

**Required Report:** Required - Public Distribution

**Date:** December 12,2019

**Report Number:** AU2019-0011

**Report Name:** Food and Agricultural Import Regulations and Standards  
Export Certificate Report

**Country:** Austria

**Post:** Vienna

**Report Category:** FAIRS Export Certificate Report

**Prepared By:** Roswitha Krautgartner

**Approved By:** Emily Scott

**Report Highlights:**

This report covers specific export certificate requirements for Austria, which are different than EU requirements.

**Disclaimer**

This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in *Vienna, Austria* for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped.

FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY

This report outlines specific Austrian export certificates. The export certification requirements for most products destined for the EU market have been harmonized. Austria, as a member of the European Union (EU), conforms to all EU regulations and directives. It is therefore recommended that this report is read in conjunction with the Food and Agricultural Import Regulations and Standards (FAIRS) export certificate report produced by the US Mission to the EU in Brussels, Belgium which you can find in the public [FAS GAIN database](#).

EU certification rules of imports are complicated and in practice not always harmonized across EU Member States. The very few products not yet harmonized are subject to Austrian national regulations. The competent Austrian authority has to be consulted on a case-by-case basis to address requirements for non-harmonized products.

Export certificates must be in the official language of Austria, which is German, as well as of the Member State where the border inspection occurs. Certified translations of the certificates into German may be used.

EU food legislation is translated into all official EU languages in use (including German) and is published in the Official Journal. The Eur-lex website <http://eur-lex.europa.eu/en/index.htm> provides free access to European Union laws.

There are no additional Austrian-specific certificates (other than EU certificates) for food products deriving from plants and animals.

The import of special products like blood, blood products, and material containing epizootic pathogens must be approved by the Federal Ministry of Labor, Social Affairs, Health, and Consumer Protection. Usually the importer (or possibly an exporter) applies to the Ministry with all relevant details. There is no set form for this kind of application. Approval is granted on a case-by-case basis.

**Responsible Authorities for Health Certificates:**
