The Turkish Grain Board (TMO) held an export tender on March 1, 1999 and awarded 105,000 MT of durum wheat, 325,000 MT red milling wheat, 150,000 MT white milling wheat, 100,000 MT white barley, 15,000 MT oats and 50,000 MT rye. Barley sales fell somewhat short of expectations and TMO still has substantial stocks of both durum and barley. TMO may have decided to limit barley sales in order to have stock on hand for the feed industry, which is reported to be experiencing shortfalls in availability and high prices for wheat bran. TMO lowered the specifications for the milling wheat in this tender, and is believed to have exhausted almost all of its better, export quality milling wheat.

TMO accepted the following bids:
