

Required Report: Required - Public Distribution **Date:** November 26,2020

Report Number: SA2020-0017

Report Name: Retail Foods

Country: Saudi Arabia

Post: Riyadh

Report Category: Retail Foods

Prepared By: Hussein Mousa

Approved By: Mark Ford

Report Highlights:

U.S. exports of consumer-oriented food products to Saudi Arabia increased approximately 11 percent in 2019 to a record high of \$588 million while retail sales of packaged food were estimated at approximately \$20 billion. Even though COVID-19 delayed some U.S. exports in 2020, Post anticipates a recovery in 2021 due in part to a growing population with more disposable income. U.S. food is generally viewed as a higher-quality product, and the United States is well-positioned to gain market share in traditional retail outlets and several new home delivery food buying apps.

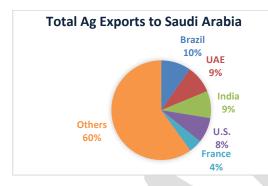

Market Fact Sheet: Saudi Arabia

Executive Summary

Saudi Arabia is a significant market for U.S. food and agricultural products. In 2020, Saudi Arabia's GDP was estimated at \$785 billion, positioning the country as the largest economy in the Arab world. They are projected to invest nearly \$59 billion in the food manufacturing sector in 2021 making it a major producer of agricultural products in the region. In 2020, the United States exported approximately \$1.4 billion in agricultural products to Saudi Arabia.

Imports of Consumer-Oriented Products

U.S. exports of consumer-oriented food products to Saudi Arabia increased nearly 11 percent in 2019 and that trend should remain steady in 2020 despite the negative effects of COVID-19. In 2020, Post anticipates U.S. exports of consumer-oriented products will top out near the \$588 million level from 2019 as a result of more online grocery store apps entering the marketplace.

Food Processing Industry

Saudi Arabia is home to a growing food manufacturing sector that benefits from population and income growth, life-style changes, state support, and favorable trade agreements. Demand for packaged foods is growing and more multinational companies are entering the market as a result. In 2020, Saudi Arabia imported approximately \$2.7 billion worth of intermediate food products, mostly for further processing. U.S. suppliers provided around 13 percent, or \$350 million.

Food Retail Industry

In 2020, total retail sales in Saudi Arabia were estimated at approximately \$37 billion, and 59 percent was generated through traditional grocery stores. The other 41 percent passed through modern retail channels, but traditional grocery stores have been declining over the past several years due to rapid expansion of new urban centers throughout the country.

Dependent on food imports and U.S. food is considered high-quality	Freight costs from the United States are higher than competitors		
Opportunities	Threats		
Retail, food service and food processing sectors are growing	Increased competition and regulators routinely issue complicated rules		

Data and Information Sources: Euromonitor, UN Trade Data and FAS Post Data

SECTION I. MARKET SUMMARY

The traditional retail sector is being displaced by hyper and supermarkets, and demand for packaged food continues to increase. Major drivers of this transition include increasing disposable income, a growing population and the creation and expansion of urban centers. Total 2019 retail sales of packaged food were approximately \$20 billion, and of that amount, 59 percent was generated through traditional channels while 41 percent came through modern retail channels.

U.S. food products typically command higher margins compared to imports from Asia and Arab countries and are generally viewed as a higher quality product compared to locally produced or imported products from other countries. As a result, demand for U.S. food products has been increasing. U.S. exports of consumer-oriented food products to the Kingdom increased by 11 percent in 2019 and reached a record high of \$588 million, which accounted for approximately 45 percent of the total U.S. agricultural exports to Saudi Arabia.

	have closed the market to several U.S. products.

SECTION II. ROAD MAP FOR MARKET ENTRY

The success of a U.S. company entering the Saudi market depends on its product, its market knowledge, and its ability to build relationships with established and knowledgeable importers. An experienced Saudi importer should know the market, import regulations, required documentation, and communicate with regulators. This link leads to recently published FAS GAIN Reports, especially the Agricultural Import Regulations and Standards (FAIRS) reports that potential U.S. exporters may find useful. These reports provide more detailed information on Saudi food regulations and certification requirements.

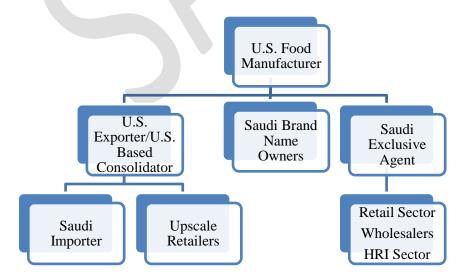

Market Structure

There are numerous food importers in the Kingdom of Saudi Arabia (KSA), and approximately 40 account for the bulk of food imports from the United States. For exporter business tips, please search for FAS Riyadh's recently issued Export Guide at this link. When considering Saudi Arabia as a potential export destination, please consider the following points:

- U.S. producers often sell directly to Saudi exclusive agents, pack for a Saudi private label, or sell exclusively to a U.S.-based consolidator.
- U.S. consolidators sell mostly to Saudi importers and, to some extent, major retailers. Often the consolidator is the sole regional agent of the U.S. manufacturer or brand owner covering the Middle East and Africa. Consolidators may also provide services such as placing Arabic labels on food packages.
- Most major Saudi importers operate well-established distribution networks and sell directly to retailers, wholesalers and the HRI sector all over the Kingdom.

Flow Chart of Distribution Channels

The flow chart below highlights the various marketing and distribution channels of imported food products in Saudi Arabia.

Major Supermarkets\Hypermarkets in Saudi Arabia:

There are no specialized food publications or retail journals in Saudi Arabia and as a result, reliable data on food retailers' sales and floor space is not readily available. Profiles on the major food retailers are below.

- **Panda Retail Company:** The largest retailer in Saudi Arabia. This publicly traded Saudi company has 230 retail outlets (hypermarkets and supermarkets) in Saudi Arabia. The firm also has two hypermarkets in Egypt and one in Dubai, United Arab Emirates (UAE). Most of the company's purchases are local, but it also imports directly. http://www.panda.com.sa
- Othaim Supermarket Chain: This Saudi company has 227 stores in Saudi Arabia and 46 stores in Egypt. The company has also several wholesale outlets. Most of the company's purchases are local, but it also imports directly. https://www.othaimmarkets.com
- **BinDawood Holding**: This Saudi company operates a total of 73 stores across the KSA, including the BinDawood and Danube supermarket chains and purchases food products locally as well as internationally. It recently announced that it is filing an IPO. https://www.bindawoodholding.com
- **Farm Superstores:** This Saudi company has 69 supermarkets in the KSA, and most of the company's purchases are local. It also imports directly. http://www.farm.com.sa/en/
- Al Raya Supermarkets: A Saudi-UAE company with 54 supermarkets in the western and southern regions of the Kingdom. It purchases domestically and imports some staple food products. https://www.alraya.com.sa/
- **Tamimi Supermarkets:** An upscale supermarket with 45 branches in Saudi Arabia and one in Bahrain. The company is one of the largest consolidated U.S. food products importers in Saudi Arabia. It is the only Saudi supermarket that currently sells chilled U.S. beef. https://tamimimarkets.com/
- LuLu Hyper\Supermarkets: A Dubai headquartered retailer with 36 outlets in Saudi Arabia, mostly hypermarkets. It has more than 150 hypermarkets in the Middle East and Asia. The company has plans to open five new Saudi supermarkets by the end of 2020. https://www.luluhypermarket.com
- Carrefour Saudi Arabia: It is a subsidiary of Majid Al Futtaim of UAE; the exclusive Carrefour franchisee in 38 countries across the Middle East, Africa, and Asia. They have 18 Saudi hyper and supermarkets, and mainly imports from France. Post has helped place some U.S. products in Carrefour. https://www.carrefourksa.com

Lulu, Tamimi, Danube, and Manual Supermarkets (a chain with nine outlets throughout Jeddah) imports a significant percentage of the food products they sell directly from the United States. LuLu owns and operates Y International USA, Inc.; a U.S. purchasing and logistics company based in Lyndhurst, New

Jersey, that will be opening additional U.S. branches. The logistics company sources and exports U.S. food products and consumer goods directly to LuLu in the Middle East and Asia while the other three retailers make extensive use of consolidators. Some products (like blueberries, strawberries, lettuce, cherry tomatoes, and other fresh produce) are shipped by air, but most products are shipped by sea.

In 2020, the COVID-19 pandemic shifted food demand to the retail sector and transformed home delivery businesses. Since most food service establishments were closed for several weeks during the outbreak, numerous food delivery apps were created. Various HRI focused companies entered the grocery delivery business, but Post anticipates the 48 mostly new delivery apps, as of October 2020, will likely consolidate. Unfortunately, demand at higher-end restaurants remains depressed and is expected to continue throughout the early months of 2021.

SECTION III. COMPETITION

The United States faces fierce competition in the Saudi food import market from Brazil, Egypt, the EU, India, New Zealand, Turkey, and the UAE.

Table 2: Saudi Imports of Select Food Products by Major Suppliers

Product Category	Supplier	Mkt	Strengths of Key	Advantages &

Fish Products \$460 million	1. Thailand 2. UAE 3. Indonesia 4. Norway 16. USA	31.5% 26.8% 12.6% 6.8% 0.4%	Thailand is the dominant supplier of fish products; it mostly ships canned tuna. The UAE reexports seafood, including U.S. products. Norway ships farmed salmon.	Saudi Arabia is a significant exporter of high quality commercial Red Sea shrimp to the EU, U.S. and Japan
Snack Foods	1.UAE	22.5%	The UAE is a	
\$416 million	2. Italy 3. Turkey 4. Poland 7. USA	17.8% 15.7% 8.0% 2.6%	regional food processing and exporting center. The EU and Turkey are also major suppliers due to quality and price.	Local snack food producers depend on imported raw materials, and they do not pay import tariffs on food products imported for reprocessing.
Beef & Beef	1. Brazil	44.8%	Indian buffalo meat	
Products	2. India	32.2%	and Brazilian beef	
\$349 million	3. Pakistan 4. USA 5. Netherlands	8.3% 3.2% 3.0%	target lower income consumers and the catering sector. U.S. beef commands a higher price.	The only significant beef production is dairy steers and spent dairy cows.
Fresh Vegetables \$316 million	 Egypt Jordan Netherlands Turkey USA 	31.5% 25.3% 12.6% 8.5% 0.9%	Price and availability are the major criteria when importing fresh fruit.	Saudi Arabia is 85 percent self-sufficient in fresh vegetables. Prices of locally produced vegetables are usually higher than imports.
Tree Nuts	1. USA	43.4%	Almonds account for	
\$269 million	2. India 3. Turkey 4. UAE 5. Hong Kong	26.2% 10.2% 9.0% 3.1%	the largest percentage of Saudi tree nut imports. The United States is the dominant supplier of almonds to Saudi Arabia.	No local production of tree nuts. There is some local repackaging and processing.
Processed Fruit \$174 million	1. India 2. UAE 3. Egypt 4. Turkey 5. USA	24.5% 12.6% 10.2% 9.4% 7.4%	Over the past few years, India has become the largest supplier of processed fruit to Saudi Arabia followed by the UAE and Egypt.	Some local food processors import frozen fruit for repackaging into smaller consumer-size containers.

IV. BEST PROSPECTS

Currently, more consumers in Saudi are seeking out the following products: healthier lifestyle products (diet foods, organic etc.), beef, poultry meat, beverage ingredients, non-alcoholic beer, tree nuts, dairy products, plant-based meats, fresh fruit and vegetables, processed fruits and vegetables, fruit and vegetable juices, honey, and snack foods. This link provides data on U.S. Exports of Agricultural Related Products to Saudi Arabia for the past five years.

V. KEY CONTACTS AND FURTHER INFORMATION

FAS Riyadh maintains an extensive network of food and agricultural contacts in Saudi Arabia and Bahrain and can provide lists of relevant Saudi food and agricultural product importers to U.S. exporters upon request. U.S. suppliers can contact Post to be matched with prospective importers, to qualify prospective importers, for assistance clearing consignments of U.S. products, marketing opportunities, or for market information and regulations.
