’s requirement. This declaration should contain information such as the name and amount of product, the name and address of the producer or exporter, and the statement “product is fit for contact with foods.”

Veterinary Health Certificates are required for animal and animal origin products such as livestock, gelatin, collagen, hides and skins, dairy products, etc. Certificates under the name of “Health Certificate,” “Veterinary Health Certificate” or “Origin and Veterinary Health Certificate” guaranteeing animal health and public health status are accepted as Veterinary Health Certificates by MinAF.

A sample Veterinary Health Certificate will be provided at the time of receiving a Control Certificate (Please see Section VI, Section IX and Section X of Turkey Import Procedures in the Food and Agricultural Import Regulations and Standards (FAIRS) Annual Country Report for Turkey-2020). The

content of a sample Veterinary Health Certificate should be the same as the official Veterinary Health Certificate, however, it may or may not contain attestation(s).

MinAF outlines a format for Veterinary Health Certificates for certain animal/animal-origin products. These formats are available at the MinAF [website](#). Please see some of those sample Veterinary Health Certificates for certain products at the links given in APPENDIX-V.

It is important to provide Veterinary Health Certificates with exactly the same content and format if the format is identified for the product by MinAF. If the format is not identified for the product in question, then the Veterinary Health Certificate should contain information such as:

- the name of the exporting country/region;
- the competent authority;
- the exporter;
- the importer;
- the country of origin;
- the species of animal from which the product is derived/produced;
- the description and amount of product;
- information related to transport, and;
- if it is for human consumption, the statement “fit for human consumption”;
- for products not for human consumption, the intended use must be indicated, such as “for feed use,” “for soap industry”, etc.
- depending on the type of product, statements related to animal and/or public health.

MinAF maintains a “List of banned countries & substances due to animal diseases” for animal and animal products on their website at <http://yasakli.gkgm.gov.tr/> in the Turkish language. Some animal products on this list are only allowed to be imported after special treatment to eliminate risk(s). The Veterinary Health Certificate should contain a detailed description of this treatment as an additional declaration in that case. Additional declarations may also be given separately. In that case, the authority that issues the Veterinary Health Certificate must refer to the original Veterinary Health Certificate and sign/stamp it.

A **Certificate of Origin** is also required for animal and animal-origin products to support the product’s health status, with respect to the animal diseases of the producing or exporting country, if the origin is not indicated in the Veterinary Health Certificate.

Section IV: Government Certificate Legal Entry Requirements

A **Free Sale Certificate/Health Certificate**, unless indicated otherwise, is valid for one year, but may not exceed the shelf life of the product.

Free Sale Certificate/Health Certificate should have the name and origin of the product, name of the producer or exporter, name and the signature of the person who issues it and one of the statements listed in Section III, paragraph six of this report. The original copy of the Free Sale Certificate/Health Certificate is given to the provincial directorate of MinAF in the first consignment’s import controls and it is kept in the Food Safety Information System of MinAF. The original copy of the Free Sale

Certificate/Health Certificate can be used in multiple consignments' import controls until validity of the Free Sale Certificate/Health Certificate is expired.

If the Free Sale Certificate/Health Certificate is issued for a specific shipment, it should contain the lot number and the quantity (weight, volume or number of units) of the shipment in question and can be used only once for that shipment.

Due to the COVID-19 pandemic, MinAF “temporarily accepts” Free Sale Certificate/Health Certificates to be e-mailed to the provincial directorate which carries out import controls, by the issuing authority in U.S. However, the original Free Sale Certificate/Health Certificate must be provided later. Exporters should be in close communication with importers in Turkey to be informed about official e-mail addresses for certificates to be e-mailed and the time frame of this “temporary implementation.”

For the products which are subject to phytosanitary controls; a Free Sale Certificate/Health Certificate is not required if the product is accompanied by Phytosanitary Certificate.

Departure of the shipment *must be no later than 14 days following inspection*. Note that it is the inspection date and not the date of issuance of the Phytosanitary Certificate that initiates the 14-day clock. Shipments will be rejected if the time between inspection and the “shipment date” exceeds 14 days.

The original Phytosanitary Certificate should accompany products, and products may be rejected at the port if the original certificate does not accompany the products. Due to the COVID-19 pandemic, MinAF “temporarily accepts” copies of Phytosanitary Certificates. However, the original copy of Phytosanitary Certificates must be provided later. Exporters should be in close communication with importers in Turkey to be informed about the timeframe of this “temporary implementation.”

Please see the HS CODES of plant and plant products which require an accompanying Phytosanitary Certificate in APPENDIX-II.

The following products do not need to be accompanied by Phytosanitary Certificate;

- Fresh and dried fruits and vegetables not exceeding three kilograms for own consumption
- Noncommercial bouquet of flower or garland not more than one unit
- Plant and plant products donated by foreign people to government agencies or charitable institutions (quarantine controls are carried out at the customs and products are allowed in after being cleared)
- Wooden packaging materials carrying goods and marked according to ISPM-15 rules

For alcoholic beverages, certificates issued by the competent authority of the country where the product is bottled are also acceptable.

MinAF accepts the validity of the **Veterinary Health Certificate** as indicated by the issuing authority. Unless otherwise indicated, for the animal products excluding genetic materials (30 days for genetic materials), validity of the certificate is seven days for products coming by air, fifteen days for products coming by road, 30 days for products coming by rail, and 60 days for products coming by sea. The original copy of Veterinary Health Certificate must be provided when the animal or animal-origin product arrives at the customs or border inspection posts. Due to the COVID-19 pandemic MinAF “temporarily

accepts” Veterinary Health Certificates to be e-mailed to MinAF’s relevant sections such as the provincial directorate or Veterinary Border Inspection which carries out import controls by the issuing authority in the U.S. However, the original Phytosanitary Certificates must be provided later. Exporters should be in close communication with importers in Turkey to be informed about official e-mail addresses for certificates to be e-mailed and the timeframe of this “temporary implementation.”

According to the Turkish import regulation, export certificates for animals and animal products to Turkey must be signed by an official veterinarian in exporting countries within two days prior to shipment. Since February 2018, semen export certificates do not have to be endorsed within two days prior to shipment from the United States. MinAF now accepts the export certificates for semen to be endorsed within the validity period, which is 30 days, from the United States. [Here](#) is more information on the latest update to semen import regulations in Turkey. Please see HS CODES of animal and animal sourced products which need to be accompanied by Veterinary Health Certificate in APPENDIX-III.

Section V: Other Certification/Accreditation Requirements to Ensure Market Entry

Before December 2011, the majority of food and non-food imports required a “**Control Certificate**” which is considered import pre-permission and states whether the product is eligible for import or not. However, according to the import regime adopted in December 2011, Control Certificates are required only for animal, animal products, and certain plant products. To learn more information about import requirements that apply or are associated with the products being certified in conformance with Turkish food and agricultural laws and regulations, please see Section VI and Section X of Gain Report on Food and Agricultural Import Regulations and Standards (FAIRS)- Country Report for Turkey 2020.

APPENDIX - I: Sample Phytosanitary Certificate

1 - Name and address of exporter		2 - PHYTOSANITARY CERTIFICATE NO: EC/TR A ORIGINAL	
3 - Declared name and address of consignee		4 - Plant Protection Organization of Turkey to Plant Protection Organization(s) of	
		5 - Place of origin	
6 - Declared means of conveyance		 REPUBLIC OF TURKEY MINISTRY OF AGRICULTURE AND FORESTRY	
7 - Declared point of entry			
8 - Distinguishing marks: number and description of packages: name of the product: botanical name of plants		9 - Quantity declared	
			
10 - This is to certify that the plants, plant products or other regulated articles described above: - have been inspected and/or tested according to appropriate official procedures, and - are considered to be free from the quarantine pests specified by the importing country, and - to conform with the current phytosanitary requirements of the importing country, including those for regulated non-quarantine pests, and - are deemed to be practically free from other pests.			
11 - Additional declaration			
			
DISINFESTATION AND/OR DISINFECTION TREATMENT		18 - Place of issue	
12 - Treatment		Date Name and signature of authorized officer Stamp of the Organization	
13 - Chemical (Active Ingredient)	14 - Duration and Temperature		
15 - Concentration	16 - Date		
17 - Additional Information			

Yasal Uyarı: Bitki Sağlık Sertifikasını sahte olarak düzenleyen, başkalarını aldatarak şekilde değiştiren veya kullanan kişiler 5237 sayılı Türk Ceza Kanunu 204. Maddesine göre ild yıldan beş yıla kadar hapis cezası ile cezalandırılır.

Legal Notice: The person who arrange fraudulent Phytosanitary Certificate or change or use the Phytosanitary Certificate in such a way to deceive other people shall be punished with penalty of imprisonment up to from two and to five years in accordance with Article 204 of Turkish Penal Code numbered 5237.

APPENDIX - V

Some of the sample **Veterinary Health Certificates** are accessible at the hyperlinks below. Also the [FSIS Export Library](#) and [APHIS iregs](#) websites list animal and animal products which are eligible for export to Turkey and the corresponding certificates.

[Queen Bee;](#)
[Dairy Products](#)
[Female Breeding Cattle;](#)
[Domestic Rabbits;](#)
[Registered Equidae \(Horses\) for Breeding and Production;](#)
[Ovine and Caprine Semen;](#)
[Breeding Bull;](#)
[Domestic Bovine Animals Intended For Fattening;](#)
[In Vivo Derived Embryos of Domestic Animals of the Bovine Species;](#)
[Sheep/Goat Intestines \(Cleansed-Untreated\) 1 - valid until 7/1/2020](#)
[Sheep/Goat Intestines \(Cleansed-Untreated\) 2 - valid from 7/1/2020](#)
[Honey and Apiculture Products Intended for Human Consumption;](#)
[Animal Products for the Manufacture of Technical Products \(incl. pharmaceutical products\);](#)
[Domestic Dogs, Cats and Ferrets;](#)
[Poultry Meat](#)
[Registered Horses and Horses for Breeding and Production](#)
[Re-entry of Registered Horses for racing, competition and cultural events](#)
[Animal Casings;](#)
[Treated Hides and Skins of Ungulates;](#)
[Live Ratites \(large flightless birds\) ;](#)
[Ovine and Caprine \(Sheep and Goat\) Semen;](#)
[Domestic Rabbits;](#)
[Sheep's Untreated Wool;](#)
[Sheep's Treated Wool;](#)
[Semen of Domestic Animals Of the Bovine Species Collected, Processed And Stored Before 31 December 2004;](#)
[Semen of Domestic Animals of the Bovine Species;](#)
[Primates;](#)
[Animal Casings for Export to the European Community;](#)
[Bumble Bees \(Bombus Spp.\) Bred Under Environmentally Controlled Conditions within Recognized Establishments;](#)
[Queen Bees And Queen Bumble Bees \(Apis Mellifera And Bombus Spp. \) and Their Attendants;](#)
[Fresh or Chilled Hides and Skins of Ungulates;](#)
[Certain Birds Other Than Poultry;](#)
[Fresh, chilled, frozen meat \(carcass\) of domestic bovine animals](#)
[Ova and Embryos of the Ovine and Caprine Species;](#)
[Gelatin Intended for Human Consumption;](#)
[Collagen Intended for Human Consumption;](#)
[Egg Products for Human Consumption;](#)
[Fishery Products;](#)
[Day-old Chicks Other Than of Ratites;](#)
[Hatching Eggs of Poultry Other Than of Ratites;](#)

Aquaculture Animals for Farming, Relaying, Put and Take Fisheries And Open Ornamental Facilities;
Ornamental Aquatic Animals Intended For Closed Ornamental Facilities;
Wild Carnivores;
Fish Oil Not Intended for Human Consumption to be Used As Feed Material or For Purposes Outside
The Feed Chain;
Processed Animal Protein Not Intended For Human Consumption, Including Mixtures and Products
Other Than Pet food Containing Such Protein;
Dog chews;
Processed Petfood Other Than Canned Petfood;
Canned Petfood;
Highly Refined Chondroitin Sulphate, Hyaluronic Acid, Other Hydrolysed Cartilage Products, Chitosan,
Glucosamine, Rennet, Isinglass And Amino Acids Intended For Human Consumption;
Hay and Straw
