Report Number: DR2021-0002

**Report Name:** United States Agricultural Exports to the Dominican Republic Reached an All-Time High During 2020 in Spite of the COVID-19 Pandemic

Country: Dominican Republic

**Post:** Santo Domingo

Report Category: Agricultural Situation

Prepared By: Virgilio Mayol

Approved By: Frederick Giles

## **Report Highlights:**

During 2020, U.S. total agricultural exports to the Dominican Republic increased by 6 percent, from US\$1.26 billion in 2019 to \$1.33 billion, reaching an all time high in spite of the COVID-19 pandemic. The growth was driven by exports of bulk products such as corn, pulses and rice. During the same period, Dominican total agricultural exports to the U.S. increased by 6 percent, from \$455 million in 2019 to \$484 million.

## U.S. Agricultural Exports to the DR

In 2020, U.S. total agricultural exports to the Dominican Republic increased by 6 percent, from \$1.26 billion in 2019 to \$1.33 billion. The growth was driven by exports of bulk products which increased by 26 percent, from \$308 million in 2019 to \$389 million in 2020. Intermediate products exports increased by 5 percent, from \$354 million in 2019 to \$371 million in 2020. Although consumer-oriented products continue to be the largest category of U.S. agricultural exports to the DR, in 2020 their export value declined by 4 percent, from \$602 million in 2019 to \$577 million.

The decline of consumer-oriented exports to the Dominican market is explained by the reduced demand for these products due to the COVID-19 pandemic. For example, exports of beef and beef products declined by 49% (from \$66 million to \$34 million), driven by lower demand as a result of hotel and restaurant closures, a prime source of demand for higher quality cuts of beef. A similar scenario occurred with products such as wine, beer, snack foods and prepared foods.

Bulk products had the largest increase in 2020. This increase is explained by:

- A 49 percent growth in corn exports. Although local consumption of corn decreased due to
  weaker demand from the local poultry sector, the United States regained market share last year
  from competitors such as Brazil and Argentina, due to better prices and logistical challenges in
  South America.
- A 76 percent growth in bean exports, explained by weak local production during the year.

• A 76 percent growth in rice exports, explained by production shortages during last year's production cycle.

In the case of intermediate products, the lower demand of locally produced poultry and pork products from the hotel and restaurant sector forced local producers to reduce their production. This resulted in lower demand for inputs such as soybean meal, which decreased by 6 percent.

## DR Agricultural Exports to the U.S.

In 2020, Dominican total agricultural exports to the United States increased by 6 percent, from \$455 million in 2019 to \$484 million. The growth was driven by exports of consumer oriented products which increased by 5 percent, from \$255 million in 2019 to \$269 million in 2020. Bulk products increased by 9 percent, from \$179 million in 2019 to \$194 million in 2020. Intermediate products exports remained stable at \$21 million.

As shown in the chart above, despite the impact of the COVID-19 pandemic Dominican agricultural exports to the U.S. remained strong. One factor is the increase in raw cane sugar exports to the U.S. market, from \$97 million in 2019 to \$116 million in 2020. The increase is due to the largest U.S. WTO tariff rate quota (TRQ) for sugar being allocated to the Dominican Republic during FY 2020. Additionally, strong exports of avocados, canned food, mixed condiments, greenhouse tomatoes and chili peppers contributed to this growth.
