Exchange rate: 32.57 baht= U.S. \$1.00

Source: Average actual prices received from exporters

Export prices of all grades of rice decreased 2-3 percent due mainly to a further weakening of the Thai baht to 32.57 baht/U.S. \$1.00 from the previous week's exchange rate of 31.97 baht/U.S. \$1.00. The value of the Thai baht against the U.S. dollar is at its lowest since early this year. There are, however, new inquiries for parboiled and white (5% grade) rice from African countries. High freight costs for shipping routes to the west (North and South America) and to the east (Europe and Africa) remain a major concern for rice exporters. In addition, the upward trend of new cases of COVID-19 has exacerbated the possibility of the Thai economic stagnating in 2021. The Thai government imposed lockdown restrictions in Bangkok and several provinces from July 12-26, 2021.

## Rice Export Update

Unofficial and preliminary rice exports (excluding Hom Mali fragrant rice) for July 5 – 11, 2021, totaled 37,066 metric tons, down 47,071 metric tons from the previous week and down 34,614 metric tons from the four-week moving average of 71,680 metric tons (Table 2). Rice exports from January 1 – July 11, 2021, totaled 1,717,901 metric tons, down 20 percent from the same period last year.

**Note on data:** Export figures since March 22, 2002, do not include fragrant rice. In addition, between May 1, 2013 and December 18, 2016, export data did not include 25% -100% grade white rice exports as the reporting authority was moved from the Thai Board of Trade to the Ministry of Commerce's Office of Commodity Standards, which does not release official export data. FAS/BKK reports only the official export numbers available from the Board of Trade of Thailand. The reader should bear in mind these differences when comparing historical data with current data.
