

Required Report: Required - Public Distribution

Date: December 16,2020

Report Number: HU2020-0012

Report Name: Food and Agricultural Import Regulations and Standards
Export Certificate Report

Country: Hungary

Post: Budapest

Report Category: FAIRS Export Certificate Report

Prepared By: Gellert Golya

Approved By: Kirsten Luxbacher

Report Highlights:

Hungary, as a member of the European Union (EU), applies EU regulations to the imports of agricultural products. U.S. export certification requirements for most products destined for the EU have been harmonized. Products not yet harmonized are subject to national regulations. Competent Hungarian authorities may need to be consulted, on a case-by-case basis, to address import requirements for some minor categories of non-harmonized products.

Author Defined:

Disclaimer

This report was prepared by the Office of Agricultural Affairs of the USDA Foreign Agricultural Service in Budapest, Hungary for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies may have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped.

FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.

Executive Summary

Hungary is a Member State of the European Union (EU). Certification requirements for most products destined for the EU market, including Hungary, have been harmonized. Therefore, this report should be read in conjunction with the [EU Food and Agricultural Import Regulations and Standards \(FAIRS\) Export Certificate Report](#). In case of specific import conditions and non-harmonized products, the [National Food Chain Safety Office](#) (in Hungarian) is the competent authority.

Section I. List of All Export Certificates Required by the Importing Country and Product Covered

Hungary has fully implemented EU regulations for the import of products of animal and plant origin. For additional information on U.S. export certifications for the EU market, please see the [USEU Brussels website](#).

Export certificates must be in the official language of Hungary, which is Hungarian. The [Department of Trade](#), Defense Industry, Export Control and Precious Metal Assay of the Government Office of the Capital City Budapest issues import licenses of agricultural products in accordance with EU legislation. Usually an exporter, or possibly an importer, applies to the authority filling out the [prescribed form](#) with all relevant details.

1. Export Certificates/Requirements for Animal Products

The United States is eligible to export some animal products to the EU. Import requirements for animal products exported to EU member states, such as Hungary, can be found at the [Food Safety Inspection Service \(FSIS\) website](#) along with samples of export certificates for different types of products.

For several products, the EU requires export establishments to be pre-approved based on submissions made by the U.S. Government. Agencies responsible for determining EU-eligible export establishments are FSIS, the [Animal and Plant Health Inspection Service \(APHIS\)](#), the [National Oceanic and Atmospheric Administration](#), the [Agricultural Marketing Service \(AMS\)](#), and the [Food and Drug Administration \(FDA\)](#). [Approved establishments](#) may be subject to EU inspection as well.

The EU requires that a veterinary and/or general health certificate accompany each shipment of animal products and be signed and dated prior to shipment. For non-harmonized exports of animal products to Hungary, the [prescribed bilingual certificates](#) (in Hungarian) are available at and must be submitted to the [Animal Health and Animal Welfare Directorate](#) (in Hungarian) of the National Food Chain Safety Office.

2. Export Certificates/Requirements for Live Animals

The EU imposes a number of general requirements for all veterinary health certificates. [Directive 2002/99/EC](#); Annex IV. 6. stipulates that certificates must be issued before the consignments to which they relate leave the control of the competent authority. Non-compliance will lead to the rejection of the shipment at the [Hungarian](#) or other [EU border entry/inspection point](#). Therefore, specific guidance and certificate forms are available on the [APHIS website](#). Bilingual Hungarian/English health certificates are available for some commodities/species. If the needed bilingual certificate is not listed below, please refer to the [English versions](#). It is the responsibility of the exporter to obtain a bilingual certificate.

Bovine embryos, Annex II – Bilingual health certificate for in vivo derived embryos collected in accordance with Council Directive 89/556/EEC.

Bovine semen Model 1: Bilingual health certificate for imports into and transits through the EU of bovine semen dispatched from a semen collection center where the semen was collected.

Bovine semen Model 3: Bilingual health certificate for imports into and transit through the EU of bovine semen dispatched from a semen storage center.

Poultry: Model bilingual veterinary certificate for hatching eggs of poultry other than ratites.

Pets (15 weeks of age or older): Model animal health certificate for imports into the EU of dogs, cats, and ferrets.

Other Animals: If the reptile, rodent, or amphibian is not traveling on the same plane as the owner, the owner must provide a letter to the transport broker or airline pet services authorizing the aircraft staff to be responsible for these animals while *en route* to Hungary, and also stating that the owner will resume responsibility for the pet upon arrival in Hungary.

3. Export Certificates/Requirements for Plant and Plant Products

EU plant and plant product import regulations have been harmonized and are published in a single [directive \(2000/29/EC\)](#). Unlike veterinary products, there is only one model certificate for all plant products in accordance with international regulations laid down by the [International Plant Protection Convention](#) of the Food and Agriculture Organization of the United Nations (FAO). For the United States, APHIS issues the required phytosanitary certificate with the requisite attestations to specific EU requirements.

4. Export certificates/requirements for non-harmonized products

There are a few products (e.g. zoo species, invertebrates, chinchilla fur, etc.) for which Hungary is not harmonized with EU legislation. In such cases, imports of these products are subject to Hungarian national legislation and import requests are assessed by the competent authorities on a case-by-case basis. The [National Food Chain Safety Office](#) (in Hungarian) is the competent authority for providing the specific import conditions on non-harmonized products.

Section II. Purpose of Specific Export Certificates

Imported products must meet existing member state requirements, and products must be accompanied by the proper certification at the port of arrival. In general, health certificates are required for all imported products of animal origin and phytosanitary certificates are needed for all plant products that could introduce pests into the EU. In accordance with EU legislation, certain products may have quality certificates that allow for reduced import duties. Other voluntary EU certificates allow for less stringent import control regimes.

Hungary is a member of the EU and conforms to all EU regulations and directives. Therefore, this report should be read in conjunction with the [EU FAIRS Certificate Report](#). It consolidates EU-27 requirements published by the USDA FAS Office in the U.S. Mission to the European Commission (USEU) in Brussels, Belgium. Country specific reports can be also accessed through the [FAS website](#).

III. Specific Attestation Required on Export Certificates

For the identity check of the shipment, agents of the food safety authority require the seal number of the container be printed on the certificates. A seal number on the Bill of Lading is not sufficient if these can be easily re-issued by private companies. If no seal number is present on the certificate, a physical check is necessary to verify the identity of the shipment. For some veterinary certificates, additional statements (declaration of BSE/TSE) need to be included.

IV. Government Certificate Legal Entry Requirements

For all veterinary health certificates, the EU applies general principles of certification defined in [Council Directive No. 2002/99/EC](#) and [Regulation \(EC\) No 854/2004](#). The regulation is directly applied in Hungary, and the referred council directive was incorporated into national law by the ministerial [Decree No. 19/2005](#) (in Hungarian) laying down animal health rules governing the production, processing, distribution and introduction of products of animal origin for human consumption. For detailed information, please consult the [EU FAIRS Certificate Report](#).

V. Other Certification/Accreditation Requirements

The National Food Chain Safety Office is the proper, competent authority in the matter of settlements of veterinary requirements with a third country. The specifications of this office must be executed for imports from third countries, if they are not specified by EU regulations.

Appendix I. Electronic Copy, Scanned Copy, or Outline of Each Export Certificate.
