Controls Applied to Imported Food Products

Report Categories:

FAIRS Subject Report

Approved By:

Dwight Wilder, Agricultural Attaché

Prepared By:

Alexander Tarashevych, Agricultural Specialist

Report Highlights:

This report on sanitary, veterinary, phytosanitary and ecological controls identifies the applied controls for specific commodity HS Codes. For detailed explanations of the controls in the included list, please refer to the FAIRS-Narrative report (UP1628). Ukraine has canceled compulsory conformity certification for all food products. This report replaces GAIN Report UP1502 submitted in February of 2015.

The Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Kyiv, Ukraine prepared this report for U.S. exporters of domestic food and agricultural products. While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the all import requirements with their foreign customers who are normally best equipped to research such matters and specific details with local authorities before any goods are shipped. **FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY'S RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.**

PRODUCT SPECIFIC CONTROL REQUIREMENTS (BY HS CODE NUMBER)

This report concentrates exclusively on Sanitary, Veterinary, Phytosanitary and Ecological controls applied to food and agricultural, fish and forestry products¹. The table is based on the Cabinet of Minister's [Resolution #1031](#) "On Control Issues of Goods Crossing Customs Borders of Ukraine"* (Adopted in 2011 with multiple amendments introduced in 2011-15). Ukraine has canceled all other decrees that introduced additional certification lists. Certification of food products including baby food was canceled in 2015. Certification of tobacco remains in place. Lists of products subject to import prior notification, licensing etc. are provided in the most recent FAIRS Narrative Report. The 2016 FAIRS Narrative can be retrieved [here](#).

The numbers in the table below indicate the following:

- 0 - The product is not subject to state control (including preliminary documentary control);
- 1 - The product is subject to state preliminary documentary control;
- 2 - The product is subject to the state control conducted by the official of the appropriate competent authority at the border crossing point;
- 3 - The product is subject to state control conducted by an official of the appropriate competent authority at the Customs crossing point (the point of entrance in the custom territory of Ukraine).

Products market with an "*" next to HS Code are subject to state control at the Customs border crossing point in a form of preliminary documentary control if the product arrives in hermetic, isothermal, isolated means of transport or containers.

¹ Post is aware of lack of legislation for products classified under HS 3507 (Enzymes; prepared enzymes not elsewhere specified or included). An importer is advised to contact FAS Kyiv directly if veterinary control requirement is imposed.

Customs inspection is mandatory for all products.

Radiological inspection must be conducted to verify compliance of all imported agricultural and food products with the maximum allowable levels of radio-nuclides contained in food in Ukraine.

A separate ecological inspection is conducted to verify compliance with the international agreements on trade in endangered species in the case of animal or bird importation and certain types of meat derived from wild animals.

The National Oceanic and Atmospheric Administration (NOAA) catch certificate confirming compliance with international catch rules is to accompany all fish and seafood products.
