Review of USA Pavilions @ 2012 SIAL China Show

This year at the 2012 SIAL China trade show, USDA’s Agricultural Trade Office (ATO) Shanghai coordinated two American pavilions with a record 75 companies/associations exhibiting great American food and beverage products at the show. The ATO has been participating in this show for more than 10 years, but this was the first time it coordinated a USA Wine/Spirits pavilion. Consul General Robert Griffiths spent several hours at the show on the opening day, May 9, visiting with most of the 75 U.S. exhibitors. Agricultural Minister Counselor Scott Sindelar and ATO Directors from Beijing and Guangzhou also attended parts of the show.

The 75 companies in the US pavilion at SIAL China made $2.5 million USD in on-site sales and project that they would make an additional $28 million in sales over the next 12 months because of SIAL. The
show featured 16 American exhibitors making their first foray into China. The SIAL China show is one of the premier food and beverage trade shows in China and attracted 40,000 visitors from 50 countries from May 9-11. The U.S. pavilions, which were organized by ATO Shanghai, were not only the largest we have ever had but also featured the largest national pavilion at the show. More than 1,000 SKUs of American products were introduced and test-marketed. The products that most attracted local traders include dried fruits and nuts, dairy, packaged food and beverage products.

The ATO organized a pre-show briefing for the exhibitors on May 8 featuring presentations from Arthur Huang of on-line retailer, Yihaodian, Daniel Zhou GM of Goodwell Trading, and Mark Thompson of Keller and Heckman law firm which specializes in Chinese food safety regulations. On the second day of the show, ATO Shanghai organized an American Chef demonstration at the La Cuisine kitchen area and coordinated a trade dinner in honor of the US exhibitors which included around 350 key trade contacts. SIAL China 2013 will be held from May 7 - 9 in Shanghai. For photos of the USA pavilions/activities, please visit http://www.flickr.com/photos/usdachina/sets/USA Pavilion Activity @ SIAL China 2012

**AHEC Unlimited Creativity Event**
On April 10, the American Hardwood Export Council (AHEC) organized an award ceremony celebrating a Greater China Furniture Design Competition focusing on chair designs using American Hardwoods. The program also included an educational seminar and press conference. Mr Patrick Fong, a Hong Kong interior designer and architect, was the Chief Juror. Other jury members include Ms Rosanne Somerson, Interim Provost of Rhode Island School of Design (RISD) and Department Head/Professor of Furniture Design; Ms Amy Devers, celebrity US DIY TV show anchor and furniture designer; Mr Chen Bao Guang, Vice Chairman of China National Furniture Association; Mr Tony Lin, Former President of Singapore Industries Council and President of Eurosa Furniture Company (Pte) Ltd, as well as the famous interior designer and architect Mr Steve Leung. This series of events presented designers a variety of interesting and sustainable materials for multiple use and illustrated that talented Asian designers are gifted in bringing out the natural beauty of US hardwoods. The China Furniture Design Competition event enabled AHEC to deepen its connection and communication with local designers to raise their interest in US hardwoods in terms of material choice. Amy Devers gave the audience an overview of her background and furniture design experience along with video clips of several of her DIY television programs where she teaches American viewers how to upgrade their homes using lumber products and recycled materials. One of the speakers from the Chinese furniture industry mentioned that a new 5-star hotel opens in China every week. Therefore, the Chinese furniture manufacturing industry has seen major shift from exporting furniture to servicing domestic needs which are growing rapidly. Interesting chair designs...

**The Most Innovative**
Subject: Direction, Winner: Liu Dan (Shunde, Guangdong)
Presented by Mr Keith Schneller, Director of Agricultural Trade Office, Shanghai

**Anderson Hay Scholarship Award Ceremony**
The Anderson Scholarship 2012 Award Ceremony & Dairy Seminar was held on April 13 in Beijing. Mark Anderson, President of Anderson Hay & Grain Company, Lou Vanechanos from USDA/APHIS/Beijing, Joshua Lagos from USDA/FAS China/OAA, Gu Jicheng, the Secretary General of China Dairy Association, and senior executives of World Wide Sires China were present at the ceremony and delivered speeches. Mark Anderson noted “in 1987, Anderson initiated US alfalfa shipments to China with one or two containers monthly to the only Chinese user at that moment, which represented China's whole volume, but I was always dreaming to supply more quality forage to China though quite a lot of my US friends told me there won’t be huge alfalfa market in China as Chinese people don’t drink milk... now China has become the 2nd biggest economy in the world…” For full story, please click here.

Livestock Seminars Highlight Soy-Based Diet in China
In April 2012, USSEC staff in China hosted two seminars on the advantages of including soy in livestock rations. More than 500 livestock farmers attended the seminars in Jiangsu Province, which is one of the top producers of livestock feed, pork, poultry meat and eggs in China.

The seminars continued the joint-promotion effort between USSEC and East Ocean Grains & Oil Industries Co. to educate livestock farmers on the nutritional benefits of a soy-based diet. The company is China’s largest soybean crusher and processes more than 12,000 metric tons of soybeans each day. East Ocean accounted for 11 percent of the total U.S. soybean sales to China last year. China ranks as the top export market for U.S. soy.

Richard Han, animal utilization technical director; Sam Shi, swine technical consultant; and Leo Liu,
Agriculture has developed a new line of MSG-free, easy-cook noodles that will enable it to delve into an unknown yet lucrative fast moving consumer goods (FMCG) sector in China. (Source: Foodnavigator.com)

**BASF backs Chinese functional bakery**
China’s bakery sector is fast developing but there are unmet needs for healthier products that BASF Nutrition is hoping to tap into following its presence at Shanghai trade show Bakery China 2012 last week. (Source: Foodnavigator.com)

**Napa Valley Tasting Event at Peace Hotel Shanghai on April 20**
Napa Valley Vinters technical manager, delivered presentations about the global poultry market, biosecurity on livestock farms, and the use of extruded full-fat soybean meal in animal feeds. Xiaoping Zhang, ASA-IM China country director and Xuansheng Li, sales director for COFCO Oilseed meal processing division, also attended the seminars.

![USSEC team members with COFCO Eastocean Soymeal Sales Team after the seminar.](image)

**2nd International Soy Food Industry Development Conference**
ATO Shanghai Director Keith Schneller delivered opening remarks at the 2nd International Soy Food Industry Development Conference which was held from April 18 - 20 at the Shanghai Everbright Int’l Hotel Convention Center. The two-day conference was sponsored by China Food Industry Association-Bean Product Committee and the American Soybean Association-IM which co-sponsored the first event held in 2010. This event will be held every other year.

About 150 people in this industry participated this conference. For this event, Mr. Bruce Abbe, Executive Director of Midwest Shipper’s Association,
held a series of wine promotion events in Shanghai’s historic Peace Hotel on April 20. The morning session featured a Wine Education Seminar followed by a wonderful wine pairing lunch. The afternoon wine tasting event attracted wine lovers from across China who had the chance to meet with the 35+ wine makers who were part of the visiting delegation. Napa valley wines are becoming more and more popular in the rapidly developing China market. Watch a video created by ICS TV by clicking here.

Mr. Abbe, on behalf of Midwest Shipper’s Association, made a speech which briefly covered: 1) information about the Midwest Shipper’s Association and basics about U.S. Soybean production 2) Information about U.S. non-GMO food soybean production systems 3) shared the commitment of our member companies to reliably serve Asian soy food customers 4) invited all of the attendees to the Midwest Shipper’s Association International Conference which will be held in the US in August. Dr. James H. Orf, Professor for Soybean Breeding and Genetics of the University of Minnesota also made a speech regarding U.S. identity preserved soybean systems and recent developments with U.S. food-grade soybean breeding.

PLMA|Private Label Manufactures Association Training Program in Shanghai
From April 18-19, four ATO Shanghai staff participated in a two-day private label training course which included representatives from most major supermarket chains operating in Shanghai region. The program was organized by the “Private Label Manufactures Association(PLMA)” and “Shanghai JiaoTong University.” ATO Shanghai staff met PLMA representatives at a private label food show in Shanghai last fall and were informed about this training opportunity. ATO may send a buyer mission to the PLMA show in the United States next November.
The following topics were covered at the seminar:
1. Retailing in China—Mr. Gu Guojian, Head of Shanghai Institute of Chain store Management
3. Marketing, sales, and products development—William Gao, professor of Shanghai Jiaotong University
4. A successful Private Label brand building—Terry Lee, Private brand advisor
5. Manufacturers’ role—Managing Director of Vital Pet Food Group
6. Consumer behavior—Chen JunSong, professor of Shanghai Jiaotong University
For more information, please click here.

U.S.-China Trade Summary for the First Quarter of 2012
In the first quarter of 2012 and for the third time since 2010, quarterly imports from China outpaced U.S. exports to China, up 9.0% yoy versus 3.6% yoy respectively, while U.S. global imports and exports were up 7.5% yoy and 7.1% yoy respectively. For the month of March, the growth of U.S. exports to China was less than U.S. exports globally. U.S. exports to China for March were up 3.3% yoy, while U.S. exports globally were up 6.2% yoy. China’s slipped to become the second largest trading partner of the United States, after Mexico. As of the first quarter, the total U.S. trade deficit with China, at $67.1 billion, accounting for 44.8% of the U.S. total trade deficit. For full reports, please click here.

**China’s Trade Surplus further expanded in April, showing the slower growth of imports than exports**

China recorded a trade surplus at $18.4 billion in April, as growth in exports growth outpaced that of imports, according to data released by China Customs on May 10, 2012. For the month of April, China’s exports increased 4.9% yoy to $163.3 billion, mainly on growth of exports to the United States, which were up 10% yoy versus exports to the EU, which were down 2.4% yoy and exports to Japan, which grew about half as fast as those to the United States, at 5.4% yoy. As a consequence, the United States became China’s largest export market, overtaking that rank from the EU for the month of April. China’s imports, meanwhile, increased 0.3% yoy to $144.8 billion. With seasonal adjustments, China’s exports and imports growths were 7.2% and 4.8% yoy respectively. For April, total China-U.S. trade reached $39.4 billion, up
9.2% yoy, while China’s surplus with the United States reached $16.9 billion, up 11.9% yoy. China’s exports to U.S. were up 10% to $28.1 billion, while China’s imports from U.S. weren’t up quite as fast, at 7.3% to $11.3 billion in the past month. For more detailed information about Chinese trade in April with the United States, the EU, and Japan, please click here.

**May 2012 WASDE Summary**

Today’s WASDE includes the first official 2012/13 global and U.S. supply & demand prospects. U.S. production projections are based on the *Prospective Plantings* report, while global projections are based on GAINS reports, trends, economic & market analysis, and the assumption of normal weather. These projections are tentative as spring planting is underway in the Northern Hemisphere and remains several months away in the Southern Hemisphere. The WASDE also includes the 2013 U.S. livestock and poultry projections.

- **Cotton:** China Drives Record Global Stocks
- **Grain:** Corn Surplus Contrasts with Wheat Deficit; Rice Relatively Abundant
- **Oilseeds:** China Drives New Crop U.S. Soybean Sales

**+ Trade Policy Updates**
I. FOOD, AGRICULTURAL AND AGribusiness Policy Updates

Wen Jiabao: ensuring good harvest of summer grain and oil crops an immediate priority

The current task is to focus on spring planting and enhance efforts on prevention of insects and diseases, said Premier Wen Jiabao at a State Council meeting on deploying economic priorities for the immediate future. In order to stabilize the food prices, efforts should also be made to increase vegetable production and perfect the distribution policies and reserve system for life necessities for urban residents in large and medium-sized cities, added Premier Wen. In addition to agriculture, the State Council meeting also deployed priorities for other important economic sectors. (Ministry of Agriculture web site: www.agri.gov.cn, 4/16/2012, WBG)

II. Commodity Production, Consumption and Trade Grain and Feed

Indian rice is allowed for exports to China since April 2012

From April, 2012, Indian Basmati rice is allowed for export to China, according to an AQSIQ announcement titled “General Administration of Quality Supervision, Inspection and Quarantine’s Announcement on Allowing Indian Rice Exports to China” (Announcement No. 59, 2012). The full translation of the announcement on April 11, 2012: In November 2006, General Administration of
Quality Supervision, Inspection and Quarantine, PRC and Agricultural Ministry of India signed a phyto-sanitary requirement protocol on Indian rice export to China. Recently, the two sides have reached agreement on implementation of relevant technical issues. From the date of this announcement, Indian Basmati rice, which conforms to the protocol requirements, is allowed for exports to China. (End) The announcement was posted on AQSIQ website on April 16, 2012. (http://www.aqsiq.gov.cn/zwgk/jlgg/zjgg/2011_1/201204/t20120416_215309.htm, 04/18/2012 JJY)

India could be the largest rice exporter in 2012, while competing with Thailand and Vietnam

The current price for Vietnam rice remains competitive over Thai rice on the international market. Vietnam rice with 5% broken is priced at $440/ton (FOB), $100/ton lower than the Thai rice with same specification. Rice variety with 25% broken is priced at $390/ton, $145/ton lower than same specification Thai rice. India as another rice exporting competitor, with ample stock supply and an easy control policy on exports, its rice exports are expected to reach 7 MMT, potentially become the largest rice exporter in the world in 2012. (Source: CNGOIC, 04/19/2012, JJY)

Early rice acreage rise in 2012 due to raised floor price and subsidized seedling nursery

Early rice acreage is expected to reach 88 million mu, (1 Ha=15 mu), up by 1.7 million mu (or 2%) from the previous year, according to a MoA’s crop survey in April. A separate survey by National
Statistical Bureau on 70,000 farmers showed that early rice will rise to 87 million mu, up by 750,000 mu (or less than 1%) from the previous year. Agricultural departments in two major rice producing provinces, Hunan and Jiangxi both reported growth in early rice acreage over the previous year. The raise purchase price for early rice in 2012, and a new subsidy on centralized seedling nursery contributed to the acreage expansion for early rice in 2012. The rice seedlings are rated in good conditions. By April 9, 22 million mu (or 25%) of the planned acreage has been planted. (Source: CNGOIC, 04/15/2012, JJY)

OILSEEDS

Heilongjiang soybean planting intention continues to fall in MY12/13

According to a household survey conducted by the Provincial Price Bureau of Heilongjiang (the largest soybean producer in China), MY12/13 soybean planting intention is down 1% from the previous year, while planting intention for corn and rice is expected to increase by 2% and 2.8%, respectively. Heilongjiang’s soybean production account for about 40% of the nation’s total in recent years. (http://www.hljagri.gov.cn/nydt/nydtsn/201204/t20120411_452129.htm; 04/11/12)

Heilongjiang government set area target for major crops but soybeans

According to China National Grain and Oil Information Center (CNGOIC), Heilongjiang Agricultural Commission set 2012 planting area targets for major grain crops and vegetables, potato and forage, however without including soybeans. Specifically, total planted area for grain

crops shall reach 200 million Mu (13.3 MHa) with 90 MMu for corn and 45 MMu for rice but no target area for soybeans. Industry sources speculate that given the disadvantaged profits received by farmers from soybeans, the local government prefers not to guide farmers to plant soybeans but let the farmers choose what to plant based on profit and climate conditions. Chinese official statistics show Heilongjiang soybean planted area ranges from 3.5 to 4 MHa in recent 2 years. MOA’s agricultural meteorological report dated April 17 said the moisture level for spring sowing remains normal nationwide, however, slightly dry in west part of Northeast China. (CNGOIC Oilseeds Daily April 19 and http://www.agri.gov.cn/V20/SC/jcyj_1/zh/201204/t20120417_2604942.htm

**COTTON**

Xinjiang promotes mechanized cotton harvesting

According to Xinjiang Agriculture Machination Bureau, the subsidy for purchasing cotton harvest machines will increase to RMB300,000 Yuan/set in 2012, up RMB100,000 Yuan /set from the previous year. The purpose is to increase mechanized cotton harvesting rate from the current 2.1% only (out of the estimated 1.07 million hectares of cotton planted by Xinjiang local farmers in 2011). The Xinjiang Agriculture Machination Bureau expects to increase mechanized harvest area by 20,000 Ha in 2012 through this subsidy growth. (http://www.china-cotton.org/article/2012/04/18/43129.php; 04/17/12)

**MEAT, LIVESTOCK AND DAIRY**
Swine production is changing from positive to negative profit

The data of China National Development and Reform Commission (NDRC) shows that on April 11, 2012 national hogs’ farm price was RMB 14.16 ($2.25) per kilogram, down 2.92% from the previous week. Swine and grain ratio was 5.99, down 3.7%. The Ministry of Agriculture (MOA)’s data shows that national swine inventory in March 2012 was 461,670 million head and productive sow inventory was 49.54 million head, up 0.7% and 0.1% respectively from February. For the first time since July 2010, MOA data also shows that the hog and grain ratio in April was lower than 6. The profit for each fattened hog on average on these farms using their won piglets is now lower than RMB100 ($15.9). Hog fattening farms that buy commercial piglets are losing money. However, hog prices are expected to go up in May. The reasons are: 1) disease impact on inventory, which occurred at the beginning of 2012, will be reflected in May. By that time, reduced swine supply will support higher prices. 2) The public May Day holiday will increase pork consumption, pushing prices up. 3) There is a stronger expectation that the government will start buying pork for strategic reserves to prevent hog prices to continue decreasing. (China National Grain and Oil Information Center, 4/19/2012, ZJP)

Infant formula will be forbidden to add colostrums

As of September 2012, infant formula will not be allowed to add colostrums or dairy products using colostrums as processing materials. Yesterday, the Ministry of Health (MOH) responded with this reply to a question from AQSIQ (the General
Administration of Quality Supervision, Inspection and Quarantine) about which standard AQSIQ should use for quarantine inspection on imported colostrums products. However, imported infant formula foods with colostrums before produced and imported before the effective date, which comply with China’s requirements and are still within the shelf life period, are allowed to sell. This means that many infant formula milk powder using colostrums as a selling point will be forbidden to produce and sell. (Beijing Youth Paper, 4/19/2012, ZJP)

Highly pathogenic avian influenza outbreak in Ningxia
According to the News Release Office of the Ministry of Agriculture (MOA) on April 18, 2012, an outbreak of highly pathogenic avian influenza (HPAI), H5N1 virus, took place in Yuanzhou District, Guyuan City, Ningxia Hui Autonomous Region. On April 14, some egg layers on farms at Yanglang Village of Touying Town showed symptoms of suspected avian influenza. MOA’s National Avian Influenza Reference Laboratory confirmed on April 18 that the case was a H5N1 avian influenza after testing samples collected at these sites. Totally, 23,880 birds were infected and 95,000 birds were culled. MOA sent a working team to the quarantined area to help and guide local epidemic prevention (Xinhua News 4/19/2012, ZJP)

VI. OTHER
MOFCOM said rapid increase of production cost slowed down exports
In a routine news briefing held on April 17, China’s Ministry of Commerce said export value for the 1st
quarter of 2012 increased 7.6% despite a slow recovery of overseas demand. MOFCOM also said the rapid increase of production cost (including labor and other factors) reduced competitiveness in international marketplace in particular for labor-intensive products. MOFCOM expect the international trade situation will improve in the 2nd quarter and the trade target for the whole year will be reached (http://finance.people.com.cn/GB/17677029.html; 04/14/12).

China, Japan and S. Korea sign communiqué to identify key areas of cooperation in agriculture

Food security, animal and plant disease control, responses of agriculture to natural disasters, exchange of researchers, economic partnership, and global or regional cooperation have been identified as the key areas of cooperation in agriculture, according to a joint communiqué signed by agriculture ministers of China, Japan and South Korea. Under the guidelines, the three countries will enhance sharing and exchange of information regarding food security, animal/plant diseases like foot-and-mouth disease, and natural disasters through existing regional information platforms. The three parties will also facilitate grain and agriculture (fishery) trade and possible establishment of a trilateral economic partnership so as to achieve sustainable development of agriculture and fishery. (Farmer’s Daily, 4/16/2012, WBG)

**All-China Cooperator Meeting:** FAS/China invites all USDA Cooperators with programs in China to join us in Xian on September 11 and 12. As we did in Changsha in December 2010, we will organize a one-day program of presentations, panels, or other interactive sessions on September 11 followed by a series of individual meetings on September 12. We are looking at ways to improve the one-on-one meetings and have already received a couple of good ideas from several of the Cooperators. If you have suggestions for either day of the meeting, please let us know! Please direct your ideas to Scott Sindelar and Ralph Bean.

**2012 Harvard Agribusiness Seminar - An Asian Offering**

From June 3-6, 2012, Harvard Business School (HBS) is bringing its renowned Agribusiness Seminar to China, a critical agribusiness region. A more intimate version of the annual flagship session in Boston, this HBS Executive Education program, offered in collaboration with the School of Management, Fudan University in Shanghai, is a unique forum for assessing emerging global trends and issues, identifying best management practices, and exploring promising new business strategies. You will gain fresh insights into the industry's future in a world where the demand for food, biofuels, and other agriculturally based products is rising dramatically. Please click [here](http://example.com) for more information...
2012 IFAMA World Food and Agribusiness Forum
Scheduled for June 11-14, 2012, in Shanghai, China, IFAMA (www.ifama.org) | International Food and Agribusiness Management Association brings together senior people from industry, academia and government on an annual basis to focus on strategic issues of importance across the global food and agriculture value chain.
