

Voluntary Report – Voluntary - Public Distribution

Date: April 30, 2021

Report Number: MX2021-0023

Report Name: Mexico Organic Law 'LPO' Enforcement in 2021

Country: Mexico

Post: Mexico City

Report Category: Special Certification - Organic/Kosher/Halal

Prepared By: USDA

Approved By: Daniel Alvarado

Report Highlights:

On December 26, 2020, Mexico published a measure that requires most organic raw materials and bulk products to be certified to Mexico's Organic Law (LPO) standards by June 26, 2021. The Measure includes an annex that lists the products which will require proof of LPO certification at the border. While USDA has requested an extension of the June 26, 2021 deadline, Mexico has not approved an extension and U.S. stakeholders should prepare for compliance on June 26, 2021. Mexico's organics regulator, the National Service for Animal and Plant Health, Food Safety and Quality (SENASICA), is fully responsible for certifying and enforcing the LPO requirements. This report contains a summary of SENASICA's public statements on this Measure and contact information for parties seeking additional information.

Executive Summary:

On December 26, 2020, Mexico published a measure ([the Measure](#)) stating products which will be marketed as organic in Mexico will need to show compliance at the border with Mexico's organic law (LPO). The Measure includes an annex listing the scope of products (by HS code) that must be certified. A summary of this list is included in the pages of this report. The deadline for enforcement of this Measure is June 26, 2021.

Because Mexico does not currently recognize USDA organic certification, U.S. organic products exported to Mexico must be certified to the LPO. In order to be certified to the LPO, U.S. operators must be certified by a SENASICA-accredited certifying body. There are currently 12 certifying bodies accredited by SENASICA that are also accredited by the NOP.

Product already certified to the USDA's organic standards may be "recertified" to the LPO by a SENASICA-accredited certifying body.

SENASICA has listed two methods to contact its staff with questions about implementation of the Measure: 1) email to info.organicos@senasica.gob.mx, or 2) telephone to (+52) 55 5905 1000, ext. 51509, 51523, or 51532. For presentations and other resources from SENASICA's [April 12, 2021 webinar](#), please see [SENASICA's website](#).

Disclaimer: SENASICA is solely responsible for the implementation of [the Measure](#) and the [LPO](#). USDA is providing this GAIN report only as a summary of public information provided by SENASICA. All questions regarding the LPO should be directed to SENASICA using the contacts listed above.

Background:

Mexico published its original national organic law and corresponding standards in 2006 under the *Ley de Productos Orgánicos* (LPO). See [GAIN Report No. MX6501](#).

In 2015, Mexico published allowance of a grace period (from May 2015–October 2016; see [GAIN report no. MX2015-2073](#)) for which organic exports to Mexico should come into compliance with the LPO and its regulatory updates in [2010](#) and guidelines on [labeling](#) and [production](#) in 2013.

On June 8, 2020, the Government of Mexico (GOM) published the Modifications to the Guidelines for the Organic Operations in its federal gazette, finalizing a multi-year process of revising the LPO's organic standards. Official GOM information about the guidelines can be found [here](#).

Although the LPO requires organic products imported to Mexico to be certified to the LPO standards, or an equivalent standard, Mexico agreed to not enforce these requirements while it was conducting equivalence discussions. As a result, U.S. organic exports to Mexico are certified to the NOP standard and have been shipped to Mexico where they could be legally marketed as organic and bear the USDA organic seal.

The December 2020 Measure:

On December 17, 2020, Mexico hosted a webinar with industry stakeholders and informed that SENASICA would begin enforcing the LPO requirements on December 28, 2020. Prior to this, in November 2020, Mexico published a draft measure on the Regulatory Improvement Commission's (CONAMER) [site titled](#), “Acuerdo que Establece las Mercancías Cuya Importación y Exportación está Sujeta a Regulación por Parte de la Secretaría de Agricultura y Desarrollo Rural” (“Agreement Establishing Goods whose Import and Export are Subject to Regulation by the Ministry of Agriculture and Rural Development”). See [GAIN Report No. MX2020-0078](#).

In Article 7 of the Measure, Mexico stated:

In accordance with the provisions of articles 33 and 35 of the Organic Products Law, and 45 of its Regulations, the importer must present to the DGIF staff, at the point of entry into the country, the current Organic Certificate that protects the organic quality of each of the goods to be imported, as well as the Control Document, issued by an organic certification body approved by SENASICA or by an organic certification body under the control system of a country with which Mexico is equivalent in terms of organic products.

This draft measure also included an annex and listed the products in tables b) – f) that would need to prove compliance under the LPO at the border (the Annex). This initial draft version gave a compliance deadline of December 28, 2020 (the date the measure would become final).

Mexico revised the draft Measure and [published the final version on December 26, 2020](#) in the *Diario Oficial*, to include a transitory Article Four, extending the compliance deadline to 180

days from the date the Measure entered into force (June 26, 2021). The measure entered into force on December 28, 2020, [per the *Diario Oficial*](#).

Mexico notified this draft measure to the World Trade Organization (WTO) Sanitary and Phytosanitary (SPS) Committee on December 21, 2020 as SPS/N/MEX/230/Add.3. On January 4, 2021, the United States submitted an Enquiry Point request to Mexico to notify the Measure to the Technical Barriers to Trade (TBT) Committee; the re-notification is pending.¹

Compliance Deadline:

Initially, Mexico planned for the Measure to be fully enforced on December 28, 2020. Mexico delayed the compliance deadline for 180 days until June 26, 2021. Due to the number of changes that organic industry stakeholders in both Mexico and the United States must make in order to fully comply with the LPO standards, USDA has asked for an extension until at least December 31, 2021. Until there is a written, public notice stating otherwise, U.S. stakeholders should prepare for compliance to the LPO standards on June 26, 2021. See [GAIN No. MX2020-0079](#).

Scope:

Raw Material / Ingredients

Annex b) – f) of the Measure lists the tariff codes for all products subject to compliance with Mexico’s phytosanitary, zoo sanitary, and aquaculture health requirements. According to SENASICA, for the products in Annex b) – f) to be listed as “organic” at the point of entry, they must be accompanied by an organic certificate demonstrating certification to the LPO and a transaction certificate issued by a certifying agent approved by SENASICA.

However, SENASICA states in its written responses to the April 12 seminar (Question 25) that only organic products that will be marketed in Mexico as organic need to be certified to the LPO. If raw materials are exported to Mexico as USDA organic, then processed in Mexico—but not marketed in Mexico—and re-imported to the United States or another country to be sold as USDA organic, those products do not need to be certified to the LPO.

For the most part, the products listed in the Annex b) – f) by 8-digit HS code are raw ingredients or bulk materials. In Annex b) – f), there are several listings for “others.” SENASICA has stated that the intent in these cases is to include all other products that are similar to the ones specifically named but which do not have their own tariff code due to a small trading volume. A *summary* list is included in the pages of this report; however, the *summary* list is for convenience only and affected parties should refer to the *full* list. The *full* list is included as a courtesy, unofficial, professional translation [here](#), as an attachment to this report.

¹ Organic standards do not address risks to plant, animal or human health, nor do they support health claims of any kind. WTO Members maintain separate and distinct regulations for determining whether a food is safe to consume, and for addressing plant and animal health. Organic programs, therefore, fall under the scope of the TBT Agreement.

Processed Products / Retail

SENASICA has also informed stakeholders in presentations and [via written responses](#) (find courtesy, unofficial English translation [attached](#) to this GAIN report) that an existing memorandum of understanding (MOU) between SENASICA and the Federal Consumer Protection Office (PROFECO) will expand the scope of LPO enforcement to all organic products marketed in Mexico, to include processed products at the retail level.

Mexican Outreach and Resources:

SENASICA first informed industry about the upcoming changes during a webinar on December 17, 2020. SENASICA also gave a [webinar to U.S. industry and stakeholders on April 12, 2021](#). Mexico requested questions regarding the LPO be sent to info.organicos@senasica.gob.mx, or by contacting SENASICA staff at +52 55 5905 1000, ext. 51509, 51523, and 51532.

Certification and Accreditation:

SENASICA [stated](#) that the following types of operations must be certified to the LPO:

1. Plant production
2. Plant production (wild collection)
3. Animal production (domestic)
4. Animal production of natural ecosystems or non-domestic
5. Animal production (insects)
6. Production of fungi
7. Processing of products from agricultural activities
8. Marketing of products from agricultural activities

SENASICA confirmed there are already several certifiers operating in the United States that are accredited by SENASICA to certify products to the LPO. The list of SENASICA-accredited certifiers is listed here: [SENASICA-Accredited Certifiers](#). Note, this previous link is a static link and may be replaced. Please visit [Padrón de Organismos de Certificación Orgánica](#) to see if the list of certifiers has been updated. For certifiers who are not currently accredited by SENASICA, but are interested in applying for accreditation, more information about the accreditation process can be found [here](#).

In the [April 12, 2021 webinar](#), SENASICA noted it estimates the accreditation process to take approximately 90 business days. To access the website for applicants, please see the link here: <https://sistemasssl.senasica.gob.mx/saocWeb/login.xhtml>. This website also has contact information for applicants seeking more information about the accreditation process and system by emailing ayuda.informatica@senasica.gob.mx or dialing +52 55 5905-1000 Ext. 51911.

Recertification:

SENASICA has [further clarified](#) that Mexico's [2013 Guidelines for the LPO](#), under Article 212, include the allowance for the "recertification" of products that already hold organic certification under another organic scheme, such as the USDA's.

Article 212: When dealing with the recertification of a foreign product made by another similar body, with which Mexico has no equivalence agreement, all the necessary measures must be taken to verify the scope, the validity of the previously issued certificate, and the applicability of the certification which confines it, as well as any other information regarding the competence of the body who made said certification. The recertification shall only proceed when the certification requirements are met and previously verified, the correction of the conditions or established noncompliances in the prior certification. The body must always document the noncompliances or the conditions under which they were certificated and their resolution.

Article 214: Every organic operator interested on: ...

b) Recertification of its organic operation must apply by means of form O-SQ-F-02 or that applied by the approved body.

This means that if an operator has a product with an organic certification (in this case, USDA NOP), the operator can request the "recertification" of this product and a certification body approved by SENASICA. SENASICA will (as long as it has all the information of the original certification process) verify compliance with LPO standards. While "recertification" may simplify the issuance of LPO certificates in most cases, SENASICA has informed certifiers an on-site inspection is required for "recertification".

SENASICA clarified that organic products only need to be certified to the LPO at the last point before entry into Mexico. However, SENASICA also cautioned that in the case of "recertification," the operator and the certification body should have clear visibility of the final product's supply chain, including the Organic Plans for all ingredients, to ensure organic compliance along the supply chain.

SENASICA has provided additional guidance to its approved certifiers regarding the "recertification" process for USDA organic products, including the level of verification expected in a product's supply chain. It is recommended that U.S. organic operators wishing to obtain LPO certification contact a SENASICA-approved certifier for more information about the certification requirements for their specific products.

Labeling:

SENASICA states that any food product must comply with the provisions of the Official Mexican Norm “[NOM-051-SCFI / SSA1-2010](#) - General Specifications for Labeling of Prepackaged Food and Non-Alcoholic Beverages.” These general labeling requirements apply to all products, organic and non-organic. For more information on FAS Mexico’s reporting on NOM-051, see link [here](#).

For organic products, operators certified under the LPO must state on their labels the provisions of Article 44 of the [2010 Regulations of LPO](#) and Articles 201 and 204 of the [2013 Guidelines for the Organic Operation](#) for LPO. For more information about the requirements in the updated June 2020 Guidelines, please see visit [link](#).

SENASICA also reconfirmed that use of Mexico’s organic seal is currently restricted to products grown in Mexico. Organic products exported from the United States to Mexico may bear the USDA organic seal, provided that the labels are otherwise compliant with Mexico’s other labeling requirements.

Enforcement:

According to [the Measure](#) and further confirmed by SENASICA, an organic certificate demonstrating certification to the LPO and a transaction certificate (also referred to as a “control document”) issued by a SENASICA-approved certifying agent will be required at ports of entry to Mexico. SENASICA noted that the control document can be presented in paper form or electronically.

SENASICA also noted that organic products deemed non-compliant with the LPO at the port of entry will not be denied entry but may not be marketed as organic in Mexico (i.e. they shall be marketed in Mexico as conventional). Mexico will make a notation on the entry documents that these products may not be marketed as organic in Mexico. Additionally, SENASICA informed stakeholders that there is an existing MOU with [PROFECO that will expand enforcement of the LPO regulations to all organic products at the retail level](#).

0406.20.01	Grated or powdered cheese.	
0406.30.02	Melted cheese, except grated or powdered.	Note: Containing in weight fatty matter not exceeding 36% and containing fatty matter measured in weight of the dried extract over 48%, presented in containers of a net content over 1 kg.
0406.40.01	Blue-veined cheese and other cheese containing veins produced by <i>Penicillium roqueforti</i> .	
0406.90.01	Hard, known as Sardo, when indicated in the package.	
0406.90.02	Hard, known as Reggiano or Reggianito, when indicated in the package.	
0406.90.04	Grana or Parmegiano-reggiano, containing by weight of fat 40% or less, with a weight of water content in non-fatty matter lower or equal to 47%; Danbo, Edam, Fontal, Fontina, Fynbo, Gouda, Havarti, Maribo, Samsøe, Esrom, Italice, Kernhem, Saint-Nectaire, Saint-Paulin and Taleggio, containing by weight of fat exceeding 40%, with a weight of water content in non-fatty matter exceeding 47% but not exceeding 72%.	
0406.90.99	Other.	NOTE: This tariff code considers the cheeses: Grana de padano, Parmesano reggiano, provolone, grated, Reggiano, Colonia and Danbo, soft, hard and/or semi-hard.
0407.11.01	Of hen of the <i>Gallus domesticus</i> species.	
0407.19.99	Other.	
0407.21.02	Of hen of the <i>Gallus domesticus</i> species.	
0407.29.01	For human consumption.	
0407.29.99	Other.	
0407.90.99	Other.	
0408.11.01	Dry.	
0408.19.99	Other.	
0408.91.02	Dried.	
0408.99.02	Eggs seabird guano.	

0408.99.99	Other.	
0409.00.01	Natural honey.	
0410.00.01	Turtle eggs of any type.	
0410.00.99	Other.	
0501.00.01	Human hair, unworked, whether or not washed or scoured; waste of human hair.	
0502.10.01	Pigs' or boars' bristles and waste thereof.	
0502.90.99	Other.	
0504.00.01	Guts, bladder, and stomachs of animals, other than fish, whole and pieces thereof, fresh, chilled, frozen, salted or in brine, dried or smoked.	NOTE: This tariff code considers raw entrails, entrails in brine; beef small intestine; bovine raw entrails (reticulum, rumen, omasum, abomasum and bladder); swine entrails; sheep and goat entrails, entrails in brine; small intestine.
0505.10.01	Feathers of the kind used for stuffing; down.	
0505.90.99	Other.	
0506.10.01	Ossein and bones treated with acid.
