Singapore

Retail Foods

Annual 2017

Approved By:
Joani Dong, Regional Agricultural Attaché
Malaysia, Singapore, Brunei and Papua New Guinea

Prepared By:
Alice Kwek, Agricultural Marketing Specialist

Report Highlights:
Singapore’s retail foods sector is highly developed, diverse, dynamic and competitive with different market segmentation. It is an open economy and dependent on international trade and imports 90 percent of its food needs. In 2016, Singapore imported $11 billion worth of agriculture, fish and forestry products. The United States was the fourth largest supplier with a market share of 8 percent valued US$872 million. Best U.S. prospects include fish and seafood, dairy products including cheese, meat products, fresh produce, snack foods and processed fruit and vegetables, tree nuts and wines.

SECTION I: MARKET SUMMARY

Singapore, with a population of 5.6 million, is wealthy and urban. It has a highly developed market economy and is strategically located in the middle of key trade flows from Asia, Australia, Europe, the Middle East and the United States. Singapore is one of the world’s most open economies and dependent on international trade. Singapore is a global commerce, finance and transport hub. It is the most technology-ready, top international meetings city, with the best investment potential, second most competitive country, third largest foreign exchange market, third largest financial center, third largest oil refining and trade center and the second busiest container port. The main pillars of the economy are electronics manufacturing, pharmaceutical manufacturing, oil refining and petrochemicals, banking, insurance and financial services, tourism and trade. Singapore’s total GDP of US$297 billion is the ninth largest economy in the Asia Pacific region.

Singapore is at the cross-roads of major air and sea routes within the Asia Pacific region and serves as a hub and major transshipment center for much of the Southeast Asian region and the Indian subcontinent. Singapore’s role in regional trade is demonstrated by the fact that re-exports comprise 45-50 percent of total exports. Her strategic location also contributes to Singapore’s position as a regional food showcase and headquarters for international food and agricultural related companies.

Singapore is almost entirely dependent upon imports for all of its food requirements with virtually no local agricultural production. There are no import tariffs or excise taxes for all food and beverages, except for alcoholic beverages and tobacco products and a Goods and Services Tax (GST) of 7 percent levied for all goods and services at the point of distribution. In 2016, Singapore imported $11 billion worth of agriculture, fish and forestry products. The United States was the fourth largest supplier with a market share of 8 percent valued at US$872 million in total. Malaysia, Indonesia and China are the top three supplying countries in descending order.

The total value of imported consumer oriented foods was $6.22 billion in 2016. A total value of US$1.07 billion of fish and seafood products were also imported. Major consumer-oriented food imports include dairy products, alcoholic and non-alcoholic beverages, meat, fresh fruit and vegetables, snack foods and processed fruit and vegetable. The U.S. is a major supplier of fresh produce and processed fruits, meats, poultry meat and products (excluding eggs), dairy products, and prepared foods.

Competition with U.S. agricultural products comes from Australia, New Zealand, EU, Brazil, China and neighboring countries such as Malaysia, Indonesia and Thailand, who export similar consumer oriented products, including temperate fruits and vegetables, fruit juices, nuts, wines, processed packaged and canned food products, confectionery and candies, frozen poultry and frozen meats. As the market for consumer-oriented products is open and easily accessible, there is quick entry for new comers. However, competition in some of the consumer product categories can be intense.

**Major Food Retailers.** The Singapore’s retail sector is highly developed and competitive, total sales were US$6 billion in 2016. The four major categories of retailers are: (1) large retailers including supermarkets and hypermarkets; (2) convenience retailers; (3) traditional stores and (4) specialty stores.
The sector is dominated by three key players: the NTUC FairPrice Cooperative, Dairy Farm International Holdings and Sheng Siong Supermarket.

1. **NTUC FairPrice Cooperative** is the leading grocery retailer with a market share of 34 percent. NTUC has a network comprising 112 Fairprice supermarkets, 16 Finest stores and 8 Fairprice Xtra (Hypermarkets). In addition, the group has 160 Cheers convenience stores and 23 Fairprice Xpress convenience stores, some of which are located in Esso-Mobil Stations. While the primary targets are low to middle income consumers, NTUC reaches out to the middle income consumers through its Fair Price “Finest” chains. Warehouse Club, a first membership-only retail warehouse was launched in 2015 by NTUC offering bulk groceries and consumables. Annual membership fee is priced at US$ 35.

   - Competitive pricing is one of the main factors determining whether a new product should be procured for the NTUC Fairprice stores. The NTUC Fairprice chain is the most extensive, in terms of consumer reach, geographically, and across all income segments. Fairprice stores are located in almost every large residential population concentration. Importers who require their products to be distributed island-wide and with the focus on the mass market prefer to work with NTUC Fairprice.

*NTUC Fairprice* supermarket chain procures its food products from consolidators, distributors and local importers. Since 1985, the company has also embarked on extensive house branding of basic essentials like confectionery, rice, bread, sauces, cooking oil, toilet paper, tissue paper, sugar, detergents, canned fruits and vegetables, etc. The items are, on average, priced 10 to 15 per cent lower than comparable products. In July 2008, “Pasar Organic” was added to the range, offering organic produce at affordable prices.

2. **Dairy Farm International Holdings** (DFI). The largest supermarket chain in terms of number of supermarket retail stores is the Dairy Farm International Holdings with 126 supermarket stores, comprising of 52 Cold Storage supermarket retail stores, 9 premier Market Place stores, 5 Specialty stores and 27 Giant Express, 25 Giant Supermarkets and 8 Hypermarkets. DFI targets each consumer segment from the high income consumers to discounts stores with their different store formats. They have the Cold Storage Supermarket stores which cater to the middle to upper income group; The Market Places and Jason’s The Gourmet Grocer Specialty stores which focus on high and upper middle income consumers. And the Giant brand targets the lower income segment and or the budget conscious customers. DFI operates 7-11 convenience stores brand located island-wide as well as the 152 Guardian Pharmacy outlets.

   - A large percentage of products on their shelves are western-type products from the EU, Australia, New Zealand and the United States found in their marketplaces in upper middle-income residential areas. Customers close to outlets are principally expatriates and upper middle-income residents.

   - DFI procures its food products from consolidators, distributors and local importers as well as sources directly from supplier countries to eliminate the middlemen in order to pass along savings to customers. The company has also embarked on extensive house branding of basic essentials like confectionery, rice, bread, sauces, cooking oil, toilet paper, tissue paper, sugar,
detergents, canned fruits and vegetables, etc. The items are, on average, priced 10 to 15 per cent lower than comparable products.

3. **Sheng Siong Supermarket**, a local chain owned by two brothers targets the lower income consumers with their 45 stores located in residential heartlands (Government subsidized apartments or commonly known as HDB – Housing Development Board). Their stores are designed to provide a “wet and dry” shopping experience to local customers (wet refers to the traditional wet markets where residents live). It is not uncommon to find products meant for ancestral and religious worship such as joss paper, joss sticks, incense, oils, etc. in the shelves of most Sheng Siong supermarkets. During the past 9 years, Sheng Siong has also embarked on house branding of basic essentials with lower prices compared to National brands. They procure mainly from neighboring countries such as China, Malaysia, Indonesia, Thailand and Vietnam. And they buy in bulk and repackag in retail packs for sale in their stores.

**Key Trends**

- According to *Euromonitor*, Internet retailing in Singapore is growing with forecast sales of US$1.1 billion in 2016 to US$2.3 billion in year 2020. An estimated 10 percent of internet retail sales are expected to come from online grocers in 2016. Online grocery retailing used to be dominated by major supermarket retailer Cold Storage and NTUC Fairprice; however, Redmart, a new competitor since 2011 which offers consumers the choice of same day grocery delivery within 2-hour timeslots, and Honestbee since 2015, has since changed the game of online grocery retailing. An example would be NTUC Fairprice’s introduction of “Click and Collect” last year, a service which allows consumers to order online and collect them from their preferred retail outlet at their convenience. The latest entrant in the third quarter of 2017 that is set to elevate competitiveness in internet retailing, is Amazon’s grocery delivery service, *Amazon Fresh*.

- NTUC Fairprice Finest are opening more 24-hour supermarket at select locations to serve consumers outside the normal shopping hours.

- Hypermarkets witnessed the fastest growth in 2016 due to a new entrant, *Big Box* in December 2014 which offers three vast stories of retail space, offering an impressive range of brands and products including groceries, furniture and tyre-fitting. Their ability to offer products that are cheaper than those of their competitor retailers is made possible by lower rental cost under Singapore’s Economic Development Board’s Warehouse Retail Scheme.

- Halal Groceries. New hypermarket *Big Box* and chain supermarkets such as *FairPrice*, *Giant*, *Cold Storage* and *Sheng Siong* also have halal-certified sections in select stores that cater to Muslim consumers.

- Health and Wellness. The Singapore Government is intensifying its efforts to promote health consumption and living. As such, Singapore consumers are well informed and discerning about the ingredients contained in their food, opting to buy products with reduced fat and sugar. There is an increasing number of consumers who now scrutinize product labels, paying close attention to ingredients and nutritional value.

- Price Points. The affluent Singapore consumers are price sensitive, yet are impulse shoppers when it comes to grocery shopping. Loyalty programs with exclusive products and rewards such as rebates, for e.g. the *NTUC Fairprice’s* “Plus” loyalty program, appeal to Singapore consumers. They are attracted to price discounts and sales promotions.
• The number of specialty retail stores offering premium and/or organic and natural food products are also increasing.

• There is a saturation of convenience stores. Retailers reported a decline in convenience and revenue-generating staples such as tobacco and media products. As most convenience stores are located near each other, competition is keen and intense. In addition, they also face stiff competition from supermarkets that offer products at lower and affordable prices as well as a wider range and variety. Additionally, an increasing number of supermarkets are extending their operating hours to cater to consumers, thus increasing competition.

• The food/drink/tobacco specialist category remains fragmented. Within “others,” most is represented by bakery specialists. Many independent bakery specialists are located in neighborhood areas, catering to local residents. Independent bakery specialists are gaining popularity among consumers as consumers are able to purchase bread and cakes at lower prices. On the other hand, consumers are also shifting towards more lifestyle products which include artisanal bakery products. This is mainly due to growing affluence among consumers which encourages them to purchase more artisanal and a wider variety of products.

**Traditional vs. Modern**

• Convenience is the key in the Singapore industry especially for those time-strapped working consumers. The preference is towards modern grocery retailers, such as supermarkets and hypermarkets in particular. Such stores offer one-stop shopping for consumers; a clean, comfortable, and air-conditioned environment extended opening hours as well as loyalty programs and weekly promotional offerings.

**Point to note:**

1) Agents and distributors bear advertising costs for the products that are placed in weekly advertisements.
2) For a new product, an initial slotting fee is charged by supermarkets in order to have its product placed on their shelves. The fees vary greatly depending on the product, manufacturer and market conditions. Note: a new product undergoes a review panel, if it fails to pass the panelists, the new product will not be placed on the shelves.

3) Agents/distributors pay for shelf space for their products in any store format.

- Traditional grocery retailers such as wet markets and independent small grocers are losing their market share due to strong competition from modern grocery retailing. Consumers prefer to shop at modern grocers as they accept different payment methods and are highly accessible, offer a wider product range and comfortable and pleasant shopping experience.

However, there is still a small group of regular or loyal homemakers and elderly who perceive food products from wet markets as fresher than products from supermarkets. Some believe that bargaining for lower prices in wet markets could land them with better deals than the latter.

Advantages and Challenges for U.S. Exporters in Singapore’s Retail Market

<table>
<thead>
<tr>
<th>Advantages (Sector Strengths and Market Opportunities)</th>
<th>Challenges (Sector Weaknesses and Competitive Threats)</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Singapore relies on imports for most of its food and drink supplies.</td>
<td>• Singapore’s retail food market is in a maturing and highly competitive state, i.e.</td>
</tr>
</tbody>
</table>
growth has slowed compared to a decade ago.

- Singapore is one of the wealthiest markets in S.E. Asia, and is a key location for expatriate families to reside in East Asia. It has a small lower income group.
- Singapore’s now evident multi-track market is creating challenges for products that are commodities, poorly differentiated or not well supported by marketing activities in retail channels.

- Singaporeans are well-traveled and have a modern diet that includes a wide range of foreign concept foods.
- Singaporeans are price sensitive when it comes to buying food items, e.g., meat and poultry, fresh fruits and vegetables, breakfast cereals (millennials) and soft drinks. This is underpinned by imported food price inflation over the past 5 years, and it provided opportunities for ASEAN-made and Chinese suppliers to increase their market shares at the expense of exporters such as the United States and Australia.

- Singaporeans generally perceive “Made in USA” and its brand-owners as quality suppliers of food and drink products.
- The Singapore market is well segmented with competition of U.S. suppliers from the factories of Asian/ASEAN based multinationals, China and the “traditional” supply bases in Australia, the EU and New Zealand.

- U.S. brand-owners and some USDA cooperators have good shares in some of Singapore’s mainstream market segments (breakfast cereals and some fresh fruits) and smaller niches such as organic products.
- U.S. exporter weakness in the inability to service Singapore importers, retailers and end consumers in a way that closely meets specific requirements and expectations such as on order sizes, packaging and formats, taste, pricing that “fits” the market and need for promotional support. This is viewed negatively by Singapore importers.

- Some U.S. products are not understood by Singaporeans and are never explained to them, e.g., ready-to-consume prepared TV dinners. Such products do not “fit” local food culture that prefers fresh foods.

**SECTION II. ROAD MAP FOR MARKET ENTRY**

1. Entry strategy

Get an understanding of the Singapore retail market, for e.g. consumer preferences and what sells and works well. Interested U.S. exporters are advised to conduct market research on their own specific opportunities to confirm how their products fit in the Singapore market, and develop a sound and appropriate business export plan and or market strategy. Market research as the following:
- Product fit. E.g. as a mass market item, high-end niche item, novelty/exotic item, seasonal festive/gift item, etc.;
- Price competitiveness versus available and comparable brands already in the market;
- Packaging size and quality that meets customers’ expectations;
- Determine how the product fits into the local food culture;
- What kind of market communications are necessary to create brand support and consumer education;
- Ability to meet retailer purchase requirements and specifications.

Study what successful U.S. exporters have done in practice in the Singapore market.
- Identify and appoint a knowledgeable and experienced importer/distributor as a strategic partner.
- Understand the Singapore’s regulatory body, i.e., Agri-Food and Veterinary Authority of Singapore’s governing food regulations, documentation and certification requirements, particularly in exporting fresh produce, fresh and processed meat, poultry and fish and seafood.
- U.S. exporters seeking a sustained market presence should place their products in the major supermarket chain stores such as the Cold Storage, Market Places, and FairPrice Finest supermarkets.

2. Distribution Channels
Food products in Singapore are generally distributed through local importers/distributors who supply them to retailers. Large retailers also procure directly for cost efficiencies, and they have their own warehousing facilities to store and to repack goods. Distribution to wet markets, hawkers, and small neighborhood stores is usually managed by a number of intermediary wholesalers; however, market penetration of U.S. products in these alternative channels is limited.

Singapore’s distribution channels for consumer-ready foods are dominated by supermarkets and hypermarkets, and the two leading convenience store chains, i.e. 7-Eleven and Cheers which are also owned and operated by the two leading supermarket operators, NTUC FairPrice Cooperative and Dairy Farm International Holdings.

A. Super Stores, Supermarkets, Hypermarkets Or Super Centers, Club And Warehouse Outlets

The table below provides information on the major retailers:

<table>
<thead>
<tr>
<th>Retailer</th>
<th>Outlet Types</th>
<th>Annual % Sales (2016)</th>
<th>No. of Outlets</th>
<th>Location</th>
<th>Procurement method</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fairprice (cooperative)</td>
<td>Super, hyper, convenience, and online retailing</td>
<td>34%</td>
<td>285 outlets</td>
<td>Island-wide</td>

<td>Directly, consolidators and agents/distributors.</td>
</tr>
</tbody>
</table>

Other major retailers with fewer supermarkets include:

- *Prime Supermarkets* with 19 stores, mainly located in heartlands (neighborhood areas) and
operate on a 24-hour basis, targets budget-conscious consumers.

- Two Japanese retail stores: (1) *Meidi-Ya Singapore*, an overseas branch of *Meidi-Ya Co Ltd*, one of Japan’s premium supermarket operators; and (2) *Isetan Supermarket*, another Japanese chain; *Mustafa* supermarket, in Little India, carries a variety of products, importing from India as well as other countries, including the United States, for low-cost products.

### B. Convenience Stores and Other Small Format Stores

</tr>
</tbody>
</table>

### C. Traditional Markets – “Mom And Pop” Small Independent Grocery Stores And Wet Markets

With the exception of fresh fruits destined for the wet markets, U.S. sales to this sub-sector are limited. These stores carry mainly local or imported foods from neighboring countries such as Malaysia, Thailand, Indonesia, Vietnam and China. The other exception is small independent boutique shops, which specialize in wines, “natural” or and organic, artisanal breads as well as gourmet foods.

### SECTION III. COMPETITION

<table>
<thead>
<tr>
<th>Product Category</th>
<th>Major Supply Sources</th>
<th>Strengths of Key Supply Countries</th>
<th>Advantages/Disadvantages of Local Suppliers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dairy (Inc. Cheese) Net Imports: $689,237,020</td>
<td>1. New Zealand - 29% 2. Australia: 21% 3. Thailand: 8% 4. France: 6% 7. U.S.A.: 4%</td>
<td>NZ: freight advantage and exportable supplies; traditional supplier Australia: freight advantage, leads in liquid milk; and processed cheese. Most retailers’ in-house brands are imported from Australia.</td>
<td>Local dairy companies are strong competitors and have brand/name familiarity with the domestic consumers. The local brands include Magnolia, Farmhouse, Daisy (F&amp;N), Meiji (Meiji Co. Ltd.) and HL and Marigold brands (Malaysian Dairy Industries)</td>
</tr>
<tr>
<td>Poultry Net Imports: $254,735,440</td>
<td>1. Brazil: 76% 2. U.S.: 12% 3. Argentina: 3% 4. Malaysia: 2%</td>
<td>Brazil is the most price competitive. Notable Brazilian brands include Borella, Sadia and Seara. U.S. has been losing market share.</td>
<td>Malaysian live chickens are imported and slaughtered.</td>
</tr>

<td>-------------------------------------------------</td>
<td>----------------------------------------------------------------------</td>
</tr>
<tr>
<td>Snacks</td>
<td>$381,949,721</td>
<td>Made in Malaysia, Indonesia, Thailand &amp; China International Brands such as Mars, Nestle, Kraft Mondelez dominate the market. Stiff competition for expensive shelf space. U.S. top category is chocolate.</td>
<td>A strong local snack manufacturing sector exists, but there is room for more. Popcorn snacks are gaining popularity.</td>
</tr>
<tr>
<td>Eggs and products</td>
<td>$117,379,460</td>
<td>Malaysia has close proximity and lower transportation costs. AVA’s strict import requirements, limit U.S. opportunities.</td>
<td>Three local farms produce eggs, and are seeking various ways to differentiate their eggs.</td>
</tr>
<tr>
<td>Fish and seafood</td>
<td>$1,072,726,864</td>
<td>Price competitive. ASEAN countries and China dominate. Fresh/chilled/ prawns, live crabs, frozen cuttlefish, and squids are key products.</td>
<td>90% of fish and seafood is imported. The remainder is supplied by the 100 sea-based aquaculture operations. Production is increasing.</td>
</tr>
<tr>
<td>Fresh fruits group</td>
<td>$525,958,250</td>
<td>Top U.S. fresh fruits: grapes, oranges, strawberries and apples. U.S. dominates sales of these fruits when they are in season. Very competitive market with supplies from different sources.</td>
<td>Singapore does not grow any fruits.</td>
</tr>
<tr>
<td>Fresh vegetables</td>
<td>$447,011,317</td>
<td>Top suppliers have freight advantage in shipping these perishables. U.S. products re air-flown and caters to the premium market.</td>
<td>Singapore neither produces fresh vegetables nor produce products that compete with U.S. vegetables.</td>
</tr>
<tr>
<td>Dried fruits</td>
<td>$16,602,377</td>
<td>The U.S. is the main supplier of dried fruits.</td>
<td>Singapore is not a major producer of edible nuts</td>
</tr>
<tr>
<td>Edible Nuts</td>
<td>$123,428,052</td>
<td>U.S. nuts are very popular. Some are repacked and sold under local brands.</td>
<td>Singapore is not a major producer of dried fruit.</td>
</tr>
</tbody>
</table>
### Non-alcoholic beverages

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>

</tbody>
</table>

1. France: 53%
2. Australia: 8%
3. Malaysia: 5%
4. Vietnam: 5%
7. U.S.A.: 3%

France dominates the premium wine market. Australia dominates the retail market with its “mass market” wines to premium ones. The U.S. competes both on the “mass market” and premium products. For beer, Asia Pacific Breweries (APB) and import leader Carlsberg (Malaysia) dominate the domestic market.

Singapore does not produce wines. Asia Pacific Breweries (APB), Singapore’s biggest beer manufacturer dominates the beer market with well established brands such as Tiger, Heineken, Anchor, ABC, Baron, and Guinness stout. APB has a diverse repertoire of other imported beers.

### Pet food (dog and cat food)

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>

1. U.S.: 30%
2. Thailand: 30%
3. Australia: 8%
4. China: 7%

Mars Pet Food’s Pedigree, Cesar and Royal Canin and Nestlé’s Purina and Hill’s Science Diet brands dominate.

Singapore does not produce retail pack pet foods.

(Source: Global Trade Atlas)

### SECTION IV. BEST PRODUCT PROSPECTS

Singapore does not impose tariffs on imported goods. Singapore levies a 7% Goods and Services Tax (GST) on all goods.

Except for the following, all other goods enter the Singapore market duty free:

a. alcoholic beverages (intoxicating liquors),
b. tobacco products,
c. motor vehicles and
d. petroleum products.
### Category A: Products Present in the Market with Good Sales Potential
