Singapore

Food and Agricultural Import Regulations and Standards Report

FAIRS Export Certificate Report Annual 2018

Approved By:
William Verzani, Agricultural Attaché
Malaysia, Singapore, Brunei and Papua New Guinea

Prepared By:
Ira Sugita, Agricultural Specialist

Report Highlights:
This report discusses food and agricultural export product certificates currently required by the Singapore Government. The Agri-Food and Veterinary Authority (AVA) is the national authority responsible for ensuring food safety and food regulations in the country. In April 2019, the Singapore Food Agency (SFA) will take over AVA’s food related work, including regulatory responsibilities.

### NOTES:

FSIS - Food Safety and Inspection Service  
AMS - Agricultural Marketing Service  
For details on AMS’s bovine export verification program for Singapore, please click [here](#).  
* The Singapore Food Agency (SFA) will take over all AVA’s food related work in April 2019.

Complete details on required U.S. food and agricultural export certificates for Singapore can be found on the [FSIS Export Library (Singapore)](#).

### Section II. Purpose of Specific Export Certificate(s)

Please refer to the “Purpose” column in the chart in Section I.

### Section III. Specific Attestations Required on Export Certificate(s)

Please refer to the “Attestation Required on Certificate” column in the chart in Section I.

### Section IV. Government Certificate’s Legal Entry Requirements

The Agri-Food and Veterinary Authority (AVA) is currently the national authority responsible for food and agriculture matters in Singapore but it will cease to exist in April 2019. A new government agency called the Singapore Food Agency (SFA) is scheduled to take over all food-related regulatory responsibilities from AVA directly after its closure. A National Center for Food Science (NCFS) will be established under SFA to consolidate the food laboratory capabilities of AVA and all of AVA’s animal related functions (including animal and wildlife management) will transfer to the National Parks Board (NParks) under the Ministry of National Development (MND). Trade contacts report they are optimistic SFA will adopt AVA’s science-based risk analysis and management approach based on international standards such as Codex and OIE.
Several food/food products entering Singapore must originate from establishments approved by AVA. Also, multiple food/food products, including meat and meat products, processed eggs, fresh table eggs and live poultry, require proper accreditation and approved procedures with AVA. Overseas establishments that supply these products are required to apply for accreditation with AVA through the supplying country’s competent authorities. While other imported foods such as processed food products and fresh fruit/vegetables do not require facility registration, they are required to be sourced from suppliers that are under proper supervision of approved overseas regulatory authorities.

After complying with all export prerequisites, the importer can then apply for an import permit through the TradeXchange System. All current TradeXxhange e-services have been migrated to the Networked Trade Platform (NTP) by Singapore Customs. From November 2018 onwards, the NTP is only accessible via www.ntp.gov.sg AVA requires import permits for all food and food products brought into Singapore, regardless of the mode of transport.

Meat and Poultry Products:

Every consignment of imported meat products must be accompanied by a health certificate issued by a veterinary authority of the exporting country, certifying that Singapore’s animal health and food safety requirements are met. Every consignment of meat products will be inspected by AVA and sampling for laboratory analysis may be required. Some consignments may be placed on “hold and test” pending the outcome of the laboratory analysis. For the United States, relevant FSIS certificates include Form 9060-5 (Meat and Poultry Certificate of Wholesomeness), FSIS Form 9435-1 and Letter of Certificate (FSIS Form 2630-9).

There is a registration and approval process with AVA for processed beef and beef offal products, which establishments must complete prior to export. The registration and approval process is in addition to the AMS EV program requirements. Information regarding this process and details of Singapore’s residue limits for processed beef and offal are detailed in the GAIN Report Singapore Opens Market to Full Range of U.S. Beef Products. Please click here for the report. Singapore import requirements for U.S. beef, poultry and pork can also be found in the FSIS Export Library.

Fish Products:

Imported fish is regulated under the Wholesome Meat and Fish Act and its subsidiary legislation. Fish products refer to any of the varieties of marine, fresh water, crustacean, aquatic Mollusca, marine sponge, trepang and other form of aquatic life and their young and eggs, but excluding ornamental varieties. An import permit issued by AVA is required for every consignment of fish products.

Imported fish products are subject to mandatory inspection by AVA before sale is permitted. Sampling for laboratory analysis may be required. Some consignments may be placed on “hold and test” pending the outcome of the laboratory analysis before sale is permitted.

Generally, fish may be imported from any country without obtaining a health certificate. However, restrictions and conditions apply to fish classified as “high risk” products and fish specified under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES).
Fruits and Vegetables:

In general, fresh fruits and vegetables imported from the U.S. do not require export health or phytosanitary certification, but usually must undergo routine checks on arrival and are tested for pesticide residues. Exporters must ensure that the containers (baskets, cartons, etc.) of the produce are labelled properly, including name and address of the producers, product description and date of export/packing. For fresh fruits/vegetables, no application for AVA accreditation is required.

For preserved fruits and vegetables, exporters are required to comply with the labeling requirements stipulated in the Food Regulations, including microbiological standards, the use of food additives (e.g. chemical preservatives, sweetening agents, colors, etc.) and the maximum limits for various pesticide residues. For minimally processed peeled fruits and vegetables, microbiological and chemical tests are carried out. For certain commodities, such as groundnuts, pistachios, cashew nuts and corn, inspection and chemical analysis is carried out for the detection aflatoxins or other mycotoxins.

Processed Foods:

For certain types of processed food products, exporters have to produce documentary proof that the imported products are produced under sanitary conditions in a regulated establishment.

The regulated source documents that AVA accepts as documentary proof include:

- Certificate of HACCP (Hazard Analysis Critical Control Point)
- Certificate of GMP (Good Manufacturing Practices)
- Health Certificate (issued by competent food or veterinary authority of exporting country)
- Attestation of export (issued by competent food or veterinary authority of exporting country)
- Factory license (issued by regulatory authority of the exporting country)

All imported processed food products are subjected to inspection. Samples may be taken for laboratory analysis.

Specific Food Products:

For the import of specific food products, additional documents such as laboratory reports and health certificates may be required in the import permit application. Examples of specific food products include mineral water, soy sauce and oyster sauce.

For additional information on specific food products and their requirements, please click here (updated as of March 24, 2016).

Fresh Eggs:

Eggs must come from AVA-approved layer farms and only from the following countries: United States, Australia, Japan, West Malaysia, New Zealand, Sweden and Korea (as of January 29, 2015). Each consignment of fresh eggs must be derived from a single farm.

Every imported consignment must be accompanied by a veterinary health certificate issued by the relevant veterinary authority of the exporting country, and the certificate must be dated within seven
days of import.

Processed Eggs:

Eggs must be imported from AVA-approved sources. Accreditation is done at three levels: Exporting country level; individual establishment in the approved country level; and the products from the approved establishment level.

Each consignment of processed eggs must be accompanied by a health certificate issued by the competent authority of the exporting country. This is to certify that the imported products comply with Singapore’s animal health and food safety requirements.

Section V. Other Certification/Accreditation Requirements

For further details on food export requirements in the Singapore market, please refer to the FAS/Singapore Food and Agricultural Import Regulations & Standards Country Report/Narrative, Exporter Guide and Retail Report at the following web portal: http://www.fas.usda.gov/

17. REMARKS

---

19. I CERTIFY that the meat, meat food product or meat byproduct specified herein is from animals that received both ante-mortem and post-mortem inspection and were found sound and healthy and that it has been inspected and passed as provided by law and regulations of the Department and is sound and wholesome.

19. I CERTIFY that the poultry, poultry products or poultry food products specified above came from birds that were officially given an ante-mortem and post-mortem inspection and passed in accordance with applicable laws and regulations of the United States Department of Agriculture and are wholesome and fit for human consumption.

**NOT VALID UNLESS SIGNED BY A CERTIFYING OFFICIAL OF MEAT AND POULTRY INSPECTION PROGRAM**

By order of the Secretary of Agriculture

20. CERTIFYING OFFICIAL'S NAME AND TITLE

21. DATE SIGNED

This certifies to the best of my knowledge and belief that the statements below are true, complete, and accurate:

This certificate is issued in all counts of the United States as prima facie evidence of the truth of the statements therein contained.

This certificate does not excuse failure to comply with any of the regulatory laws enforced by the United States Department of Agriculture.

**FSIS Form 9435-1**
Letterhead certificate: Beef (on or after May 5, 2015)
Letterhead Certificate for Beef and Beef Products produced on
or after May 5, 2015 for Export to Singapore

Date Issued: ____________________ Certificate Number: ____________________

1. The United States is recognized by the World Organization for Animal Health (OIE) as having negligible BSE risk, satisfying the conditions in Chapter 11.5 of the 2013 Terrestrial Animal Health Code.
2. The product was derived from cattle that were born, raised and slaughtered in the United States or imported from countries approved by the government of Singapore. Note: Shipments destined for US military consumption only are exempt from this requirement.
3. The product was not derived from suspect or confirmed BSE cases, or suspect or confirmed progeny or cohorts of BSE cases, as described in the Terrestrial Animal Health Code adopted by the OIE.
4. The product was derived from cattle that were slaughtered in the United States and were not subjected to a stunning process with a device injecting compressed air or gas into the cranial cavity, or to a pithing process.
5. The product was derived from cattle that were subject to ante-mortem and post-mortem inspection.
6. Specified risk materials\(^1\) have been cleanly removed from products shipped to Singapore without contamination of the meat.
7. In the case of processed beef, the meat is not derived from mechanically separated/recovered meat.

Letterhead certificate: hog casing
Letterhead Certificate for Hog Casings to Singapore

Date Issued ______________________ Certification Number ______________________

1. The hog casings originated in the United States of America
2. The hog from which the casings were derived from were slaughtered on

3. The establishment control number of the U.S. slaughterhouse ________________
4. The establishment control number where the casings were prepared and stored

5. The casings were processed between (date of slaughter) and (date of packing on the package)
6. The USA is free from the foot-and-mouth disease, African swine fever, classical swine fever, swine vesicular disease and Teschen disease
7. Casings were packed
   a. So that each package containers products derived from a single species of animal only
   b. They were not exposed to contamination before export, they are packed in clean new or disinfected packaging containers
   c. Each barrel is numerically marked and contains establishment numbers
   d. Hog casings were stored for not less than 30 days after the slaughter of the animals from which they were derived

EQUAL OPPORTUNITY IN EMPLOYMENT AND SERVICES

Letterhead certificate: ovine casing
Letterhead Certificate for Ovine Casings Imported from New Zealand or Australia for Export to Singapore

Date Issued: ___________________ Certificate Number: ___________________

1. The ovine casings in this consignment were derived from animals originating and slaughtered in New Zealand or Australia at establishment number(s) ____________, on (date or date range) ________________.

2. The casings were processed and/or stored at U.S. establishment number(s) ________________.

3. The animals from which the casings were derived received ante mortem and post mortem inspection and were free from disease at the time of slaughter.

4. New Zealand and Australia is recognized by the OIE as free of foot-and-mouth disease (FMD)

5. Casings were packed:
   a) so that each packaging container contains casings derived from a single species of animal only.
   b) so that the casings are not exposed to contamination before export;
   c) in clean, new or disinfected packing containers and
d) so that the official establishment number of the establishment were the casings were packed is readily visible on the outer wrapping or package.
