

Required Report: Required - Public Distribution

Date: July 06,2020

Report Number: AS2020-0017

Report Name: Food and Agricultural Import Regulations and Standards
Export Certificate Report

Country: Australia

Post: Canberra

Report Category: FAIRS Export Certificate Report

Prepared By: Lindy Crothers

Approved By: Levin Flake

Report Highlights:

This report lists examples of the major export certificates and other documentation required by the Government of Australia for U.S. exports of food and agricultural products. Australia's import requirements for food and agricultural products are complex and change frequently.

DISCLAIMER: This report has been prepared by the USDA, Foreign Agricultural Service in Canberra, Australia for U.S. exporters of domestic food and agricultural products. Australia’s quarantine regulations are constantly changing. *The information provided is for example only.* While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation or because clear and consistent information about these policies was not available. It is essential that U.S. exporters verify the full set of import requirements with their Australian importer, who is normally best equipped to research such matters with local authorities, before any goods are shipped. **FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO AUSTRALIA’S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.**

Section IV: Government Certificate’s Legal Entry Requirements17

Section V: Other Certification/Accreditation Requirements.....17

Executive Summary

Summary

Australia has very strict quarantine requirements for imported food and agricultural products. Import permits and/or export certifications are required for most food and agricultural products entering the country. The information required to obtain an import permit is different for each product and can include such things as cooking/freezing times, 'area freedom from specific pest' declarations, and certification of container fumigation.

The Australian Department of Agriculture, Water and the Environment oversees the importation of all agricultural products entering Australia and maintains an on-line [Biosecurity Import Conditions \(BICON\) database](https://www.agriculture.gov.au/import/online-services/bicon) that is updated regularly. BICON has replaced the previous ICON database and contains more detailed information on the quarantine requirements for products entering the Australian market. Before deciding to export any food or agricultural product to Australia, U.S. exporters should first check with this website to ascertain whether they can meet Australia's requirements. If a product is not listed in the database, it is likely that it is not allowed entry to Australia. The full web site address is: <https://www.agriculture.gov.au/import/online-services/bicon>.

Import Permits

If an import permit is required, only an Australian-based individual or company can apply for the permit. Import permits are generally valid for two years and can be used any number of times during that period. The import permit will dictate the complete conditions under which the product may enter Australia. The BICON database also provides details of all the conditions that are required for each product. The information required differs greatly between products and can often differ for the same products from different regions.

U.S. exporters should work very closely with their Australian importers to ensure that *all* conditions are met **before shipping** any product. Failure to comply with the import requirements will result in delays or could lead to the product being denied entry into Australia.

Examples of Australian Export Certification Requirements

The requirements listed in the following section are provided as a **representative sample** of products that have been identified as having excellent prospects in the Australian market. Apart from these specific 'attestations,' which refer only to export certification requirements, products must meet a range of other criteria specific to each commodity that may include, but is not limited to, packaging requirements, pre-clearance (if applicable), treatment options, container conditions, fumigation rates, packaging, quarantine integrity and traceability. A large amount of additional information may be required for each shipment. U.S. exporters are advised to consult the [BICON database](https://www.agriculture.gov.au/import/online-services/bicon) and work with their importers to determine ALL import requirements.

Section I: List of Required Export Certificates

Examples of Export Certificate Attestations Required by the Australian Government (Department of Agriculture)

Product	Title of Certificate	Attestation Required
<p>Cherries – fresh</p> <p>From certain counties in California, Oregon, Washington State and Idaho ONLY</p> <p>An Import Permit IS NOT required.</p> <p>Full details on all requirements is available on the BICON database</p>	<p>APHIS Phytosanitary Certificate</p>	<p>Prior to export, the plants or plant products must be inspected or tested by the National Plant Protection Organization certified free from biosecurity pests.</p> <p>The consignment must be free from pests, diseases and inspected prior to shipment. To demonstrate compliance with this requirement the following must be presented on the <u>phytosanitary certificate</u>:</p> <p>i. The additional declaration: <i>“The cherries in this consignment were grown in [name(s) of county/counties and state] and were fumigated and packed in [name(s) of county/counties and state]. The cherries in this consignment were grown, fumigated, and packed either in counties that are free of fruit flies except Rhagoletis spp. or in areas that are located in excess of 15 kilometers from the epicenter of any exotic fruit fly declared areas.”</i></p> <p>The consignment must be fumigated prior to shipment at a rate of 48 grams/cubic meter (g/m³) for two hours at pulp temperatures of 13.9 degrees Celsius (°C) 1or greater at 30.1% chamber load. Compensated schedules (Appendix 1 of full case) may be used. To demonstrate compliance with this requirement you must present the following on a phytosanitary certificate:</p> <ol style="list-style-type: none"> 1. Evidence that the goods have been fumigated with methyl bromide at [insert applied dosage X g/m³] for [X hours] at [insert minimum temperature °C]; 2. The date of fumigation; and 3. The name and/or number of the fumigation facility. <p>The details of the packing house and relevant lot codes (i.e. grower lot numbers) for California consignments or State or Federal lot numbers for Pacific North West consignments must be recorded under the “distinguishing marks” section on the phytosanitary certificate.</p> <p>Cherries are usually air-freighted to Australia. If available, the</p>

Product	Title of Certificate	Attestation Required
		flight/aircan number/s can be endorsed on commercial documentation (e.g. airway bill) that cross references the phytosanitary certificate number. This is preferable but is not a mandatory condition of import.
<p>Table Grapes - fresh</p> <p>From certain approved counties of California only (Fresno, Kern, Kings, Madera, Riverside, San Luis Obispo, and Tulare).</p> <p>Growers and packers must be USDA registered</p> <p>An Import Permit IS NOT required</p> <p>Full details on BICON database</p>	<p>APHIS Phytosanitary Certificate</p>	<p>The grapes must have been grown and packed in California, be free from fruit fly.</p> <p>To demonstrate compliance with this requirement the following declarations must be presented on a phytosanitary certificate:</p> <ul style="list-style-type: none"> • <i>"The grapes in this consignment have been produced in California in accordance with the conditions governing the entry of fresh table grapes from California to Australia."</i> <p>AND either</p> <ul style="list-style-type: none"> • <i>"The fruit in this consignment was sourced and packed in California which is free of all economically significant fruit flies." OR</i> • <i>"The fruit in this consignment was sourced and packed in [insert name(s) of county/counties] which is an area free of all economically significant fruit flies." OR</i> • <i>"The fruit in this consignment was sourced and packed in [insert name of county] which is an area located in excess of 15 kilometers from the epicenter of any economically significant fruit fly declared areas."</i> <p>All packed table grapes must undergo mandatory pre-shipment fumigation with 6% carbon dioxide (CO₂) and 1% sulfur dioxide (SO₂) by volume for 30 minutes, delivered using forced air at a pulp temperature of 15.6°C (60°F) or greater. The chamber load must not exceed 30%.</p> <p>Note: The SO₂/CO₂ treatment must be completed prior to cold treatment and phytosanitary inspection and must be supervised by the Animal and Plant Health Inspection Service (APHIS) or an accredited certifying official.</p> <p>To demonstrate compliance with this requirement, the following must be presented on the phytosanitary certificate under the treatment section:</p>

Product	Title of Certificate	Attestation Required
		<ul style="list-style-type: none"> • The additional declaration "<i>SO₂/CO₂ fumigation completed;</i>" • The name of the treatment facility • The date of treatment • The dosage • The fumigation duration • The ambient air temperature during fumigation (°C); and • The grape pulp temperature during fumigation (°C). <p>Table grapes must be pre-cooled immediately after CO₂/SO₂ fumigation is completed.</p> <p><u>Cold Treatment Details</u></p> <p>Pre-Shipment Cold Treatment Fruit that has undergone pre-shipment cold treatment following SO₂/CO₂ fumigation must have the following details included under the treatment section in the phytosanitary certificate:</p> <ul style="list-style-type: none"> • “<i>Pre-shipment cold treatment completed;</i>” • The name of the treatment facility • The date of treatment completion • The grape pulp temperature during cold treatment (°C); and • The cold treatment duration. <p>In-Transit Cold Treatment Fruit that is subject to in-transit cold treatment following SO₂/CO₂ fumigation must have the following details included under the treatment section in the phytosanitary certificate:</p> <p style="padding-left: 40px;">The statement, “<i>Fruit is subject to in-transit cold treatment</i>” must be included in the treatment section.</p> <p>In addition to the statement on in-transit cold treatment, a record of temperature probe calibration (for all the probes) must be included as attachments to the phytosanitary certificate.</p> <p>For sea freight, container and seal numbers must be endorsed on the Phytosanitary Certificate or on commercial</p>

Product	Title of Certificate	Attestation Required
		documentation (e.g. Bill of Lading). If endorsed on commercial documentation, the Phytosanitary certificate number must also be referenced.
<p>Peaches, Nectarines (Fresh)</p> <p>Peaches and nectarines are permitted into Australia from California, Idaho, Oregon, and Washington ONLY</p> <p>An Import Permit IS NOT required</p> <p>Full details on BICON database</p>	<p>APHIS Phytosanitary Certificate</p>	<p>Prior to export, the plants or plant products must be inspected or tested by the National Plant Protection Organization according to appropriate procedures and be considered free from biosecurity pests.</p> <p>The consignment must be free from pests and diseases.</p> <p>To demonstrate compliance with this requirement the following declaration must be presented on a phytosanitary certificate:</p> <p>i. The statement <i>"The nectarines/peaches] in this consignment were grown, packed and fumigated in [Name of the county] in [Name of state] that are free of fruit flies, except Rhagoletis spp., or in areas that are located in excess of 15 kilometers from the epicenter of any exotic fruit fly declared areas and in accordance with the conditions governing entry of fresh stone fruit to Australia."</i></p> <p>The consignment must be fumigated prior to shipment at the rate of 48 g/m³ for two hours at pulp temperatures of 13.9°C or greater at not more than 38% chamber load. To demonstrate compliance with this requirement the following must be presented on the phytosanitary certificate:</p> <ul style="list-style-type: none"> • Evidence that the goods have been fumigated with methyl bromide at [insert applied dosage X g/m³] for [X hours] at [insert minimum temperature degrees Celsius]; • The date of fumigation; and • The name of the fumigation facility <p>All fruit must be sourced and packed by registered packing facilities and treated by facilities registered with the Animal and Plant Health Inspection Service (APHIS).</p> <p>The details of the packing house/treatment facility must be recorded under the "Distinguishing Marks" section on the phytosanitary certificate.</p>

Product	Title of Certificate	Attestation Required
		<p>If fruit is airfreighted to Australian territory, the container or aircan number/s and container seal number/s are preferred but not mandatory. Where available, these details can be endorsed on commercial documentation (e.g. airway bill) that cross references the phytosanitary certificate number.</p> <p>For fruit that is sea freighted to Australian territory, the containers must be applied a coded seal and the container and seal numbers must be included on the phytosanitary certificate.</p>
<p>Fresh Plums <i>Prunus salicina</i> , Apricots (<i>Prunus armeniaca</i>), and interspecific stone fruit hybrids (approved interspecific stone fruit hybrids are any combination of the following: <ul style="list-style-type: none"> •Apricots (<i>prunus armeniaca</i>); •Nectarines (<i>P. persica</i> var. <i>nucipersica</i>) •Peaches (<i>P. persica</i>); •Plums (<i>P. salicina</i>) <p>From approved counties in California ONLY (Madera, Fresno, Kings, Tulare and Kern)</p> <p>An Import Permit IS NOT required</p> <p>Full details on the</p> </p>	<p>APHIS Phytosanitary Certificate</p>	<p>Prior to export, the plants or plant products must be inspected or tested by the National Plant Protection Organization according to appropriate procedures and be considered free from biosecurity pests.</p> <p>The consignment must be free from pests and diseases.</p> <p>To demonstrate compliance with this requirement the following declaration must be presented on the phytosanitary certificate:</p> <p>i. The statement "<i>The [nectarines/peaches/apricots/interspecific hybrid stone fruit/plums] in this consignment were grown, packed and fumigated in [Name of the county] in [Name of state] that are free of fruit flies, except Rhagoletis spp., or in areas that are located in excess of 15 kilometers from the epicenter of any exotic fruit fly declared areas and in accordance with the conditions governing entry of fresh stone fruit to Australia.</i>"</p> <p>The consignment must be fumigated prior to shipment at the rate of 48 g/m³ for two hours at pulp temperatures of 13.9°C1 or greater at not more than 34.8% chamber load. To demonstrate compliance with this requirement the following must be presented on the phytosanitary certificate:</p> <ol style="list-style-type: none"> 1. Evidence that the goods have been fumigated with methyl bromide at [insert applied dosage X g/m³] for [X hours] at [insert minimum temperature degrees Celsius]; 2. The date of fumigation; and 3. The name of the fumigation facility

Product	Title of Certificate	Attestation Required
<p>BICON Database.</p>		<p>All fruit must be sourced and packed by registered packing facilities and treated by facilities registered with the Animal and Plant Health Inspection Service (APHIS).</p> <p>The details of the packing house/treatment facility must be recorded under the “Distinguishing Marks” section on the phytosanitary certificate.</p> <p>If fruit is airfreighted to Australian territory, the container or aircan number/s and container seal number/s are preferred but not mandatory. Where available, these details can be endorsed on commercial documentation (e.g. airway bill) that cross references the phytosanitary certificate number.</p> <p>For fruit that is sea freighted to Australian territory, the containers must be applied a coded seal and the container and seal numbers must be included on the phytosanitary certificate.</p>
<p>Citrus (Oranges - <i>Citrus sinensis</i>) from California or Arizona only</p> <p>NOTE: Sweet oranges have been used in this example. Other varieties of citrus are also permitted from California and Arizona.</p> <p>An Import Permit IS NOT required.</p> <p>Full details on BICON database.</p>	<p>APHIS Phytosanitary Certificate</p>	<p>The citrus fruits in the consignment must have been produced in California or Arizona.</p> <p>To demonstrate compliance with this requirement the following declarations must be presented on the phytosanitary certificate: <i>The citrus fruits in this consignment have been produced in California or Arizona in accordance with the conditions governing the entry of fresh citrus fruits from California or Arizona to Australia.</i>”</p> <p><u>The fruit in the consignment must be free of bean thrips (Caliothrips fasciatus).</u></p> <p>The following measures for bean thrips apply to navel oranges (a variety of Citrus sinensis) or fruit of the species Citrus reticulata (commonly known as mandarins) only.</p> <p>To demonstrate compliance with this requirement you must present the following on a phytosanitary certificate:</p> <ul style="list-style-type: none"> • Evidence that the goods have been fumigated with <u>phosphine</u> at [insert initial applied dose rate ppmv] and [insert minimum concentration ppmv] and [insert

Product	Title of Certificate	Attestation Required
		<p>minimum fruit pulp temperature °C/°F] for [X hours]</p> <ul style="list-style-type: none"> • The date of fumigation • The name or number of the fumigation facility <p>OR</p> <ul style="list-style-type: none"> • Evidence that the goods have been fumigated with <u>methyl bromide</u> at [insert applied dosage X g/m³] for [X hours] at [insert minimum temperature degrees Celsius]; • The date of fumigation; and • The name of the fumigation facility <p><u>The fruit in the consignment must be free of sweet orange scab.</u></p> <p>To demonstrate compliance with this requirement the following declarations must be presented on the phytosanitary certificate:</p> <ul style="list-style-type: none"> • <i>“The fruit in this consignment has been sourced from [insert County or State] where <i>Elsinoë australis</i> is known to occur, and has undergone washing, brushing, surface disinfection, fungicide treatment and waxing”.</i> <p><u>The fruit in the consignment must be free of Asian Citrus Psyllid.</u></p> <p>To demonstrate compliance with this requirement the following additional declaration must be presented on the phytosanitary certificate:</p> <ul style="list-style-type: none"> • <i>“The fruit in this consignment has been subjected to approved packinghouse measures (washing, brushing and waxing) effective against <i>Diaphorina citri</i>.”</i> <p><u>The fruit in the consignment must be free of all exotic fruit flies.</u> To demonstrate compliance with this the following declarations must be presented on the phytosanitary certificate:</p> <ul style="list-style-type: none"> • <i>"The fruit in this consignment was sourced and packed in [name of Californian or Arizona County] which is an area free of all exotic fruit flies."</i> <p>OR</p> <ul style="list-style-type: none"> • <i>"The fruit in this consignment was sourced and packed in [name of Californian or Arizona County] which is an area located in excess of 15 kilometers from the epicenter of any</i>

(The certificate must indicate the country/ies) AND <p>Animal health</p> <ol style="list-style-type: none"> 1. A statement that the country of origin has controls in place to ensure only healthy animals are used for milk production, or 2. A statement that the animals were clinically healthy at the time the milk was obtained. (The certificate must indicate the option that applies). AND <p>Disease status of the country of manufacture A statement that the goods were manufactured in a country/ies which:</p> <ol style="list-style-type: none"> 1. is/are approved by the Australian Director of Biosecurity as listed on the FMD-free country list, AND 2. is/are recognized by the World Organization for Animal Health (OIE) as free from foot and mouth disease, without vaccination. (The certificate must indicate the country/ies. Manufacturing includes all steps prior to certification. This includes, but is not limited to, processing, packaging, labelling and storage). AND

Product	Title of Certificate	Attestation Required
		<p>Date of manufacture</p> <ol style="list-style-type: none"> 1. A statement that the packaging or immediate container is stamped with the date of manufacture (the date of manufacture is the date the curd was set), or 2. A statement that a consignment specific manufacturer's declaration with the date of manufacture for each batch or lot number was provided to the official veterinarian. <p>(The certificate must indicate the option that applies).</p> <p>AND</p> <p>The following must be presented on a health certificate or government endorsed manufacturer's declaration:</p> <p>Heat treatment</p> <p>A statement that the milk from which the dairy ingredients were made was subject to one of the following heat treatments:</p> <ol style="list-style-type: none"> 1. Pasteurization at 72 °C for a minimum of 15 seconds, or 2. UHT treatment of 135 °C for a minimum of 1 second. <p>The government endorsed manufacturer's declaration will only be accepted if endorsed by the official veterinarian of the country where the heat treatment was applied. The manufacturer's declaration must be consignment specific and signed and dated by a Government Veterinary Officer within the last 6 months and include the Government Veterinary Officer's name, position and title.</p>

Section II: Purpose of Specific Export Certificate(s)

See table in Section I above.

Section III: Specific Attestations Required on Export Certificate(s)

See table in Section I above for *examples* of specific attestations. Complete details of all attestations required are provided by the Australian authorities when an application for an import permit is made by the importer or can be found in the [BICON database](#).

Section IV: Government Certificate's Legal Entry Requirements

Entry requirements are set out on the import permit or the BICON information. A copy of the import permit plus the originals of any other documentation – phytosanitary certificate, health certificate, airway bill or bill of lading, invoices, packing lists, insurance documents, etc., must accompany each shipment. The minimum documentary requirements for all imported products are available at: <http://www.agriculture.gov.au/import/arrival/clearance-inspection/documentary-requirements/minimum-document-requirements-policy>.

Depending on the product covered, import permits can be valid for up to two years.

Section V: Other Certification/Accreditation Requirements

Apart from quarantine regulations, products being imported into Australia must also meet a few other requirements. Details of these requirements are contained in the Food and Agriculture Import Regulations and Standards (FAIRS) report updated each year by this office. The most recent update can be downloaded at: <https://gain.fas.usda.gov/#/search>.

Certificates of free sale are NOT required for food products coming into Australia.
