

Oilseeds: World Markets and Trade

China Cottonseed Imports Show Strong Demand in Recent Years

China cottonseed imports increased in recent years, setting a record at over 650,000 tons in 2022/23. Imports are expected to remain strong in 2023/24 and 2024/25, though down from the record. Australia and the United States supply nearly all of China’s cottonseed imports, with Pakistan, Cameroon, Benin, and Burma exporting marginal tonnage.

Over the last 5 years, China imports of cottonseed from Australia reemerged from zero to total over 650,000 tons in 2022/23. In 2020/21, Australia’s cottonseed crop rebounded following the effects of a 2-year drought, which had limited exports to near zero. By 2021/22, Australia cottonseed production returned to pre-drought levels as production areas received plentiful rainfall, enabling a substantial increase in exports. This trend of large exports has continued in 2022/23 and 2023/24. Australia cottonseed production in 2024/25 is expected to remain high at nearly 1.3 million tons. In 2021, China expanded market access to the United States. Year-to-date 2023/24 shipments from the United States are already at a record of nearly 110,000 tons with one month outstanding.

In 2023/24, China was the world’s second largest producer of cottonseed after India, and the largest consumer. China produced 10.7 million tons and consumed 11.4 million tons of the 41.3 million tons of cottonseed consumed globally. China produces most of its domestic cotton in the Xinjiang province. This production is relatively far from crushing facilities at the coast, providing a market opportunity for imports when there are competitive prices for U.S. and Australia cottonseed. China cottonseed production for 2024/25 is forecast at 11.1 million tons, up from the previous year based on stable area and a modest increase in yield. While China’s rising expected production results in a lower import forecast for 2024/25, China is still projected to import 500,000 tons to meet its consumption forecast of 11.6 million tons.

DATA SERIES REVISIONS

South Korea Soybean Meal Revision

South Korea soybean meal production was revised from 2016/17 through 2024/25 due to the adoption of data from the Korea Soybean Processing Association. Due to livestock feed consumer preference for high protein soybean meal, the extraction rate for soybean meal was lowered to 0.72 to reflect the lower extraction rate associated with high protein meal production. Stocks and consumption were adjusted in line with this change as well. Read more in the South Korea Oilseeds and Products annual GAIN report [here](#).

Indonesia Palm Oil Revision

Indonesia palm oil production was lowered in 2022/23, 2023/24, and 2024/25. Food use was reduced to reflect more consistent per capita consumption growth. The 2023/24 export estimate was reduced 1.5 million tons in line with pace to date. The 2024/25 export forecast for Indonesia palm oil was reduced by 800,000 tons reflecting reduced production and carryin. Stocks and feed and waste were also adjusted in line with these production changes.

OVERVIEW 2024/25

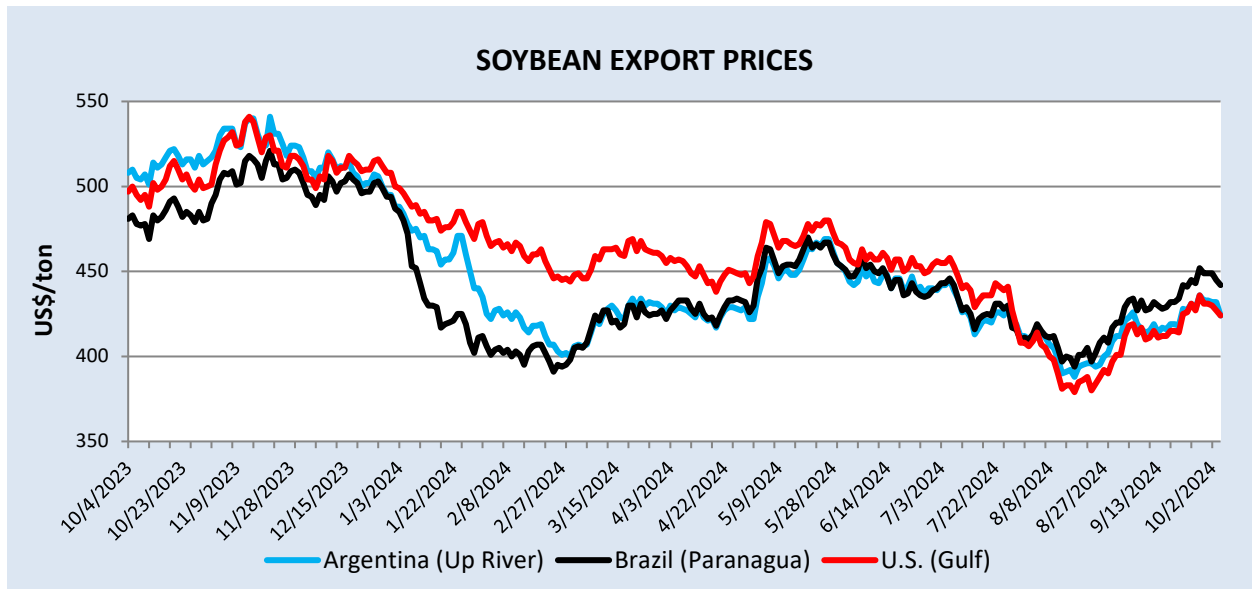

The global oilseeds production forecast is slightly down to 687.3 million this month on lower U.S. and Ukraine soybeans, not offset by higher Argentina sunflowerseed and China cottonseed. Oilseeds trade is down slightly as lower Ukraine soybeans and U.S. peanuts were not offset by higher rapeseed exports from Canada. Oilseeds ending stocks are forecast over 200,000 tons lower on reduced Canada and EU rapeseed. Global crush is increased almost 400,000 to nearly 557.7 million tons on greater China rapeseed and EU sunflowerseed utilization, not offset by lower Thailand soybean crush. Global meal trade is up slightly on higher sunflowerseed meal trade. Global vegetable oil trade is down over 700,000 tons on lower Indonesia palm oil trade, not offset by higher Thailand palm oil exports.

The projected U.S. season-average farm price for soybeans is unchanged at \$10.80 per bushel.

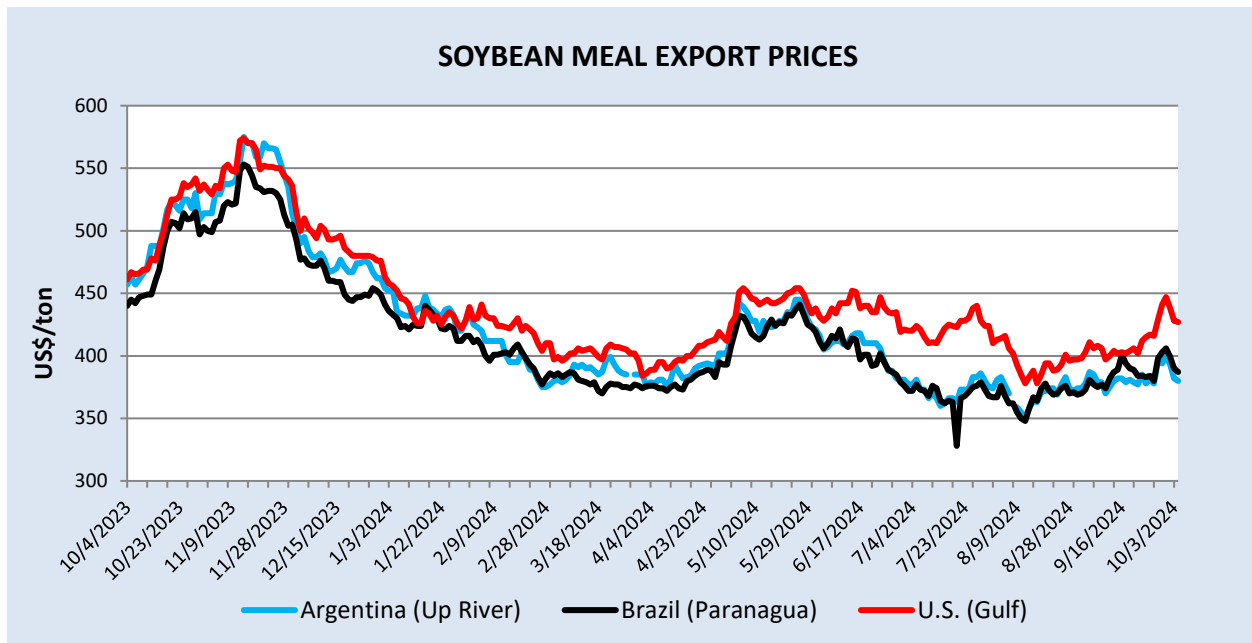

EXPORT PRICES

Soybean prices were up since the last WASDE report on poor weather conditions in South America at the beginning of planting season. In the last week, global soybean prices fell slightly following the arrival of rain in some growing regions of Brazil. Soybean meal prices largely moved in tandem with soybean prices. U.S. soybean oil prices rose through most of September, tracking with rising prices of other vegetable oils that were driven by lower supply expectations for palm, rapeseed, and sunflower oil. Palm oil was further strained during the month of September on reports of declining production and low

stocks in Indonesia. The price of sunflower and rapeseed oil increased through the month on continued expectations of low exportable supplies due to reduced crops in Europe and the Black Sea.

	Oilseed, Soybean	Imports	3,700	3,428	-272
Turkey	Meal, Soybean	Imports	1,475	1,625	150

ENDNOTES

REGION DEFINITIONS

North America: Canada, Mexico, the United States

Central America: Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama

Caribbean: Cuba, Dominican Republic, Haiti, Jamaica, Trinidad and Tobago

South America: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela

EU: Austria, Belgium/Luxembourg, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, and Sweden. Effective January 1, 2021, the separation of the United Kingdom (UK) from the European Union (EU) was complete, including trade between both entities. Starting in May 2021 with the release of 2021/22 data, grain PSDs reflect EU27 (shown in the PSD system as “European Union”) and UK separately. Beginning with the release of 2021/22 data, historical data for both EU27 and the UK are provided for 5 years (2016/17 through 2020/21).

Other Europe: Albania, Bosnia and Herzegovina, Former Yugoslavia, Gibraltar, Iceland, North Macedonia, Montenegro, Norway, Serbia, Switzerland, United Kingdom

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan

Middle East: Afghanistan, Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, and Yemen

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia

Sub-Saharan Africa: all African countries except North Africa

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan

South Asia: Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam

Oceania: Australia, Fiji, New Zealand, Papua New Guinea

OTHER NOTES

Marketing Years (MY): MY refers to the 12-month period at the onset of the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's MY for that commodity (2022/23 starts in 2022); except for oilseeds in certain Southern Hemisphere countries, where the second year begins the MY (2022/23 starts in 2023). For a complete list of local marketing years, please see the FAS website (<https://apps.fas.usda.gov/psdonline/>): go to Reports, Reference Data, and then Data Availability.

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years.

Oilseeds HS Codes

	Seed	Meal	Oil
Soybeans	1201	2304, 230250, 120810	1507
