Report Name: USJTA Treatment for Coarse Grains 2021

Country: Japan

Post: Tokyo

Report Category: Country/Regional FTA's, Product Brief, Grain and Feed

Prepared By: Keiko Fujibayashi, Akiko Satake

Approved By: Alexander Blamberg

Report Highlights:

The U.S.-Japan Trade Agreement (USJTA) has been in effect for 17 months, however the timing of Japan's fiscal year meant that the agreement entered "Year 3" of implementation on April 1, 2021. This report is one in a series of product briefs highlighting the tariff benefits for specific commodities and products from Year 3 (2021) to Year 5 (2023) of the agreement. Additional information is available at www.usdajapan.org/usjta/.

Overview: In 2020, the United States exported \$1.9 billion of coarse grains to Japan, making Japan the #3 overseas market. The United States accounted for over 70 percent of Japan’s total imports of food grains, excluding wheat and rice. The years below correspond to Japan’s fiscal year beginning April 1.

Market Considerations: This agreement provides tariff parity with competing food barley suppliers such as Canada and Australia. Japan maintains a tariff-rate pooled quota under the World Trade Organization (WTO) for certain corn products for which the United States is a dominant supplier. While tariffs on most feed grains are already duty-free, tariff elimination in this agreement provides further opportunities for U.S. corn supply to Japanese snack manufacturers. Most imported U.S. sorghum goes to feed.
