

**Required Report:** Required - Public Distribution

**Date:** February 02,2020

**Report Number:** AG2019-0013

**Report Name:** Food and Agricultural Import Regulations and Standards  
Country Report

**Country:** Algeria

**Post:** Algiers

**Report Category:** FAIRS Annual Country Report

**Prepared By:** Nabila Hales

**Approved By:** Justina Torry

**Report Highlights:**

The Food and Agricultural Import Regulations and Standards (FAIRS) report provides an overview of the food laws and regulatory environment in Algeria as it relates to food and agricultural exports. U.S. agricultural exports to Algeria are primarily bulk and intermediate commodities. Wheat, corn, tree nuts and planting seeds remain the most promising commodities for the Algerian market.

**DISCLAIMER:** This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Algiers, Algeria for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to research such matters with local authorities, before any goods are shipped. All the Official Journals (Journal Officiel) (JO.) included in this report can be found at the website: [www.joradp.dz](http://www.joradp.dz). (The website can be read in English. However, all the journals are in Arabic and French languages).

**Table of Content**

**Executive Summary**.....4

**Section I:** Food Laws.....5-6

**Section II:** Labeling Requirements.....7-8-9

**Section III:** Packaging and Container Regulations.....9-10

**Section IV:** Food Additive Regulations.....10

**Section V:** Pesticide and Other Contaminants.....11

**Section VI:** Other Requirements, Regulations, and Registration measures.....12

**Section VII:** Other specific Standards.....13-14-15

**Section VIII:** Trademarks, Brand Names and Intellectual Property Rights.....15-16

**Section IX:** Import Procedures.....16-17-18

**Appendix I:** Government Regulatory Key Agency Contacts .....19-20

**Appendix II:** Other Import Specialist Technical Contacts.....21

## Executive Summary

Most U.S. agricultural exports to Algeria are bulk and intermediate commodities. In 2018, the commodities leading the U.S. agricultural exports to Algeria were wheat, tree nuts, planting seeds, corn, dairy products as well as forest products, live animals, pulses, and cotton.

Even though the U.S. and Algerian regulatory agencies have not reached an agreement yet on the certificates for bovine semen, bovine embryos, dairy cattle, beef cattle and chicken day-old chicks & hatching eggs, the Algerian market holds tremendous potential for U.S. livestock and genetics.

The agriculture sector is one of the priority sectors for the government in its efforts to diversify the economy and attract foreign and domestic investment outside the energy sector. The agriculture sector contributes on average about 12 percent of Algeria's GDP and employs at least 20 percent of the population in rural areas. Algeria has about 8.4 million hectares of arable land.

Algeria's imports of agricultural commodities and food represented about 18.56 percent (\$8.57 billion) of the total imports (\$46.06 billion) in 2018. To boost agricultural development and production, the Government of Algeria (GoA) is allocating public land for agricultural use to the private sector on concessional terms to encourage the establishment of modern agricultural farms particularly in cereals and dairy. The government encourages the continued development and modernization of the agricultural sector to achieve self-sufficiency and promote exports.

Algeria adapted the legislative and regulatory framework for quality control, for locally produced and imported food to ensure consumer safety and protection.

Several ministerial departments are responsible for controlling food quality and safety in Algeria, including the Ministry of Agriculture (control of animals and animal products, plant health, seeds, etc.), Ministry of Health and Ministry of Commerce (food and quality inspection).

The GoA pursues a strategy to control imports and protect domestic production. The GoA dropped the import licensing system implemented in 2017 and replaced it with the import ban implemented in 2018. In 2019, the government replaced the import ban with a [temporary additional safeguard duty \(Droit Additionnel Provisoire de Sauvegarde, \(DAPs\)\)](#). This tax is to be added to the customs duty and the value-added tax (VAT).

## Section I. Food Laws

Algeria has developed a control system for locally produced and imported food to ensure consumer safety and protection. Algeria adapted the legislative and regulatory framework for quality control, coupled with modernizing and strengthening control structures to improve market surveillance.

The regulatory framework for consumer protection and fraud prevention is based on [Law 09-03 of 25 February 2009](#) on consumer protection and fraud prevention. This Act repeals and replaces [Law 89-02 of 7 February 1989](#) (published on the Official Journal (Journal Officiel) (JO.) No 06 of February 8, 1989) on the general rules of consumer protection.

All the Official Journals (Journal Officiel) (JO.) can be found at the website: [www.joradp.dz](http://www.joradp.dz). [\(The website can be read in English. However, all the journals are in Arabic and French languages\).](#)

Regulations have been developed on labeling, food additives, hygiene, product safety, control of locally produced and imported products and the specifications to be met by various foods.

Several ministerial departments are responsible for controlling food quality and safety in Algeria, including the Ministry of Agriculture (control of animals and animal products, plant health, seeds, etc.), Ministry of Health and Ministry of Commerce (food and quality inspection).

The Algerian Ministry of Commerce is responsible for food inspections, quality control and combating fraud, as well as labeling regulations and laboratory inspections. Information regarding food inspection, quality control and labeling can be found at the Ministry of Commerce's website: <https://www.commerce.gov.dz/reglementation>.

The Ministry of Agriculture has the legislative responsibility for domestic food production and for health and safety aspects of imported agriculture and food products into Algeria. Information related to domestic production and imported agricultural products can be found on the Ministry of Agriculture's website: <http://madrp.gov.dz/agriculture-2/>. [The website can only be read in Arabic or French language.](#)

All imported food and goods are subject to conformity control at ports of entry by a joint team composed of inspectors from the following Ministries: Commerce, Agriculture, Customs, and Transport in accordance with the terms and conditions under the provisions of the [Executive Decree No 90-39 of January 30, 1990](#), (published in JO. No 05 of January 31, 1990), amended and supplemented. (See Section IX)

Food Standards are consistent with Codex Alimentarius. The Ministry of Commerce leads the Codex Committee. The Codex Alimentarius National Committee (Comité National du Codex Alimentarius, CNCA) was created by [Executive Decree No. 05-67 of January 30, 2005](#) (published in JO. No10 of February 06, 2005). The Committee has a Permanent Secretariat provided by the Algerian Center for Quality Control and Packaging (CACQUE).

In January 2019, the Government of Algeria (GoA) replaced the import ban implemented in 2018 with a [temporary additional safeguard duty \(Droit Additionnel Provisoire de Sauvegarde, \(DAPs\)\)](#).

The list of goods subject to the temporary additional safeguard duty and the corresponding rates were published in the [Journal Officiel No 06 of January 27, 2019](#) as part of the Ordinance of January 26, 2019. The list included 1,095 items of which 658 were food and 437 industrial products in addition to their tariff codes and the corresponding DAPs rates. Food items represent 60% of the list. Most of the food items listed are processed and high value products.

The detailed list in English can be found in FAS reports at:

[https://gain.fas.usda.gov/Recent%20GAIN%20Publications/Trade%20Policy%20Update\\_Algeria\\_2-12-2019.pdf](https://gain.fas.usda.gov/Recent%20GAIN%20Publications/Trade%20Policy%20Update_Algeria_2-12-2019.pdf)

The original full revised list in French with the current DAPs rate can be found at:

<https://www.joradp.dz/FTP/jo-francais/2019/F2019026.pdf>.

On April 21, 2019, the Ministry of Commerce issued a new [Ordinance of April 8, 2019, published in the Journal Officiel No.26](#) to modify the previous ordinance of January 26, 2019 published in the [Journal Officiel No 06](#) on January 29, 2019. This change was part of the periodic revisions planned by the Ministry of Commerce to update the list of goods subject to the DAPs.

The new ordinance exempts some food items from the DAPs including tree nuts, peanuts, dried raisins, dried fruits, butter, and fresh or chilled beef. The revision removes the 30 percent additional duty on tree nuts, 70 percent additional duty on peanuts, butter and dried fruits, and the 50 percent additional duty on beef. All these rates are in addition to an existing 30 percent customs duty and a 19 percent value added tax (VAT).

On the new list, the number of items subject to DAPs decreased from 1,095 to 992 items of which 555 are processed foods and 437 are industrial products.

Food items represent 56 percent of this list. The DAPs rates for food items remained the same. The rates are either 30 percent, 70 percent or 120 percent.

As background, in January 2018, the GoA replaced the import licensing system implemented in 2017 by a temporary import ban. The [decree No 18-139 of May 21, 2018](#) (published in the JO. No 29 of May 23, 2018) suspended 851 products, of which 576 were agricultural. In May 2018, the temporary ban list was extended to 877 products of which 622 were agricultural products, mostly processed and high-value products. The fully revised former list of banned products can be found at:

<https://www.commerce.gov.dz/reglementation/decret-executif-n-deg-18-139>.

## Section II. Labeling Requirements

The Ministry of Commerce regulates food labeling through several decrees.

In December 2005, a new policy entered into force; - regarding labeling and language- to modify and complete [Decree No 90-366 of November 10, 1990](#) (published in the Journal Officiel No 50 of November 21, 1990) related to labeling and presentation of foodstuffs.

[The Executive Decree no 05-484 of December 22, 2005](#) (published in the JO No 83 of December 25, 2005), modifies and completes the labeling and presentation of foodstuffs pre-packed or not, presented to consumers as it is and food destined to restaurants, hospitals, and other local communities. The decree redefines the technical terms for: labeling, label, foodstuff, lot, manufacture date, packaging date, shelf life, sales date's limit, ingredient, and food additives.

Labeling information must be written in Arabic, which is mandatory, and other commonly understood languages in Algeria (English or French) are optional. (The information must be visible, legible and indelible)

Labeling information should contain:

- Sales denomination or product's name;
- Net amount for pre-packed food;
- Name, trademark and address of the manufacturer or packer or distributor and of the importer if the product is imported;
- Country of origin;
- Manufacture lot identification;
- Instructions and precautions of use;
- Manufacture or packing date and limit date for consumption in case of very perishable product;
- Ingredients list;
- Particular conditions for preservation;
- International Irradiation symbol or the mention "treated by radiation or ionization" if it is the case.

Later, the [Order of February 28, 2009](#) exempted certain foodstuffs labeling from the lot identification mention (published in the JO No. 19 of March 25, 2009). Products subject to the provisions of this decree are the foodstuffs rapidly alterable of which the expiry date is less than or equal to three (3) months, provided that the expiry date mentioned on the labeling is clearly mentioned in plain text and in the order; at least of the day and the month.

[The Order of March 13, 2000](#), regulates the packaging and labeling of phytosanitary products (or pesticides) for agricultural use. (See Section IV)

[The Decree no 06-217 June 18, 2006](#) (published in the JO No. 41 du 21 Juin 2006) regulates storage conditions, packaging as well as labeling of seeds and seedlings. (See Section IV)

In addition to the commercial labels that remain regulated by the regulations in force, seeds and seedling must have an official indelible label affixed to the seed package or attached to bunches, containers or

other seedling packing means.

For all seeds and plants, the official label should show the following:

- The common name
- The scientific name
- The variety and / or the rootstock
- The number of the clone
- The production year
- The batch of production of seeds or seedlings
- The visa of the national phytotechnical authority agents' control
- Pre-basic or basic categories, certified and standard are represented using colored labels.

The Ministry of Agriculture sets the characteristics for these official labels as well as their colors. Any offenses or breaches to the regulation for storage, packaging and labeling of seeds and seedlings is punishable by the penalties provided by the legislation in force.

#### **- Other Specific Labeling Requirement (s)**

Algeria is a Muslim country and halal is mandatory. Regulations providing specifications regarding halal food products and the requirements were implemented through the following orders:

[The Order of March 17, 2014](#) (published in JO. No15 of March 19, 2014) adopted the technical regulation laying down the rules relating to halal foodstuffs and the regulatory requirements applying to halal food. The decree describes the technical requirement for halal food, non halal food, halal food processing requirements, international standards used as well as the commercialization requirements of the halal food related to packaging, labeling, storage, transportation. The decree also covers the halal slaughtering and the sanitary control requirements.

Since June 2017, the halal certification for some food products is mandatory. The [Interministerial Order of June 14, 2016](#) (published in the JO. No 70 of December 8, 2016) lays down the conditions and procedures for affixing the word "halal" for the related foodstuffs, pursuant to the provisions of Article 12 (point 14) of [Executive Decree No 13-378 of November 9, 2013](#), (published in the JO. No 58 of November 18, 2013) setting the terms and conditions for consumer information. The decree of November 9, 2013 guarantees the consumer's right for information and describes the components related to labeling and the ingredients labeling.

The list of the products that requires halal certification is not yet established but will be determined by the National Committee for monitoring certification and marking "halal" chaired by the Ministry of Commerce. All imported products and those manufactured locally with imported raw material will be included in this list.

The Algerian Institute for Standardization (IANOR) is the certifying body for local products. While for imported products, the authorized bodies in their countries of origin must issue the "halal" certificate of conformity and the latter must be recognized by the Monitoring Committee for certification and marking "halal". This national committee is composed of several Ministries, including Agriculture, Health,

Industry, Religious Affairs as well as public bodies and institutions such as the High Islamic Council and the Algerian Center for Quality Control and Packaging (CACQUE).

[Interdepartmental Decree of October 19, 2017](#) (published in JO. No 25 of May 2, 2018) fixes the applicable food nutrition value labeling rules. This decree lays down the nutritional labeling of foodstuffs pursuant to the provisions of Article 14 of [Executive Decree No 13-378 of November 9, 2013](#), (published in JO. No 58 of November 18, 2013) setting the terms and conditions for consumer information. These provisions apply to prepackaged foodstuffs intended for human consumption.

Nutrition labeling includes:

- declaration of nutrients (list of the nutrients)
- additional nutritional information

Foodstuffs to which the provisions of this decree do not apply are:

- Unprocessed products that include a single ingredient or a single category of ingredients;
- Processed products having, for any transformation, been subject to maturation, and which include only one ingredient or a single category of ingredients;
- Waters intended for human consumption, including those carbon and / or flavorings have been added;
- Aromatic plants, spices or their mixtures;
- Salt and salt substitutes;
- Table-top sweeteners; Infusions (herbal or fruit), teas, decaffeinated teas, instant or soluble teas or tea extracts, teas instant or soluble or decaffeinated tea extracts, with no added ingredients other than flavorings that do not affect the nutritional value of tea;
- Fermented vinegars and their substitutes, including those that only added ingredients are flavorings;
- Aromas;
- Food additives;
- Technological aids;
- Food enzymes;
- Gelling substances;
- Yeasts;
- Chewing gum;
- Foodstuffs, including homemade products, supplied directly by the manufacturer in small quantities to the final consumer or to local retail establishments directly supplying the final consumer.

### **Section III. Packaging and Container Requirements**

[The ordinance of March 13, 2000](#), (published in the JO. No of 28 of May 14, 2000) regulates the packaging of phytosanitary products for agricultural use (pesticides). The latter must be contained in strong, watertight packaging, on which the following information and indications are affixed, indelible and legible, in the national language (Arabic) and in another language:

- Name and address of the manufacturer
- The trade name and the registration number of the product in Algeria

- The chemical and centesimal composition of the active substances or the biological titration of the products expressed in international units
- The dose, the instructions for use and the users for whom the product has been approved in Algeria as well as the possible contraindications.
- Production and expiration dates
- Special safety precautions for the use and preservation
- First aid and antidotes when they exist
- The time before harvest and the last application on the plants to be protected

In addition, particularly dangerous agricultural products for agricultural use must bear pictograms illustrating the nature of the danger associated with their detention and use, as well as specific precautions.

[The Decree no 06-217 June 18, 2006](#) (published in JO. No 41 of June 21, 2006) regulates storage conditions, packaging and labeling of seeds and seedlings. Storage conditions for seeds and seedlings are defined technically by species and group of species by the Ministry of Agriculture.

Seeds can only be marketed in hermetic packaging to guarantee the best conditions for their conservation. Seedlings with roots can be marketed in bunches. They are also marketed in containers or by any other means to guarantee the quality of the plant.

In addition to the commercial labels that remain regulated by the regulations in force, for seed and propagating material, an official label must be affixed to the seed package or attached to bunches, containers or other plant packing means.

#### **Section IV. Food Additive Regulations**

The [Executive Decree No 12-214 of May 15, 2012](#) (published in the JO. No 30 of May 16, 2012) lays down, terms and conditions for use of food additives in food for human consumption. The decree was issued based on a joint report by the Ministries of: Commerce, Health, Industry, SME's and Agriculture. This decree sets conditions and terms of use for food additives in foodstuffs for human consumption and lists the authorized additives in food ([Annex I](#)), the list of food categories in which additives can be incorporated ([Annex II](#)) and the additives that can be incorporated in food and their maximum limit authorized ([Annex III](#)). Copies of the annexes I, II and III and the updates are also available at the Regional Commerce Directorates, in the wilayas, at the Algeria Center for Quality Control and Packaging (CACQUE) as well as the Chambers of Commerce and Industries.

The additives incorporated in animal feed are excluded from the scope of this decree. Contaminants and pesticides residues are not considered under any circumstances as food additives.

Only halal food additives (any food additive whose consumption is permitted by the Muslim religion) can be incorporated in foodstuffs. For agro-industry use, "halal" and "nature of the food additive" may appear either on the packaging or in the documents accompanying the product.

The detailed use (ways of incorporation, quantities and maximum concentrations) of the food additive is listed in the decree.

## **Section V. Pesticide and Other Contaminants**

Algeria regulates imports and exports of pesticides, also commonly referred to in Algeria as phytosanitary products for agricultural use. The phytosanitary authority represented by the Plant Protection and Technical Control Directorate of the Ministry of Agriculture (DPVCT) oversees pesticide regulation and enforcement. All phytosanitary products for agricultural use must be subject to a prior approval issued by the Plant Protection and Technical Control Directorate of the Ministry of Agriculture (DPVCT). (See Section VII).

[The Executive Decree n °10-69 of January 31, 2010](#) (published in JO. No 09 of February 3, 2010) lays down the measures applicable when importing and exporting plant products for agricultural use.

In accordance with the regulations in force, only licensed importers can import phytosanitary products for agricultural use. In addition, importers must receive supplies from manufacturers and / or companies authorized in their country of origin by their competent authorities. Imports are prohibited when the products are not approved in their country of origin. Imports must be accompanied by a bulletin of analysis corresponding to each lot justifying that the product complies with requirements that preceded its approval in Algeria. The bulletin must be delivered by a laboratory approved by the official services of the country of origin.

The [Executive Decree No. 14-366 December 15, 2014](#) (published in the JO. No 74 of December 25, 2014) defines and fixes the terms and conditions related to contaminants tolerated in food intended for human consumption.

The decree lists the components that are considered contaminants when they exceed the maximum limits tolerated:

- Pesticide residues
- Residues of technological processing
- Residues of veterinary medicinal products or residues of pharmacologically active substances
- Natural toxins such as toxic metabolites, mycotoxins that are present in the commodity food is not intentional
- Microbial toxins produced by algae that accumulate in edible aquatic organisms like shells and crustaceans
- Other chemical contaminants such as nitrates, heavy metals, dioxins, polychlorinated biphenyls (PCB).
- Contaminants by radioactive elements such as radionuclides.

On October 7, 2019, a [new order of March 6, 2019 was published in the Journal Officiel No 62](#) which fixes the authorized constituents or groups of components in the cleaning products of material or equipment that will be in contact with foodstuffs. The authorized constituents and groups of constituents as well as their concentrations in the cleaning products are set out in the annex of this decree.

The provisions of this order enter into force six months after the date of publication in the Journal official.

## **Section VI. Other Requirements, Regulations, and Registration measures**

Only varieties approved and registered in the Varieties' Official Catalog are authorized to be produced, bred, imported, exported, distributed and marketed, (Art 17 of [The Law no 05-03 of February 6, 2005](#). Procedures to apply for registration of varieties and species are in the official catalog of species and varieties and can be found at: <http://madrp.gov.dz/agriculture/services-phytosanitaire/procedures/>.

For more specifications, the National Center for Certification and Control of Seeds and Plants (CNCC) oversees the process: <http://cncc.dz/contact> (see Appendix I).

All phytosanitary products for agricultural use (pesticides) must be subject to a prior approval issued by the Phytosanitary Authority represented by the Plant Protection and Technical Control Directorate of the Ministry of Agriculture (DPVCT).

Please submit applications for the registration of plant protection products for agricultural use to the Technical Secretariat of the Commission for Agricultural Phytosanitary Products at the (DPVCT).

The application for registration of phytosanitary products for agricultural use is completed by the applicant domiciled in Algeria. The firm authorizing the applicant must provide the latter with a letter of accreditation authorizing the registration process.

Details on the constitution of the file can be found at: [http://www.minagri.dz/WEB%20DPVCT/procedures\\_homologation.html](http://www.minagri.dz/WEB%20DPVCT/procedures_homologation.html).

[The Law no 05-03 of February 6, 2005](#) (published in JO. No 11 of February 9, 2005) regulates the seeds and seedlings approval, production, breeding and marketing of seeds and seedlings used in plant production as well as plant variety protection. This Act describes the process for approval of varieties of seeds and seedlings and controls the conditions of their production, their marketing and their use as well as the protection of new varieties of plants.

The law defines the National Phytotechnical Authority which falls under Ministry of Agriculture. This authority oversees approving varieties of seeds and seedlings and controls the conditions of their production, their marketing and their use as well as the protection of new varieties of plants. It comprises a national seed and planting commission and includes specialized technical committees and technical inspectors.

For animal products and products of animal origin imports, the importer is required to include the agreement or accreditation for the hygiene of his establishment to obtain the import authorization or "derogation sanitaire" prior to importation. A specimen of the import authorization "derogation sanitaire" can be found at: <http://www.minagri.dz/veterinaire.html>.

## Section VII. Other Specific Standards

Microbiological specifications are regulated for some foods by decree. [The Inter-ministerial decree of 24 January 1998](#) amending and supplementing the decree of 23 July 1994 relating to the microbiological specifications of certain foodstuffs (published in the JO. No. 35 of 27 May 1998).

All imported food and goods are subject to the conformity control at ports of entry in compliance with [the Executive Decree no 05-467 of December 10, 2005, which was](#) published in JO. No [80 of December 11, 2005](#).

The conformity control of the imported products is exercised at land, sea and air border posts. It is carried out by border inspections under the administration responsible for consumer protection and the fight against fraud (Ministry of Commerce) in accordance with the provisions of [Executive Decree No 90-39 of January 30, 1990](#), (published in JO. No 05 of January 31, 1990), as amended and supplemented.

The control is performed before the clearance of the imported products based on a file presented to the inspectorate at the borders by the importer or by his duly authorized representative. The file includes:

- the declaration of the importation of the product, duly filled in by the importer
- a certified copy of the extract from the trade register
- a certified copy of the invoice
- the original of any other document required by the regulations in force and relating to the conformity of the imported products.

The documents for border control of imported products are the ones provided for (above) and / or on the visual check of the product, which can be supplemented with samples. The check is made in such a way as not to alter the quality and / or product safety and in the same way as for a similar product of local origin.

Visual inspections of the product are performed to ensure:

- that product compliance meets legal or regulatory specifications characterizing it;
- that product compliance meets the conditions of its handling, transport and storage;
- that the product conforms to the indications given on labeling and / or accompanying documents
- the absence of any products' possible alteration or contamination.

Sampling during the border control is decided on the basis of:

- the results of the examination of documents or the visual checks carried out
- the origin, nature, type, presentation and the level of risk the product presents
- the history of the product and the importer.
- the reliability of the inspections carried out at the exporting country and the places of handling.
- the priorities set by the administration responsible for consumer protection and the repression of fraud (Ministry of Commerce).

If no offense is found after the inspection of the documents referred to above or after visual inspection of the product and if no samples are deemed necessary, the border inspection issues the importer or his

duly authorized representative, an authorization of admission of the product. Otherwise, a refusal order is issued for the product and the reason for refusal must be explicitly mentioned.

When the importer disputes the reasons for refusal of admission, the importer may appeal or authorize a representative at the Commerce Directorate of the wilaya to introduce an appeal. The appeal must be made within eight (8) days to /from the date of notification of the refusal of the product. The Commerce Directorate of the Wilaya has four (4) working days to verify the reasons given for the recourse. When these checks, materialized by a report, contradict the conclusions which motivated the decision of refusing admission, that decision is annulled. Otherwise, the refusal is maintained. The cancellation of the refusal decision is notified to the importer by the border inspection.

When visual inspection of the product needs sampling, the sample will be sent without delay and in the conditions avoiding any alteration of the product to the quality control and fraud prevention laboratory or an approved laboratory, for analysis or tests.

The [Executive Decree no 93-286 of November 23, 1993](#) (published in the JO. No 78 of November 28, 1993) regulates seeds and seedlings as well as the phytosanitary control at the ports of entry and borders. In compliance with this decree, a phytosanitary control is mandatory for all plants, plant products and plant materials as defined in the article 2 of the [law no 87-17 of August 1987](#) (published in the JO. No.32 of August 05, 1987).

Those plant products that have undergone processing by heat treatment or preservation excluding any risk of spreading harmful organisms are exempted from the phytosanitary control defined by the Article 2 of the [law no 87-17 of August 1987](#)

[The Order of April 7, 2004](#) (published in JO. No 07 of January 23, 2005) amends and supplements the Order of May 21, 1995 fixing the phytotechnical and phytosanitary standards for imports of seeds and seedlings of the vegetables, cereals, fruits and viticulture. This decree lists the crops and seeds with the standards for (varietal purity, humidity, germination rates for the different categories as well as the phytosanitary standards for seeds.

[The Order of May 7, 2015](#) (published in the JO. No44 of August 19, 2015) modifies and completes [the Order of July 14, 2002](#), (published in the JO. No 62 September 15, 2002) that establishes the list of plant varieties that require authorization prior to importation and specifies the phytosanitary requirements. All plant or plant products are subject to import authorization prior to importation. The specifications are listed in the authorization for each product.

To import these products, the importer has to request officially from Ministry of Agriculture the - importation by submitting a file with documents that can be found at:

<http://madrp.gov.dz/agriculture/services-phytosanitaire/procedures/>. Among these documents, a non-GMO certificate needs to accompany the products to attest that the plant material has not undergone any transfer or modification of genes. Genetically engineered plant material importation, production, distribution, and commercialization as well as their utilization is prohibited by the Ministry of Agriculture's [Decree of December 24, 2000](#) (published in the Official Journal on January 7, 2001) except for research purposes. The plant material includes live plants or pieces of live plants, including their dormant buds, tendrils, grafts, tubers, rhizomes, cuttings, shoots, seeds intended for propagation and reproduction.

Regarding animal products: the [Executive Decree No 91-452 of November 16, 1991](#) (published in the JO. No 59 of November 20, 1991), regulates the veterinary inspections at borders posts. The decree defines the ports, airports and land borders posts where imports, exports as well as transit of animals and products of animal origin are authorized access. The decree clarifies the conditions of the implementation of the chapter III and IV of the [Law 88-08 of January 26, 1988](#) (published in the JO. No 04 of January 27, 1988), related to veterinary medicine activities and animal health protection.

The decree states all the animals and products of animal origin that require sanitary, veterinary inspection upon arrival or departure at border posts. The list includes among others; cattle, poultry, meat, dairy and dairy products, eggs, semen for artificial insemination, processed products of animal origin, pasture and animal feed. All the products listed in the law are subject to a sanitary authorization prior to import called commonly “derogation sanitaire” except processed products with animal origin, concentrates for animal feed and pets. This authorization certifies that no reportable disease has been reported in the country of origin of the import. This document is delivered by the official veterinary services at the Ministry of Agriculture.

The sanitary control consists of:

- A control of the sanitary veterinary health certificates required by the regulation in force
- A sanitary and qualitative control for animal products or of animal origin, supplemented with samples for laboratory analysis.
- A control of the conformity with the prescriptions in matter of disinfection and preliminary disinfection of the means of transport, hygiene of this means and the conditions of transport of the animals, animal products and products of animal origin. If products are doubtful, the latter will be bonded or quarantined in case of live animals

If the inspection results in a refusal, all involved parties are notified immediately by a decision. The Ministry of Agriculture delivers the form for this decision. The owner of the refused products may notify the involved parties within 48 hours of his intention to proceed or have any expertise carried out at his own expense. The expertise may be assigned to any expert or laboratory approved by the official veterinary authority. In case the refusal is maintained, the owner can appeal to the wilaya’s territorially competent veterinary inspector who has five (05) working days to decide. The possible costs of bonding, storage and other charges incurred during the appraisal and the duration of the appeal are the responsibility of the owner of the products.

## **Section VIII. Trademarks, Brand Names and Intellectual Property Rights**

Algeria has been a member of the World Intellectual Property Organization (WIPO) since April 1975.

Any brand of products or services cannot be used in Algeria without having been subject to registration with the competent service.

Trademarks are regulated by the [Order n° 03-06 of July 19, 2003](#) (published in the JO. No 44 of July 23, 2003) and the [Executive Decree No05-277 of August 2, 2005 published in the Journal officiel No 54 of August 7, 2005](#). The Order lays down the definitions and processes related to the acquisition of the right to the trademark, the registration and the publication. Trademarks are protected for a ten-year period, renewable indefinitely.

Trademarks must be registered at the Algerian National Institute of Industrial Property, (Institut National Algerien de la Propriete Industrielle, INAPI). Applicants domiciliated abroad may be represented by an agent to perform the registration procedure in accordance with procedures laid down by the decree.

The filer must:

- prior to completing an application for registration of the mark, must research to determine possible similarities that may exist between the mark to be registered and those previously registered.
- activate an online account on the INAPI website
- complete an online trademark application form
- choose the list of products and services set in accordance with the “Nice classification”
- provide proof of payment of the filing and publication taxes.

The owners of the trademark may assert their rights and exercise their prerogatives through industrial property agents.

A valid registered trademark gives the holder the right of ownership over that trademark for period of ten (10) years. This right grants the right to concede the trademark use or transfer with a prior authorization by the owner. (source: KPMG)

[The Law no 05-03 of February 06, 2005](#) regulates the seeds and plant variety protection. This Act determines the conditions of approval, production, multiplication and marketing of seeds and seedlings used in plant production as well as plant variety protection. The details can be found at:

<https://www.joradp.dz/FTP/jo-francais/2005/F2005011.pdf>.

## **Section IX. Import Procedures**

All imported food and goods are subject to a conformity control at the ports of entry by a joint team composed of inspectors from the Ministries of Commerce, Agriculture, Customs, and Transport in accordance with the terms and conditions under the provisions of the [Executive Decree No 90-39 of January 30, 1990](#), (published in JO. No 05 of January 31, 1990) as amended and supplemented.

The control is performed before the clearance of the imported products on the basis of a file presented to the inspectorate at the borders by the importer or by his duly authorized representative. The file includes:

- the declaration of the importation of the product, duly filled in by the importer
- a certified copy of the extract from the trade register
- a certified copy of the invoice
- the original of any other document required by the regulations in force and relating to the conformity of the imported products. (See Section VIII).

A certificate of conformity and quality as well as a certificate of origin are mandatory for all imported products along with the customs documents (bill of lading and commercial invoice). The regulation regarding the conformity control at the borders can be found at:

<https://www.commerce.gov.dz/reglementation/decret-executif-n-deg-05-467>

Phytosanitary certificates are mandatory for all food products. Certificate of fumigation and Isotopic are mandatory for the grains.

Pesticides are also subject to import authorization prior to import. Authorization is given by the Plant Protection and Technical Control Directorate of the Ministry of Agriculture (DPVCT). More information can be found at: <http://madrp.gov.dz/agriculture/services-phytosanitaire/procedures/>

[The Order of May 7, 2015](#) (published in the JO. No 44 of August 19, 2015) modifies and completes [The Order of July 14, 2002](#), (published in the JO. No 62 September 15, 2002) that establishes the list of plant varieties that require authorization prior to importation.

Animal products or products with animal origin are subject to import authorization prior to import. Authorization is given by the Veterinary Services of the Ministry of Agriculture (see section VIII).

A sanitary, veterinary inspection is required for live animals and products with animal origin upon arrival at border posts. [Executive Decree No 91-452 of November 16, 1991](#) (published in the JO. No 59 of November 20, 1991), lists all the animals and products of animal origin that require sanitary, veterinary inspection and the sanitary control. (See section VIII)

More information can be found at: <http://www.minagri.dz/veterinaire.html>.

Imported goods are subject to; custom duties, value added tax (VAT), and some local taxes.

Effective January 1, 2017, the Finance Law increased VAT rates from seven (07) to nine (09) percent and seventeen (17) to nineteen (19) percent for agricultural and non- agricultural products. The full list of products can be found at <<http://www.joradp.dz/FTP/JO-FRANCAIS/2016/F2016077.pdf>>.

Algeria applies the Harmonized Nomenclature and Classification system. The maximum rate for customs duties has been lowered to 30 percent. There are three categories for duties: 5 percent for raw materials, 15 percent for semi-processed products, and 30 percent for consumer-ready or high-value products. A new temporary safeguard duty has been added to the above-mentioned taxes and VAT for 1,095 products. (see Food laws section above).

A domestic consumption tax applies to about 20 products that are considered luxury goods (tariff code chapters 08, 09, 16, and 22). Information on tariffs can be found at:

<http://www.douane.gov.dz/Consulter%20le%20tarif%20douanier.html>

As of January 1, 2014, Letters of Credit approved by Algerian banks or documentary collection are the only means of payment for imported goods. This is in accordance with Section 81 of the 2014 Finance Law.

Payment for goods requires an invoice with a bank domiciliation and customs clearance documents.

Effective October 22, 2017, a new requirement to regulate imports of products destined for resale as is, was introduced by the Bank of Algeria (BoA). The new instruction applies to non-agricultural as well as, agricultural products. Any imported goods for resale requires the importer to deposit 120% of the import transaction value with an Algerian Bank, 30 days prior to shipment.

The Decree 18-212 of August 15, 2018 published in Journal Officiel No 50 on August 15, 2018 exempts the following raw materials and products destined for animal feed from VAT:-barley (tariff heading 10.03), corn, (tariff heading 10.05), bran, (tariff code 23.02), starch residues and similar residues (tariff heading 23-03), preparations used for feeding animals (tariff heading 23-09). Import licenses are no longer needed.

Information about Algerian Customs requirements can be found (in French) at <http://www.douane.gov.dz/>

All the Official Journals (Journal Officiel) (JO.) can be found at the website: [www.joradp.dz](http://www.joradp.dz).

## **APPENDIX I. Government Regulatory Key Agency Contacts**

### **Ministry of Agriculture**

Address: 12 Avenue Colonel Amirouche, Algiers

Phone: (213-23)-50-32-38

Fax: (213-23)-50-31-17

Website: <http://www.minagri.dz>

### **National Institute for Plant Protection (INPV)/ Ministry of Agriculture**

Address :12, Avenue des Frères Ouadek Hacén Badi, EL HARRACH - BP.80 El-Harrach

Phone: 213 (0) 23 82 88 85

Fax: 213 (0) 23 82 88 96

Website : <http://www.inpv.edu.dz/>
